All that is left for us to do is to entreat all, both young and old, healthy and infirm, to a careful and attentive perusal of the statements contained in the report alluded, more especially where it treats of devising the means for putting its maintenance and prosperity beyond the shadow of a doubt.

We shall be much mistaken in our notion of human nature if there are many who can rise from such a perusal,-after reviewing in their mind the picture of the great amount of good attained by so charitable an institu tion, who will not feel it not only a duty but an honor to contribute, however small a pittance, towards its existence. The Northern Railway of Buenos Ayres, for instance, is of Anglo-Saxon origin. Discrediting the natural stur diness of that race, it has been a weak infancy. Not only was it born rickety, but the thing has since been starved.

It is quite impossible for the local management of that line to give complete satisfaction to the public if the directors, located six thousand miles off, are to be consulted on every insignificant reform, and if the company do not provide the means for preserving the permanent way in proper order, or keep up an efficient supply of rolling stock.

Much as we may be disposed to treat with leniency the manifest short comings of the Northern Railway management, we cannot expect it to be immaculate, and in regard to the irrelevant remarks of "Vigas" whose letter we published yesterday, we do not see that any technical knowledge of railway affairs is at all necessary to enable us to appreciate the inconveniences of railway accidents. Surely there must be something raname and address of the writer; not dically wrong in the traffic management of the Northern Railway, when within one week, that is on Sunday last, and again on Friday evening, there have been two mishaps which have given rise to serious complaints, and not so much in regard to the accidents themselves, as to the reme-

BANK MAUA AND CO. 101--Cangallo--103. BUENOS AYRES.

The immense advantages of Accounts Current The immense advantages of Accounts Current are now so generally felt and appreciated in the two great emporiums of the River Plate, Moutevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Mania & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depositary for their sevines.

savings.

The sums deposited in that very important institution are daily increasing, and already reach

a very large amount. These advantages have not hitherto been en

poyed in this city by an immense number of clerks, artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in the immoral gambling, in lotteries, and other trivalities. the immoral gambling, in lotteries, and other trivolities.

The Bank of Mana & Co. of this city, following

the noble example of their firm in Montevideo, now offer the same facilities in this city, and has

opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted. The Bank will deliver to each depositor a pass

book, in which will be entered the amount de-posited and withdrawn.

The depositor is permitted at any time to with-draw the whole or part of the sum deposited; in the former case the interest will be calculated up to date.

The Bank of Maul & Co. is sufficiently known to the Public by the benefit derived from the course of its operatious, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

DYE!

The Bank of Maua & Co. are also persuaded that this new branch of their business will render JUDSON'S SIMPLE DYES, nmense service to the working classes of Bueno Ayres and its neighborhood.
