OUR TRIBO ANNIVERSARY

May day is an auspicious anniversary "Merric England," and such it has also proved to the Standard, which first saw the light on the lat of May 1861. How happy it is to look back on the infant steps of our now robust 'protege.' With the last three years we have attacked abuses fearlessly and in the list of positive benefits we can a least point to Cotiton planting or almost the fruit of our personal labors. But it is more becoming on our part to thank the foreign public for the generous support they have vouchsafed to us, than to recount these merits which ar in the end one to our subscribers who have roised the English press to the

ROAD THROUGH THE GRAN

It was not more than three months since we called the attention of the Argentine Government and Republic to the necessity of opening direct commu nication between Corrientes and the upper provinces, through the Gran Chaco. The distance to Santingo is only 120 leagues, of which 30 through Indian territory in which the white man durst not set his foot. The

are Christian settlements here and there. The country is broken by woods rivers marshes and other impediments to travelling, but the expense or making a tolerable waggon road would be less than the gains of one year's traffic. Sor Vermelo navigation takes a great interest in the enterprise, as it will be easier for him to carry down the valuable productions of Oran by land than by a tedious and dangerous river transit. The trade in mules and torses, alone, from Corrientes to Sautiago will prove most lucrative : ever tago will prove most increative; even at present, it is a paying business to take animals down from Rosario, and thence overland to the latter province

than to recover these merits which are it precent, it is a paying business to the dead use to our substriction with and the animals down from Roanzio, and have raised the English preces to the control of the control

The news we hear from all quarter respecting the condition of the carries we are happy to say is rather good— the grass is abundant and the sheen fat. Owing however to the great and unexampled drought last year, the lambing exampled drought last year, the lambing is later than usual; in the majority of the flocks both north and south there are as yet very low lambs, but as the weather is mild the farmers are doing well. The prospects of the year are good; generally speaking we have more rain at this season, but as the frost has kept away, the heavy dews have brought kept away, the keery dews have brought the camps round. Several sales of sheep have taken place during the last month. In the partido of the Villa Luxan some three or four flockers very cheap-one flock was sold as low as 40 dols, by the cut. We heard of another very fine flock, which was sold in the partido of Navarro the other day at 42 dols., sambs not counting. When we take into consideration the number of sheep lost last year by the drought, and also the depreciated value of paper money, we must say that good meeting are sold under their value at anything

are eold under their value at anything less than fifty dollars.

Farmers complain much of the great increase of vagobonilism in the camps formerly the number of what is called a greater themes of was limited, owing to the strict watch which was the house of home, but now the camps are getting the strict watch which was the strictly indeed with these follows, who had not have the camps are getting the strictly indeed with these follows, who had not have they have better right to gallop over the camps!
