At a moment like the present when trade is depressed and the great export of the country, wool, without almost a price, the monthly statement of the Government Bank comes particularly opportune-it teaches us the exact financial state of the market, and guides us through the embarrassed maze of trade. These advantages have not hitherto been en-

It being highly important to Farmers, to grow as many different Seeds as possible, the Horsebean, Haba gruesa (Vicia Faba) can be justly recommended.

The Seed offered for sale is grown in this country, therefore being acclimatised. Experience has shown that Horsebeans grow best on the marshy soil, in the vicinity of large rivers, or the sea.

or the sea.

The advantages of this in all Europe so highly esteemed food for cattle, horses, or sheep, compared with Maize, are in every regard in favor of the Beans, which can be sown now up to the latter end of August. They do not suffer from the frost; they are sown in drills like Maize; one cuartillo will do for a square; they can be mown and thrashed by machines, and the straw is eaten with great avidity by horses, cattle, and sheep. The crop is decidedly a safer one than Maize,

because the Beans are not delicate in rain or dry weather, and in good seasons one bushel of seed will yield as much as 25 or 30 bushels of neans.

The time of crop is in the beginning of De-ember, to be mown when the shells are getting

brown spots. There can be no better crop for sowing wheat after.
The price of the best cleaned Seed is \$200

The price of the best cleaned Seed is \$200 mpc per fanega, weighing 240 lbs. Samples can be seen at Messrs. Clavpole, Brothers, Calle. Defensa, where orders willbe received; or also by applying to Mr. E. Oldendorff, Estancia Santa Maria, Donselaar Station, Southern Railway.
