his machine has been specially designed for the Colonies and other new countries, for cutting strong thistles, fer and light scrub on rough land, and has been most successful in Autralasia and South America. It has very high wheels and is of great strength combined with lightness in draught. The cutting apparatus consists of 2 sets of knives, one set fixed to the Bar in place of the Fingers, and the other driven by the Crank plate and connecting Rod in the usual way. The unanimous verdict of all who have worked this machine is that it is the

ON 'CHANGE December 21st, 1885 141.10 The market presented to-day more or less to the low pr the same features as on last Saturday. Gold opened weak a d closed weaker. The Banks

still hold back from discounting, and money becomes tighter every day The Cedula market was very active and heavy transactions 1,200 @ effected both for cash and the end of the 1,200 sp month. Series G was in most demand and showed a slight improvement in prices, the market closing firm. The gold market opened at 141.20, at which price some 70,000 were Santos sold. It then rose to 141.30, dropped immediately to 141.20, and closed we kat 141.10. Amount sold 113,700. For the end of the month the total sales were 210,000, opening at 141.20, rising to 141.30, and closing at 141.10.
For January 31st 215,000 sold, opening and closing at the same price as for cash. Total sold 538,700. Cedulas were much more looked after than

nothing done, and very little will be passed until the sailing of the next steamer, a week away yet.

Freights are still quoted at same rates. Shipbrokers complain greatly of the dulness of trade. Never before has the market been so stagnant, and shippers find it as hard to get cargo now as in the winter months. Next month they expect matters will mend.
