# Review of the Week.

Yellew fever! In the old days, before the Bateman City Improvement Works were completed, the bare whisper of the plague would cause a panic and drive people in thousands from the city. To-day we see the fever rampant in the low shed of that fashionable suburb Belgrano, yet nobody, not even the Health Board, has gone off his head, and people look at the march of the disease without apprehension. That there is a focus of yellow fever in Belgrano is beyond doubt, the cases are not sporadic, and they succeed the 1st, and \$100 to the 2nd. infection to be local. The people living in the infected "manzamas" have been isolated with the greatest severity and fed at the cost of the State: that not proving efficient enough, the Government has shipped all these people for a holiday to Martin Garcia, a most delightful spot in this hot weather. Once the infected square is abandoned we suppose that the Health Board will improve its disinfective

Abyssinian holy city of Axum, has spread a gloom over the Plate. The interests of Argentina are so closely linked to Italy that this reverse has caused as much excitement and sorrow here in Buenos Aires as in Milan or Naples. The popular sub-scriptions for the families of the fallen soldiers are an instance of the sympathy evinced, but the most wonderful feature of this subscription is the generosity of the German community here; it does look strange to see the total of German subscription for the last three days run higher than the very Italian list. The fact has not escaped the notice of some leading Italians, who have now come forward with contributions of 5,000 each.

There is no disguising Argentine sympathies for Italy in Abyssinia and for Spain in Cuba—yet both Abyssinians and Cubans are fighting for their independence. Here we see the effects of the large Italian and Spanish immigration in our midst, and it must be gratifying to both Italians and Spaniards to see the warm friendship displayed by the Argentine press and people in their reverses and troubles. Bombs and rockets are going off by day and night in our central streets from the offices of five Italian newspapers: we doubt if the sxcitement in Rome was greater than here the day that the Amba-Garima defeat burst on the public. Amongst Argentines there is a conviction that Italy does not need Baratieris or Baldisseras in Abyssinia so much as Levalles and Leyrias for a thorough "gaucho" warfare. Our talented correspondent Mr MacDonald seems to hold the same cpinion-European mili-

The fall in gold has been checked by purchases of the National Government, by the critical state of politics in Europe, and by the Belgrano yellow-fever cases. Last week the premium looked doomed to fall under 200 %: it is now stubborn over that price and is far more inclined to rise than to fall. The march of gold has not been affected by any rumors or any fresh news about the Chilian question, which is plodding the even tenor of its way in Santiago or Valparaiso. Public interest seems to have dropped Chile out of sight for the last week and is only reminded of the cloud in the West by an occasional report of a purchase of a new ironclad, of some batteries, or the fortification of the coast. The Chilian negotiation is in "statu quo" and will remain so until an ultimatum

enlivens matters. There is a movement afoot to celebrate St. Patrick's Day, and a most representative and influential committee of Irish gentlemen, all men of leading position in our midst, has been appointed to prepare a popular banquet for the 17th. Full particulars will be found in another column. | Espoir, Asteroide and Eclipse.

It is an interesting question what would be the result of a great battle in which Germans should meet an equal number of Englishmen with equal resources in cavalry and artillery. The foregoing was submitted to the editor, and after studying it for a moment he said: "All the men on one side to be Germans? All the men on the other side to be English?" He was answered, "Yes". "Then," he said, "the result would depend upon the number of Irish on each side." He told the exact truth."

Queensland has a superficial area of Iowa, a vast proportion of which is suitable to cattle raising. But 12,000,000 acres in all are alienated, the rest being subject to lease, at a very small rental, hundreds of thousands of acres being now occupied on long lease at one-half cent, or a "farthing" per acre. Remember, further, there are no winters in Queensland, and though in much of the country the verdure is light, when drinking water can be had the cattle fatten finely with little care. Further, the "runs" are in enormous tracts, so that the cost in care is reduced to the lowest point conceivable. This, with the fact that cattle in this country are all of good grades-most of them high grades the average marketable bullock weighing 1,500 or 1,600 pounds-may convey some idea as to the cheapness of the production of cattle in this country. An American in Brisbane, who seemed reliable told me that he had just been offered 15000 cows for a certain sum, which he in turn offered for the hides alone, if taken off and salted, and it is said that at present prices cattle can be raised in that colony for the

Of course, the 7,000,000 head of cattle in Queensland do not appear to be a formidable number, when compared with the seven times that number in the United States, but it is surplus and not total quantity that we have to consider. To begin with the Queensland cattle in the stock yards at Sydney are much superior S. American hotels. All along the journey to the average of the Illinois, Iowa, Kansas and Nebraska cattle in Chicago yards, ranking well with our export stock.

But, assuming the weight and quality to be equal, let us reason it out. The United States must consume over tenelevenths of her annual "crop" of cattle, and cannot, therefore, export over 280,000 tons of beef, according to available authority, or say 800,000 head, as a surplus, while Queensland, with about twenty head of cattle per capital against 5-7 of a head for the United States, can export fully 80,000 tons, or 280,000 head as her annual surplus. By this comparison the

figures look more formidable. The surplus, then, for the one colony of Queensland, if I am properly informed, is over one-fourth as much as the surplus of the United States. I am assured by persons of high standing, and who seem to well informed, that Queensland is by no means fully stocked up, and the fact that there is less than one-third of her territory—viz: 12,000,000 acres alienated and 180,000,000 acres leased, now occupied for any purpose, indicates the possible expansion of her cattle industry. this puts an end to the statistical chaos going on in the columns of some of our leading colleagues, who in their calculations have struck very wide of the mark. We have taken the trouble to compile the figures of export for the last three years, that the reader may gauge in the comparison the exact increase in the country's wonderful production, both as regards quantity and value. We shall begin with the volume of exports and classify same on the same lines as the Na-

# YARROW'S SHALLOW DRAFT STEAMERS.

STERNWHEEL STEAMERS have been found by experience to be the best type of vessel for shallow river navigation, and of these Messrs. Yarbow have constructed a large number of successful examples for all parts of the world.

Vessels on this system are constructed when required, to draw as little as 6 inches.

Messrs. Yarbow lately built the sternwheelers "Mosquito" and "Herald" for the British Government, for service on the Zambesi.

They were constructed in floatable sections (capable of shipment), which were simply bolted together, avoiding thereby the costly and difficult process of riveting up and launching.

The great 4-days auction at the Highland Scot Canning Co's factory in Quilmes closed yesterday, and proved a great success, the attendance on all the days of sale being tremendous, ranging between 250 to 300 daily, and all buyers, the bidding being very spirited all through. It must he noted, however, that though the catalogue was longer than a litany, what was sold did not include any of the really intrinsic parts of the fabrica.

There are nine sections or Galpo s, of buyers. A correspondent from Chascomus Co had carriage of sale.

"The fair held on the 1st and 2nd March has been a great success. The weather was splendid, and on Sunday the fair was crowded, and towards the evening the ladies came out in great numbers. All the principal families of Chascomus were present.

"The demand for rams was very great especially for those of a better class.

"The best stock was shown by Mr. G. Arthur Bell, of Magdalena, who topped the market with the fair held on the 1st and 2nd —from the valley. A Scotch gentleman has made a fine purchase there and is so pleased that though he leaves shortly for Europe he hopes to increase his holding later on.
