REVIEW FOR EUROPE.

Everything favours the Plate! Polijarring tendency of local politics in one certainly fifty points lower. or two provinces is of little importance, more satisfactory condition. The only rings :cloud is the Chilian Difficulty, but even this cannot curb the fall in gold and the general progress of affairs.

The greatest activity is going on in shipping here, at Rosario, San Nicolas, and La Plata. The accumulation of produce is so great that 500 waggons full of maize are blocked in this port, and 1000 waggons in La Plata, for want of proper storage where to unload. Wool, wheat, maize and linseed are going forward in shiploads, and the result we see in a superabundant supply of gold and exchange.

As Congress broke up two millions sterling were voted in secret sitting for purchase of armament, and one half this amount has already gone into the acquisition of the Italian iron-clad Saint Bon It was thought that this vote would spread distrust in the market and cause a rise in gold; but experience teaches us for the last six months that the volume of produce weighing on the market defeats all this distrust and extra expenditure, even the bad effect produced by the sanction of a budget with a heavy deficit. All wonder how the Minister of Finance wiil manage to meet all the expenditure, unless he launches a large of two years, to pay for all the cruisers, iron clads, Krupp guns, and rifles, and itstrikes one that the ordinary revenue of the nation is just sufficient to meet ordinary expenditure and nothing more. People who know say that the Argentine Government will need at least six millions sterling this year above ordinary revenue of the nation. In spite of such a financial plight, the Treasury does not disturb either exchange or gold market. How loan: he has to cover the deficits either exchange or gold market. How This time last year gold was thirty knows: we all call him the Financial Sphinx and the people look on him with a kind closing rate of the 1st ring:

January 1896

January 1895 of superstitious awe.

In a few days President Uriburu will resume the reins of power. General Roca, during his three month's sway, has given an immense impetus to the War and Navy Departments, and President Uriburu will continue the same policy. Next menth the National Guards will be called out, and the Commissariat Department is working very actively to equip one hundred thousand men. The army divisions are now being distributed in Salta to the North, in Mendoza and San Juan to the West, and Cohihue, or Neuguen, to the South. There is some talk of placing a division at Curumalan, near Bahia Blanca. At the latter port the Ocean fleet will have its regular station, where it will be reinforced in the next two months by the Buenos Aires, cruiser and by the Garibaldi, iron-clad. It looks as if in another two months Argentina will become a big military encamp-ment, and this will not be relished on the West Coast, where they must view all these preparations as a serious threat. The Chilians, however, are not lagging behind in their armament, especially naval: in another year, when all the present naval contracts are completed, Chile campaign of the bears will be carried out will have by far the most powerful navy with still more activity, and the resistance in this hemisphere, unless Argentina buys of the outside market is stubborn. We a few more big iron-clads.

Imports are dull all round, and merchants complain of the stationary condition of many branches of commerce. Local competition has much to say in the falling off in the importation of many articles. Exporters are plunged in the greatest activity, and shipments of produce are very ing place is more crowded this year than large. The Grand Hotel is so crowded that we could hardly get in at the hall door, where we met Mr. and Mrs. r'owler and all the children, all going to bathe. We called on our old friend Mr. John Murphy of Almagro, but he was not up, we visited the Hotel del Cano, a large roomy building, every room full. Next we dropped in at the Progreso, a very fine establishment with an immense dining saloon, but every room occupied; and then we drove to the Bristol where our friend Don Antonio Devoto presented us to the proprietor, and there after much argument and persuasion by our Secretary Doctor McNally, we secured two rooms looking on the sea for \$15m per day, and \$24 for board for 4 persons, making a total of \$39 per day which is about the cheapest and best arrangement that can be made to-day in Mar del Plata. Badeker and Murray always give the Hotel prices in their guides and also the price for cabs. The charge in Mar del Plata for cabs driving about the town is 1.50 per hour, and for pic-nic and shooting parties to the camp \$2 per hour, driver acting as cook, making the

Luro has also a splendid mansion, and Mr. Zamboni on St. James's Hill has built another Warwick Castle. There are many new Villa houses going up on the hill close to the old fabric, which is shut up; and it was remarked to us by many who know the town from its infancy, that there is less fashion and far more life about the place this year than any year before The new church in the centre of the town is about half built, and when finished will be a great ornament, as also a convenience. DR. ROCHA'S OPINIONS

Dr. Dardo Rocha has been interviewed by a newespaper reporter in Valparaiso, who asked the Minister what he thought of Bolivia, her people and her Government. Dr. Rocha declared that Bolivia's commerce was next to nil. The Bolivians are a very affable race, courteous and refined hill, and the cabmen charge double to drive the people to Mass. The bells rang out at 10 a.m., and the little church was crowded with the wealth and fashion of no theatres, or any other places of amuse-Buenos Ayres. We knelt beside Mrs. ment. Even the high class of people go to bed at 8 o'clock!

The Government said, Dr. Rocha, is comprised of clever and able statesmen whose fast at 12, and the ladies with their hats only fault lies in their tondness for the Everything is to-morrow; even the most pressing and important questions are put off until next day. The whole Liberal Party in Bolivia is dead against the Chile Bolivian Treaty, and it was solely due to Dr. Baptista's efforts that the treaty was passed by the Bolivian Congress. The Conservative Party is by far the most powerful and influential one in the coun try, President Baptist's Government is administration; the roads and telegraph predecessor's mighty efforts to make bursting-point. gambling going on, but a celebrated bil- communication in the country are in a balance: not that he was fortunate very bad condition, disgraceful in fact. Dr. Rocha stated that he had put his signature to the treaty with Bolivia by which that Republic binds itself to construct her part of the railway from Salta to Sucre.

With regard to the Argentine Chilian Question, Dr. Rocha stated that the Boivians believed that war between the two countries was inevitable, but this opinion gave way to one of better thoughts in view of Argentina's wish that the difficulty might be settled peacefully.

Dr. Rocha declared that he believed in a sound, open. and frank policy with regard to the Chile-Argentine difficulty, Argentina, he said, is determined to have her rights respected, and therefore she maintains that the hightest peaks of the Andes form the only possible boundary line between her and her neighbour. She does not want an inch more of territory, neither will she accept an inch less. Dr. Rocha stated that the Chile-Boli-

vian treaty was accepted by the latter country through mere necessity. Dr. Rocha managed to get back the Argentine flag lost by the Argentines in the defeat of Vilcapugio. The flag, which is stained with blood, was discovered behind

THE BUDGET FOR 1896.

The figures of the Budget for the curestimates were placed before Congress. Of all the budgets ever sanctioned by previous year:-Congress, that for 1896 is the weakest and most unpardonable in all our experience of the River Plate. Much as Minister Romero is to blame for presenting estimates that, besides fictitious, leave a glaring deficit of nearly a million sterling, greater still is the responsibility of the Legislators who endorsed such figures, and under the convenient plea of urgency did not even take the ordinary trouble to discuss and compare the figures presented by the Minister and recommended by the

cloak to cover the deficiencies in the figures and consider if it is not high time The Chilian scare has been used as a framing of the Budget, and we suppose that patriotism overlooks with forbearance the disreputable deficit that, in our mind, nothing can excuse, and forms a melancholy precedent after Dr. Romero's in his efforts-far from it-but he battled against the old chaotic system and strove to improve affairs. Dr. Terry, by hook or by crook, managed to present decent Budgets; appearances at least were saved, and on paper there was always a nominal "superabit": in practice, however, there was a yearly deficit, but he was not to blame. But in the present instance the Budget of the current year is presented to the country in the follow- in the short term of ninety days so many ing unblushing fashion :-

S paper 1896 Sgold Revenue.... 31,418,000 40,760,000 Expenses... 15,811,000 105,022,000 confusing, not to say misleading, we shall reduce all the figures to paper money at the rate of, say, \$320 to 100 gold, viz :-

When we consider that the Budgets of 1894 and 1895, which were framed to present an equilibrium or a surplus, actually left heavy deficits, we may well pause to enquire what will be the results of this were pending so long before Government 1896 Budget, which is ushered into exist- and were finally despatched ence with the old original sin to the startling amount of over 14 millions deficit? RETURN OF THE PRESIDENT.

Yesterday H.E. President Uriburu reurned to town after a three months' absence, during which time General Roca, as President of the Senate, filled the chair

of President of the Republic. The interlude seems short, looks hardly worth the trouble of reviewing, yet even wondrous events have occurred, both here and in Europe, that it is difficult in a brief, scrappy article to set forth a correct chedule of all the mighty events that have shaken both continents since Dr As this dual system of gold and paper is Uriburu left. OVER THE BORDER

If Customs returns can be relied on as argued that the country has got over the crisis and turned a corner at last. The revenue from the Customs has increased at a most remarkable rate in the last two years, a fact that some attribute to improved administration under President Borda, and others trace to the natural growth of trade. We are inclined to believe the latter, as in these latitudes political parties, no matter what reforms or how much regeneration they may preach, are very slow in any administrative changes. Thus we see Governments and parties come and go, but the system re-mains invariable and may be condensed into increasing taxation and still faster increasing expenditure. FURTHER INCREASE.

The National Government is evidently determined on putting the Argentin army and navy on a pinnacle of superior ity which will leave no room for doubt as regards her naval and army power The contract for the purchase of the Italian ironclad Saint Bon has been signed, and it is very possible that the purchase of this powerful vessel will be followed by the acquisition of the Varese or Emmanuele Filiberto, both splendic war engines. Enough with regard to war vessels. Argentina has besides this engaged the services of Signor Luiggi, one of, if not the best naval engineer in Europe, to fortify the long and perfectly open stretch of coast on the Atlantic ocean. FASHIONABLE WEDDING IN PAYSANDU.

The great event of the week has been the marriage of the well-known medical gentleman and ertanciero, Dr. French. The interest excited arose not only from the esteem with which the bridegroom is considered, but also on account of the romantic events which accompanied the arrival of the lady who now bears his name. Mrs Cushen, a widow lady of superior attractions, accomplished lately a real Christian act of self-sacrifice, having come out from England solely for the purpose of nursing a young gentleman who was dying, and whose only desire was to see once more his mother, who lived in Montevideo. She accomplished her noble work and was able to deliver him to his mother, who thus was able to soothe his last moments. Don Conrado followed thr progressive lines initiated by his father, and his estancia was one of the largest and most important in the north west of the Republic, being devoted to both stock-farming and agriculture on a large scale and also being the seat of a flourish ing model colony. He was also a pro minent and influential member of the Rural Association. In personal character was upright, affable and kind-hearted and enjoyed the high eeteem and respec of the English community, of natives, and of all who worked under him. He was a Miles open.. frequent visitor to this capital, where he was always welcomed by a large circle of riends. He was married to a daughter Don Pancho Gomez, and his widow and a large family survive to lament his loss. His sudden death is sincerely lamented in all circles, and we add ours to the very general condolences expressed with his bereaved family.

There is a seething swirl of discontent under the apparently tranquil surface of the live stock export business, due to the impossible conditions imposed by the inspectors in pursuance of the Finance Minister's instructions. A leading exporte declares that matters have reached such a pass that many firms in the business are seriously considering the advisability of loading from Montevideo until such time as their pressing engagements are over. And this done with, the business will be narrowed down on wholesale lines. This is very serious. NEW ADVERTISEMENTS.

TO MOTHERS.

In a country where the rearing of infants is attended with somewhat exceptional difficulties and risk owing partly to climatic reasons, and partly to the difficulty of getting medical assistance in the 'camp,' an apology is hardly needed for publishing a small hand-book on the subject for the use of mothers. In Dr. Pennel's book on Infant Feeding an attempt has been made to explain in simple terms the reasons on which plain in simple terms the reasons on which
the various rules and recommendations are
based, in order that a mother in modifying
her child's diet from time to time as required, may be guided by common sense
and not by the hundred and one conflicting
counsels, with which she will be assailed. On sale at all bookstalls and libraries. 148 f4 5

The jacket is drawn in at the waist with a cloth waist-belt and gilt buckle.

Lord Salisbury must be a perfectly happy man just at present, as he is playing a dozen games of political chess at once, and it is well known how he enjoys the pastime. Yesterday's telegram's say that he has all but won one of the games and has succeeded in detaching Italy from the Triple Alliance. This is what has so frightened the venerable Francis Joseph of Austria. It has n't frightened Emperor William, but it has made him exceedingly angry. The most curious part of the business is that England is urging Italy to join the Russo-Turkish alliance, or agreement, or what ever it is. What, in the name of the late

ON 'CHANGE,

Tuesday, February 4th 1896.

Gold Premium. FIRST RING...... 217.40% SECOND RING...... 217.60%

There was another sharp snap in the market this morning, and at first brush market this morning, and at first brush the gold premium opened so weak-kneed, in such a fainting condition, that it looked bound for the neighborhood of 200%. The weakness, however, did not last long and a strong bullish blast soon rallied the bulls and the market; up went the premium two points, to the amazement of thelbears. "What's up"? was the guery in the bearish camp. Some said query in the bearish camp. Some said that a sudden demand had sprung up for the French packet which sails to-morrow; very probable. Others remarked that the shrewd dealers were buying and smelt a rat—some news from Chile, they said. But this was moonshine. A plausible argument is that when gold touched 215% premium many rushed in to cover, and in the scramble for margins gold went up

like a rocket.

About a million gold dollars changed hands at the first ring. The demand for cash gold was exceptionably stiff, and nearly half a million had to be supplied; the premium opened at 215.50%. rose rapidly, and closed at 217.40%. A quarter of a million was sold for the end of the month; the premium opened at 217.50% and closed at 219.50%—two points contango only. One hundred thousand dollars were sold for the 15th, the premium closing at 218%. Business for the end of March slightly exceeded one hundred thousand dollars; the premium opened at 221% and closed at 222%—contango of 4% points. The market closed with a bullish tendency. like a rocket.

The market closed with a bullish tendency.
The sudden check to the fall in gold was nothing short of a surprise, but people seem to forget that the gold market this morning stood 15 points lower than a fortnight ago—a strong temptation to cover at such margins. The nearer gold gets to 200% premium the stronger the conviction in outside quarters that the time to buy is at hand. To-day proved both facts to the enthusiastic bears.

A rumour is running round the market that some private information of a very satisfactory nature has been received from Chile. The news in question is that Drs. Quirno Costa and Guerrero will negotiate directly and sign a protocol with the approval of the two Governments, that of Chile and that of Argentina. In well-informed quarters this statement is confirmed. None doubt that if left to the discretion of Guerrero and Quirno Costa the Chilian question would be immediately settled, but the difficulty is that diately settled, but the difficulty is that nothing but an "ad referendum" settlement can be signed; the respective Legislatures, here's the rub, must decide the fate of any protocol. We all remember the days of 1877 and 1878, when protocols and treaties succeeded each other in cols and treaties succeeded each other in Santiago and matters were aggravated by their rejection. In Bolsa circles, however, there is a general belief that a protocol will be signed in Santiago this month, and great importance is attached to the 'expectativa.' especially from a speculative point of view.

paying to-morrow a dividend of \$3 % per share. This is 50 cents more than last Although the French packet leaves to-

morrow, the exchange market was signally dull to-day. Bills on London were offering at 48 % d, but there were no takers under 48 5/16d. Marks were freely offered at 4.12 % on Germany. Francs remained unaltered at 5.09 on France and

Paper discounts were steady at 8% and gold nominal at 7%. Telegrams from Rio Janeiro this afternoon quoted exchange on London at 9 3/32d. The rate in Valparaiso was 17 % d; the advance of two millions sterling by Rothschild has failed to put up Chilian exchange.

The French authorities, as far as we can glean from telegrams, intend to give the authorities here a rap over the knuckles for piling up the duties on French wines, and will take advantage of the wethers which they allege to be deficient as regards quality and invariably scabby as regards condition, to work off Roland against Oliver. It seems that in the French Chamber of Deputies yesterday the Government was interpellated as to its cognisance of the state in which Argenti ne wethers arrived, the Ministerial reply being that the Government was not only fully aware of the facts, but pretty well weary of remonstrating with its good brother Argentina on the point, without securing any more substantial change than an increased duty on French wines We presume this is a polite reminder to the Government here to mend its ways or its wethers, or there will be a commercial ultimatum and probably a tariff war. The interpellating deputy signified complete acquiescence with the Ministerial views. As regards our meat supply to France it has not yet reached such a pitch that its partial or complete cessation would cause a break-up in the trade. The main current runs to England, but the French trade was growing and would undoubtedly be very important in time if left untrammeled, though at present it might be set down roughly at 20,000 head live-stock, and 1800 frozen wethers annually, a very small percentage of the total trade.

He, however, individually used his influence to bring about a "modus vivendi", it being ultimately arranged that Messys. Rose, Samson, Boadle and V. Our telegrams from Antwerp report a

ntonio Zuffardi, Joaquin J. Cueto and price of gold for payment of Custom dues at 317 for Wednesday, February 5th.

The gold market was feverishly active at 317 for Wednesday, February 5th.

The Constitution came out of its shell this morning; several large parcels this morning; several large parcels changed hands, Mr. E. Martinez de Hoz do cow hides, 63 do horse hides, 15 The Constitucion came out of its shell bought 60,000 kilos of fine wool from the bags horse hair and 65 do grease, talestancia Lozano Plomer, at 8.70 per 10 low and oil. Messrs. Bullrich and Co. sold to-day cross-Lincoln. Messrs. P. A. Lanusse's dred thousand dollars were sold for de-livery to-morrow: the premium opened at livery to-morrow: the premium opened at

> from the Province of Buenos Aires; 14 bags in the docks, of various classes fe ed also 7.80. Two sales from Ros were also reported, one of 5,000 tons another of 2,000 do from Santa Fé at in waggon. According to telegrams who was selling stiff in Antwerp at 1 francs; the news from London is purchases cannot be made under 25

The market for maize closed firm rock this evening, the latest transact were 20,000 bags in the Riachuelo at and 400 tons in the darsena at 3.70.

The interest in maize is still as firm rock, in the darsena 7,500 morocho were sold at 3.20; in the Once porters paid from 3 to 3.25 and for ye up to 3.60. Several large parcels of d and heated linseed are arriving here, find small outlet owing to their condition.

In Messrs. Devoto, Balbiani and Co.'s weekly review, we find the following items on the situation of the market. Owing to the decided fall in the gold premium artistas are opposed to take the risks of exchange on their shoulders; if it were not for this fact operations would have been large, as the demand for fine wools and flush cross Lincoln is very Cable advices report the sale at Dept- steady. North and West do not seem to be up to the mark this season. We don't know whether the cause is a deficiency in the being at the rate of \$69 per square metre.

A number of sites in Caballito, at an average of \$1.40 per square yard.

Whether the cause is a deficiency in callity, or for the want of North American buyers. The current prices are from 7.50 to 8.50. Very few offers are made for average of \$1.40 per square yard.

Three sites in Caballito, behind the mezclas, if some transactions are reported, Western Railway workshops at \$1.60 per it is due greatly to the consignatarios giving in to the exporters' conditions. Wools from Patagones and the Colorado The great lease auction of Provincial still stick to the old prices; it seems that lands in Guamini and Lincoln comes off the fleeces have too much "caretilla," the to-morrow at La Plata in the Land Office.
