General Flores is trying to buy more oxen and horses: he has to-day bought 80 oxen at 14 \$ a head.

No animals can be got from Brazil as the Rio Grande cavalry used up all in those parts. Such is also the want of arms and uniforms that our battalions present a 'mosaic' appearance, some with bullets too big for their muskets, some with none at all, nearly all without knapsacks, and hats and caps in every variety. We want white summer-clothing at once, such as Madero has ready-made in Buenos Avres.

We expect operations will soon be resumed, although Gen. Mitre's army has not yet reached the Correntino frontier at Mocoretá. It is all-important that we do not let the army of Barrios get back into Paraguay. Yesterday one of our men stood on a match in one of the magazines and the place exploded, killing Capt. NEW STEAM FIRE-ENGINE

B. Ayres, Oct. 12th, 1865. To the Editors of the 'Standard.' Gentlemen,

I enclose the within merely to show what New York does in order to put out fires. However, steam-engines are a 'siglo' or two too early for Buenos Ayres. Now, as steam-engines are being introduced into all the principal cities of the United states, taking the place of hand-engines, the latter, with hose and all necessary appa ratus, are being sold very cheap, and it would well answer the purpose of the authorities to order several of these engines, to replace the miserable squirts now in use. A thousand ounces so employed would save some millions of property, and probably many VERBUM SAT.

A large number of firemen and proninent persons, among them Fire Commissioners Pinckney, Engs, Brown and others, assembled vesterday afternoon at the foot of East Twenty-fourth-st, at 2 o'clock, for the purpose of testing the new engine which arrived in this city on last Sunday morning, a description of which appeared in a previous edition

The engine itself is to be drawn by two horses, the seat of the driver being quite elevated, and the tender is to be drawn by one horse. Both combined, they will be quite a novel institution in the new Fire Department, and from all appearances will give entire satis faction. When the fire was kindled she was tested, and in 94 minutes there were 60 pounds of steam up and the engine working briskly; half an hour The 'Libertad' explains that Gover- afterwards there was 135 pounds on.

> The first test was a stream through two lengths of hose the length of 100 feet and a one-inch nozzle, which was thrown into the East River horizontally at a distance of 264 feet. Two streams were also thrown through two lengths of hose, under 11 inch nozzle, at a distance of 158 feet. Then there were 20 lengths of hose twisted on top of the others say that half a million of patacons is or roof, over 75 feet above the ground, and a distance of 40 feet beyond.

These trials were given with the enenough. Several other trials in different ways were made, and all quite satisfac-

Yours, etc., BOAT-RACE.

A boat race between the crews of H convince the people of Buenos Ayres M.S. 'Narcissus' and 'Industry' took place at 3 p. in. of the 15th. The start was from the 'Industry' under the su perintendence of Mr. Ramsay Cooke, Master, of H. M. S. 'Egmont,' who acted as umpire, and who is always fore most in catering for the amusements of others. The race was round Fort Lage back to the starting-point.

At the starting of the boats the crev of the Narcissus manned the rigging (with one man at each Royal masthead), and loudly bheered their boat with stentorian voices. The distance to Fort Lage was accomplished in 18 minutes 55 seconds, and, to the starting point again, a distance of 51 miles, in 42 minutes and 20 seconds. On arriving at Fort Lage the cutter of the Narcissus' was 1 M. 15 S. ahead of that belonging to the 'Industry' and the coxswain hoisted a flag with the legend 'Twig her heels." She maintained the lead to the end and arrived at the goal 4 M. 10 S. ahead of the Industry's

Throughout the whole of the run the excitement on board the ressels was tremendous, both amongst those belonging to them, and among the numerous visitors; and when the boats came up they were received with shouts and uproarious hurrabs. We understand that large sums of money changed hands.

Throughout the race, lasting nearly three quarters of an hour, the men at the mast-heads remained standing on the trucks, occasionally for variety pirouetting round on one leg and stretching out their arms á la Mademoiselle

Buenos Ayres, 7th October 1865.

The undersigned Chairman of the Provisional Directory of the Central Argentine Railway, in this Republic, in accordance with the power vested in Tim by the statutes, duly approved by the Government, has the honor of making known to all who have subscribed for shares, in this country, that the fourth payment of £2 sterling or 9.80 dollars, upon each share, having been paid in London in the month of August past, he had fixed the 31st day of the present month of Octoin London in the month of August past, he has fixed the 31st day of the present month of October, for the payment in this country of such further quota, the amount of which is required to be paid in the office of the Director, No. 87, calle de la Reconquista, by all subscribers of the Provinces of the Republic at such offices as the parties delegated by the Directors may determine respectively:

ively:

By the 4th article of the Statutes the Director are empowered to demand payment from subscri-bers of moneys due for shares, provided that 21 days public notice be given, previous to the day fixed, and that no call shall exceed £2 sterling, or 9:80 dollars, per share, and further, that no call shall be made without allowing three months to pass, counting from the previous call; it being the duty of subscribers to pay such calls, made in ac-cordance with the above stipulations, to such perons and at such offices as the Director may

The call for the third quota, in this Republic, was made on the 31st of May, of the present year. The Directors inform the subscribers that the interest of soven per cent. per annum, corresponding to the year 1865, upon the sums they have paid in, can be received by them by applying to the office of the Directors, any day after the 1st THOMAS ARMSTRONG.

cessive reinvestment of such interest, effected quarterly, when the coupons are paid up by the public treasury.

So marvellous are the benefits arising from the employment of Capitals in Public Punds, assisted by the combinations offected by "La Bianhechera," based upon the Mortality Tables of Depardeux, and the interest produced by the 6 per cent. Consolidated Bonds, that taking for a model, the result given by other companies established precisely in the same form and basis, but with an accumulative interest much inferior to that gained by the 'Bianhechora,' that it is enabled to present as positive the following tables showing the gradual progression of capitals for a subscription of: 2.
