The association also engaged to the Republic a number of head of borned cattle that shall not be less 3,000.

The capital which the company proposes to raise for its operation in the River Plate will not exceed £500,000.

The company desired also to amal gamate the export of cattle with that of the transport of emigrants to this country, but at present cannot make any compromise in this respect, as it is not known whether the Emigration Laws of Europe will permit of their conduction in the steamers about to be built: as however this branch of the business is of vast importance to the company, the government of Y.E. may rest assured that it will use every possible measure in order to carry it

Y.E. will not fail to recognise the very great responsibility which an Association such as this that I have the honor to represent takes upon itself the vast outlays required, and the risk that must be encountered in an enterprise so untried and so important.

On that account it is that the Provi sionary Association has empowered me to obtain from the Argentine Go vernment the conditions which I am about to detail, and which are indis pensable to the realisation of our pro posed enterprise.

1st. An exclusive privilege for the exportation of live cattle and sheer from the whole territories of the Re public to the various ports of Europe for the period of seven years, to date from the day on which such privilege is granted, the obligation of the Company to export 5000 horned cattle and 3000 sheep, of which mention has been already made, only to take effect dur ing the second year of the contract for it will be at once apparent to Y. E. that, at least, this period will be required for the construction of the proper vessels, and for establishing the traffic on a firm footing, in order to export as large a number as may be possible to the Company beyond that already named.

2nd. A complete exoneration from all export, port, or other duties on the cattle exported by said Company during the period of seven years of the

In order to satisfy your Excellency that this Company desires to found itself wholly in accordance with the entire convenience of both parties, I would beg to propose, supposing that the granting of the privilege should by any means be an obstacle to the realisation of the contract, that the Argentine Govefnment should retain the right of withdrawing the 'concession' at the end of four years, from the date of the grant, by paying a percentage upon the paid-up capital employed in the Argentine Republic.

On the completion of the seventh year of the Association, the Committee has now to present you the usual half yearly statement of the position of the Society, which, while shewing a decrease in the amount of the funds, as will be seen by comparing the present balance-sheet with that of the 29th of February last, comprises two more shareholders, and considering that no less than eleven members have retired since that period, will prove to you that your Committee has had its best efforts to enrol new shareholders, most of whom have been obtained by the new Treasurer, Mr. Dominick, who was appointed on the resignation of Mr. Smith.

Your Committee is most happy to say that of the present number but one has signified his intention of withdrawing, and the incoming Committee, which it will be your duty to elect this evening, will find the list increased by three new members representing tainly entitled to explanations. twelve shares, in addition to which thirteen shares have been attested to some of the old members.

The value of Mineral Waters has been prized and acknowledged by Medical Men since the carliest civilisation. A celebrated authority says:—"The virtues of Mineral Waters have been best shown in the treatment of obscure and chronic diseases. In many instances persons have been restored to health, or greatly relieved by, Mineral Waters, where other remedies have failed. The reason, no doubt, is that such Waters must contain compounds not yet known to Chemistry or The reputation of this Water is based upon its effects in Diseases of the Stomach, Liver, Bowels, Kidnoys, and Spleen, and acts with wonderful benefit in cases of Chronic Dyspepsia, Constipation, Gravel, Gout, Scrofula, Cutaneous Affections, General Lethargy, Soreness, and Prostration of the System.
