STATE OF THINGS IN SANTA FE. It is really melancholy to contemplate the state of affairs in Santa Fe; first we have an industrious colony of Swiss immigrants obliged to rise 'en masse' for self preservation, against the lawless bandits of the Pampa.

The system of Government in Santa Fe is evidently less adapted for honest industrial agriculturists than for irresponsible outlaws, gaucho assassins, and bankrupt traders; and possibly the unfortunate colonists who left their native homes to settle in the wilds of Santa Fe, would have less to regret had his Excellency Governor Cabal been more candid in a profession of his principles.

the theory of such a Government is falsehood and mockery, the practice the vilest oppression. Governor Cabal by such an act has publicly declared his disapproval of the conduct of the colonists, notwithstanding that every right minded man in the Republic thinks that under the circumstances they did perfectly right.

With pleasure we turn from the acts of this Governor of Santa Fe, to scrutinize the conduct of the National Government. The moment the news reached Buenos Ayres by telegraph President Sarmiento at once despatched orders to Colonel Jobson, the Commander of the National troops, to march to the colonists whose cause he sees emphatically ordered to espouse.

If we are to place trust in the information we have received, Governor Cabal has by his conduct in this matter not only proved himself his own enemy, but we may go still further and add the enemy of his friends. His animosity to the 'gringos,' as the Republic terms it, we suppose springs from his friendship for the 'gaucho'; but he has acted his part as an upright and honest man, and in the name of the foreign community in the River Plate, we thank him.

We must be freed from the thraldom of these vagabonds, or the future of this Republic is a dull blank; let us talk no more of immigration or colonies until the murderers of the Lefebre family are shot in the public square of Rosario. A public example must be made of these wretches who for a bottle of caña or a pound of yerba will break into a poor colonist's house and barbarously murder the inmates.

My friend Joseph Rastelini was stabbed in his own house in the village of San José (Santa Fe) by the son of the late Anacleto Alvarez, and on being conveyed to the Hotel de Las Naciones in this town, he was attended by Dr. Pojato, under whose care he has, thank God, recovered. He laid his complaint before Governor Cabal, who promised to see justice done him, but the scoundrel Alvarez was not, I believe, even summoned, for Major Nazario Ocampo stated that my friend had stabbed himself!

Since then there has been dreadful work at the San Carlos colony, and the colonists avenged themselves by shooting Denis. Yesterday seven of the colonists were brought in prisoners, including the esteemed Mr. James Denner who are, it appears to undergo the penalty of the law for seeking to defend themselves. It is time the foreign residents should look to their countrymen and take measures for their safety.

From a letter in the 'Capital' of Rosario of 23rd, sent to us by our correspondent it appears that Denis, was aided in his attack on the French family at the colony at San Carlos by certain bandits, named Alarcon, and who he has not the slightest doubt are the gauchos of that name who murdered Mr. Marshall in May 1865. These Alarcons were sentenced to 12 years so-called 'hard labour' in gaol in Santa Fe. Only four months back the principal assassin of Mr. Marshall, was found by Consul Hutchinson, to be in gaol at Rosario on account of horse stealing at San Lorenzo. Through our Consul's attention, the fellow was again sent back to Santa Fe in irons. And here we find him now in a party of cut-throats, murdering a whole family. Our correspondent suggests that a little of the educational furor might be modified to considering a remedy for this state of things. It can scarcely be said to be hoped for in Colleges, Normal schools, and Universities.

One of the Colonists (it is not yet known of what nationality) arrived near Coronda on Friday last, pursued by two soldiers. They overtook him, and called on him to surrender. This he refused, and being unable to escape further, took a pistol out of his pocket and shot himself. We should like to know why this colonist was pursued. Denis was not an Indian, he was of negro extraction; and we are told by a friend of ours, who saw him in 1863, a most villainous looking fellow. He was 'capataz' of the civilized Indian colony of Sauce, on the road between San Carlos and Cordoba. A colony of Indians left to the administration of such a man appears to us a decided mistake.

ARRIVAL OF THE MAGELLAN. TREATY WITH THE ARAUCANIAN INDIANS.

EARTHQUAKE PANIC AT LIMA. Valparaiso, Oct. 11th

The Araucanian question has entered upon a new, but not altogether unexpected phase, the basis of a treaty of peace having been adjusted between the representative of the Government and the Indians. The principal clauses of the treaty presented by the Indians are as follows:—

1. We oblige ourselves to deliver up immediately all the captives that exist in our territory, and also all the thieves and bandits hiding in it; being moreover, responsible for all the Spaniards (Chilians) that may come among us under any pretext whatever, without a passport from the Intendente of this province.

2. As a proof of our submission to the laws of the Republic, and respectful obedience to the constituted authorities, we deprive ourselves of our lances, which we will deliver, together with the rest of the arms in our possession.

3. Indians that may commit any crime shall be immediately placed at the disposal of the competent authorities.

4. We will respect, and cause to be respected, the actual line of the Malleco, and all the rest of the forts and towns that the Government may desire to establish in such parts of our territory as it may deem convenient.

5. We oblige ourselves not to dispose in any way, mortgage, nor pledge to any private individuals the land belonging to us, which we will sell to the Government exclusively; and

6. We exact, as an indispensable condition of peace, the foundation, in the territory, of missions that may carry to us the consolations of religion.

Colonel Don José Timoteo Gonzalez, on behalf of the Government, offered the following terms:—

1. The Government shall appoint Justices of Peace to decide the questions that may arise among us, and will be duly respected.

2. The Government shall take charge of the education of our families, we each one, obliging ourselves to deliver up immediately two of our sons, to be held as a guarantee of our fidelity.

3. The assaults, robberies, and other crimes committed by the Indians of the rebel tribes, shall be forgotten for ever.

4. The properties, families, and cattle actually possessed by the Indians, shall be secured to them.

5. Any individual menacing the lives or properties of the Indians shall be severely punished.

Before signing it was agreed to modify the second clause, reserving to the caciques the use of swords and a certain number of lances, for the defence of the properties they possess, obliging themselves to deliver up their arms of all kinds, as soon as the 'abajinos' are obliged to do the same thing.

There now seems to be some probability that peace will be secured to Arauco for some time to come.

The 'Revista del Sur,' of Taena, contains the following story: "It has been rumoured, though we are ignorant of its origin, that Mr. Falb had arrived at Taena by the last steamer, and that, although he travelled 'incognito,' his identity was discovered and a note taken of his appearance. He was tall and thin, had an aquiline nose, heavy eyebrows, which were of a red colour, and was also his hair, blue eyes, and possessed a noble bearing; he was dressed in a topcoat with pockets, loose trousers, and broad-brimmed hat. The effect of this news among a certain class may be imagined; but fortunately it was not long before it became known that he on whom was bestowed the name of the wise German, who had come to be a personal witness of the cataclysm, was nothing more than an honest Dutchman, who was merely desirous of disposing of a quantity of cheese and other goods."

A slight shock of earthquake was felt on the 8th inst., about 3-10 a.m.

The 'Independiente' says:—Very cleverly made counterfeit two dollar gold coins are circulating in our market. These coins, which have been recently assayed in the Mint at the request of the authorities of Talca, in which city they are being circulated in profusion, are some of them of a yellow, and others of a copper color, both differing from the genuine coin in the smaller quantity of gold they contain. The assay of the former gave 0.462 of gold, and of the second 0.689; consequently the yellow colored coins contain 0.438 less gold than the genuine, and the copper-colored 0.211 less. So that the coiners have made a profit of forty per cent. in each coin, which is the value of the gold deficient in the counterfeit. These are distinguishable from the genuine coins by the lettering, which is very badly executed, the milling, nevertheless, is a very correct imitation. All the counterfeiters bear the date of 1853, and never profane the action of aquafortis or other acid.

It is rumored that the company recently formed here for the purpose of erecting a new theatre, has made a

proposal to the Corporation, for the purchase of the site occupied by the gaol in the Plaza de Armas.

Lima, September 27, 1869.

The emigration of families from this city and the port of Callao increases, rather than diminishes, as the much dreaded 30th inst. draws nearer and nearer. I fully believe that by tomorrow evening all those persons, who possess the means for so doing, will have translated themselves to Magdalena or Bella-vista. The slightest agitation of the sea or tremor of the ground will be quite sufficient to cause a panic, for I believe there never was an instance in which the inhabitants of any city were so thoroughly awed and terror-stricken on the belief in an impending danger, as are those of this city and Callao. Those of the inhabitants who are compelled to remain in the city, pass the greater part of their time in the churches, and in appealing to some favorite saint for protection. An unusually large number of sinister looking individuals are to be seen lurking about in public parts of the city, evidently waiting for an opportunity for waging war against life and property, should an eruption of the sea or an earthquake take place. Measures, however, have been taken to keep the wretches in check.

Business of all kinds is almost completely paralyzed, not only on account of the false predictions, but also on account of the rumours, so persistently insisted upon, that the public peace will shortly be disturbed. General Bustamante, and a printer named Morone, have been lodged in gaol on a charge of circulating 'plisquiuades' throughout the city. I am informed, upon very good authority, that several other arrests of suspected persons will shortly be made, and I fully expect that a few months, or perhaps weeks hence, a perfect reign of terror will be inaugurated, because the Balta has expressed his determination to battle to the last with any attempt that may be made to overthrow him; whether he will keep his word or not remains to be seen.

The captains of several vessels lying at Callao have solicited and obtained permission to go to sea for fifteen days in order to escape the impending catastrophe.

The Dreyfus loan continues to be one of the chief topics of the day. The pleadings before the Supreme Court have been concluded. The Supreme Court should decide that it is competent to try the matter, it will then proceed to try the question of the validity of the contract entered into by the Government and Messrs. Dreyfus, Bros. The decision of the Court in this matter will be of transcendental consequences, and it is impossible to over estimate the very grave nature of this business.

The Government has called for tenders for supplying the port of Payta with water.

The composers of the Government and private printing offices have struck for an advance of wages; an agent has left for Valparaiso for the purpose of contracting for about a hundred workmen.

The Government has declined to accept the tender of Mr. Jean Lagrole to import during ten years, a certain number of Africans, for the purpose of hiring them out to estate owners on an eight year contract.

The sale of liquor has been prohibited at the Guanape islands, a step that had become very necessary on account of the continued rous caused by drunken peons.—West Coast Mail.

IMPORTANT FROM RIO DE JANEIRO. MINISTERIAL CRISIS.

I sent you in my last the full particulars of the loss of the Royal Standard, one of the most terrible shipwrecks that has occurred in these waters for some time.

The account which the 'Standard' published of the 5th of October alarm caused the most intense excitement here. For some time there was positively nothing else spoken of amongst English people. At Bennett's, of Tijuca, there was quite an explosion, and in fact, you may congratulate yourself that you got away before the paper arrived, for Messrs Holden, Holcombe and Norton were determined to challenge you. Bennett's is crowded. I ran out there the other day, and found every one above and below reading the 'Standard,' which is now looked for greatly by the English population.

Weaver, your agent, says that he cannot get up from Buenos Ayres sufficient copies for his public; he is known through town as 'Standard' Weaver, just the same as Norton is known now as Gavis Norton.

Perhaps the most interesting feature of news is the departure of Mr. Lennox Hunt, British Consul of Rio. His things were all sold off by auction before his departure. The horses were the only chattels of any worth on the premises. It is really extraordinary how simply Consuls live. People who saw the Consul driving through town imagined that at his auction the finest furniture in Brazil would be brought to the hammer—nothing of the kind: the 'penates' were unpretensions, and sold for a mere song. Sovereigns notwithstanding all the pushing will not go to 130,000. The speculation in gold continues, and I never saw the brokers so busy as at present; Nathan is the master of the situation, you see him flying about the Exchange and Rua Direita just as if all the gold of the bank of England was at his orders for sale. Mr. Denby,

who is now his partner, is equally active, and judging from his appearance, he must have lost considerably in weight since he commenced as broker. I send you herewith Mr. Scully's paper; the prospects of his party getting into power are each day more remote; you will glean from its columns the full particulars of the Ministerial crisis. Mr. Paranhos is shortly expected from Paraguay, and he, and the Baron, will be more than a match for Octaviano and Sinimbu. As for the war it is generally believed here that you have got all the news down there, and will not send it up; we can find out nothing about Lopez; some people believe that Lopez is dead these six months, and that as the allies were not invited to his funeral, they of course know nothing about it. Army bills have at last come up with a vengeance, over two thousand five hundred cobitos, but that is nothing, plenty of money and credit here; so long as the Argentines do not come up to make a loan we are all right. Paunero published in the papers the flattest denial of any attempt to make a loan in this market; it appears that some months ago a certain house here offered to the General to make an Argentine loan, but the house has since failed, and the loan is of course in 'nubibus.'

Sr. Sinimbu, who is one of the most distinguished public men in Brazil, has been making a great noise in the Chambers about the Cochran claims. It would seem from the replies of the Ministers, that there is some chance of the claim being at last recognized. Dr. Cochran is, of course, in great spirits. I saw him the other day, and he was surprised that in your graphic letters about Tijuca you did not describe the beautiful residence of the Doctor, in the valley, with the lovely artificial lake, boat-house, and the great Walker peak. I am told that you were there one day with Mr. and Mrs. Dufield, Mr. Drysdale, and others. Now, don't omit to describe the Doctor's chateau, for people here want to read it.

I have now too much on hand to be able to give you all the English chit-chat going on here. Last week there was rather a romantic affair, in which one of your subscribers is mixed up; but I am so nervous lest the name of your correspondent should be discovered, that I prefer to say nothing about this affair, until my next. The weather is getting roasting hot, and it seems that we are in for a fierce summer. The Emperor, I hear, is determined to spend the summer at Petropolis, which will, of course, cause the political and diplomatic swallows to fly thither. Publish in your next number that the passport nuisance is at last abolished; people can come and go without passports—now, this is an excellent step.

It has been very currently rumored here that General Urquiza, the President of Entre Rios, died suddenly at his residence on the 2nd inst. Some of the papers here have long obituary articles on this celebrated man. I should not be surprised to hear, however, that the General is alive and kicking; Mr. Nathan and others discredited the news. The debate on the budget it seems will never come to an end; the Opposition keep up the discussion, and it really seems as if the Chambers will be closed before the budget is voted. We are all anxiously looking out for Chiarini and Kato Holloway. The circus, made of American pine, is all ready in the Campo Santana. We only want the horses now, and the acrobats; they are expected here in the Arno.

The Duncan and Phails tramway is pushing ahead, and will soon be open to the public. There is apparently some hitch about a small piece of property on the road, which causes much delay; but Phails is not the man to allow much grass to grow under his feet. The tramway must go ahead, and soon, I have no doubt, the public will be able to ride out in the cars to San Cristobal and Andaraby. This will be a great convenience for parties stopping at Tijuca. Billiard playing is still the order of the day at Bennett's Rock, and Holman still rules the table.

Exchange is still about the same at 10 1/2 to 10 3/4, and a good deal done at 19 Sovereigns and jerked beef are expected up from the Plate. The beef sells well, but the sovereigns must go on to England. We want no more gold here until the Prince returns.

CORCOVADO. MONTEVIDEO. ANOTHER GOVERNMENT MANIFESTO. EXPECTED INVASION FROM B. AYRES.

Monday. On Saturday evening the Government issued the following manifesto:— WHEREAS—By Art. 79 of the Constitution the President of the Republic is bound to maintain order and tranquillity, and whereas the newspapers publish daily the most subversive doctrines, urging the people to disobedience and falsely accusing the Government of tyrannical acts, it is plain that all this tends to provoke rebellion and civil war, which constitutes an offence of the greatest magnitude. Moreover, the fact of its being a violation of the press does not exempt the offender from the jurisdiction of the ordinary tribunals and the punishment which must ensue. And whereas the trial by jury would amount to impunity, while the newspapers might still continue to defame the authorities and thus provoke disorder and bloodshed, the Government of the Republic cannot look on tamely unless it consents to abdicate its most sacred duties and

obligations. For these considerations the Government directs the Chief of Police to summon all the editors of papers in this city and notify them of this resolution, adding that the Government is determined to adopt every measure calculated to preserve order, that it will on no account tolerate seditious writings, although the editors shall be at liberty fairly to criticize the acts of the administration within the limits of the law and Constitution.

BATLLE. José C. Bustamante Adolfo Rodriguez José M. de Nava.

The only arrest made yesterday was D. Bernabé Rivera; who is lodged in the Policia. The Siglo thinks the Government will hardly arrest any more on the charge of conspiracy. A rumor is current that Col. Rebollo has resigned the War Department. Telegrams to-day brought news from B. Ayres of an expedition getting up at the Tigre, and that President Sarmiento had sent a steamer with 60 infantry to seize the conspirators. The Rio Uruguay has been detained this evening to take up men to Paysandú.

The telegrams in this evening's Telegrama are as follow:— B. Ayres, Saturday 10 a.m. Fifty men of the 'Batallon Provincial' have just embarked on the steam tender of the Capitania, bound for the islands of the Tigre, where some filibusters are said to be preparing an invasion of the Banda Oriental. If found they are to be brought prisoners.

Sunday, 1. 30 p.m. The little steamer Bebe has just left, with 5 officers and 45 men, besides 10 marines, under command of Major Ximeno and Captain Castillo, with special orders for the Tigre.

Sunday, 3 p.m. 60 infantry and 10 marines have been sent up to seize the Oriental refugees at the Tigre.

Monday, 3 p.m. The expedition has not returned from the Tigre. It is feared the refugees are plotting an invasion of the Banda Oriental.

The Magellan arrived yesterday from Valparaiso with 38 passengers, en route for England; her dates are to the 13th inst. She brings news of the loss of the ship Grassendale off Cape Horn, bound from Sunderland to San Francisco with coal; her crew, 30 hands, were all saved.

Much alarm has been caused among the shopkeepers by the rumor that several of the Mauá notes, officially burnt on Friday were not burned, but merely had the edges singed. Some little boys picked up these notes and are selling them at moderate prices. The Bolsa committee have published a notification that these notes can be distinguished by having the edges burnt, and are of course valueless.

The 'Tribuna' publishes a rumor that 'El Mercantil' will shortly suspend publication, probably owing to the political crisis.

Mr. Baukart has returned from Salto; perhaps he means to proceed to Cuiabápiro overland.

The shareholders of the Italian Bank had a meeting to-day, the result of which is not yet known.

The 'Telegrafo' publishes the following nautical intelligence. On the West Coast of Patagonia, 50.47 S. and 75.45 W. an island has been discovered about 10ft. high and 200 long. On the coast of Peru the roadstead of Malabrigo has been surveyed and sounded by H. M. S. Reindeer, the greatest depth being 12 feet. About 1/2 mile from shore is an island called Roca Garcia, 12 feet above water.

We have intelligence of the loss of the English ship Cape Horn, on Sept. 9th, a few miles from Pichidargui on the Chilean coast, which port she had left same day for Liverpool, with a cargo of copper and wheat. The disaster was caused by her running on a bank and springing a leak.

EDITOR'S TABLE.

The Arno leaves to-day for Southampton with the English and general European mails. She takes £30,000 in specie.

The Magellan left Montevideo yesterday morning for Liverpool; she has an average number of passengers from the West Coast and the River Plate.

The burning of the over issue in the hands of the Fiscal Bank Commission in Montevideo which took place on Saturday last, was conducted so carelessly that many of the notes were only half destroyed, and were taken possession of by the peons and other idlers present. They have since been put in circulation, and an official notice has been issued warning the Montevidean public of the fact. This is not the first time that the people of Montevideo have had to complain of the carelessness of the Commission in this respect, and the possibility of such an occurrence must add greatly to the want of confidence so widely prevailing in respect to the monetary position of the sister Republic.

Intelligence from the seat of war is to the 14th inst. The Argentines had arrived at San Estanislau, Lopez's late head quarters, on that day. The Paraguayan leader had withdrawn about seven or eight leagues further inland, with about three thousand men or rather boys (the majority of the lads enrolled it is not over ten

years of age) and a few pieces of artillery. Before evacuating San Estanislau Lopez ordered three hundred men to be executed, amongst them, it is said, was General Caballero. Some of the most experienced officers believe that it will be impossible to follow Lopez any further, from the difficulty experienced in transporting supplies. For four days the troops had been without meat, and the field hospitals, are beginning to fill rapidly. Fever, dysentery, and the bites of poisonous insects, which prevent their wounds from healing, are the principal evils the men and officers suffer from. Colonel Olmedo's division (Argentine) had been ordered back to Asuncion by H. R. H. Comte D'Eu.

We have been favored with a copy of the 'Corriero del Pacifico' an Italian paper published in Lima. The editors claim credit for their paper being the only Italian one between Cape Horn and the Equator. Our contemporary 'La Nazione' should send a few copies to Lima by next mail.

Madame Ristori and her entire company left B. Ayres yesterday in the Rosario for Montevideo where she intends giving a series of performances for a fortnight. On the occasion of her farewell on Monday night the Argentine theatre was crowded in every part, and on the conclusion of the performance the gifted actress was escorted to her hotel by an immense concourse headed by a band of music. Preparations have been completed in Montevideo for giving Madame Ristori a triumphal reception on her arrival.

The 'Nacion' devotes a long leader to severe and somewhat unmeasured criticism of Dr. Sarsfield's Civil Code, which it declares to be not only mediocre but bad in essence and composition. The same paper dealing with the finance question, says that the holding over the issue of the loan of six millions lately sanctioned, on the pretence that it may not be required, is a standing menace to the stability of prices on the Stock Exchange, and that it must give rise to rash and excessive speculation.

The latest report on the sanitary state of the city is most satisfactory.—Reaumur's thermometer fluctuated between 7 and 16.7 during the past fortnight. These variations, though excessive, have favorably influenced the health of the population, which is in the most satisfactory state. The diseases most prevalent are coughs, cutaneous affections, and disorders of the digestive organs. We regret to say that a fatal case of Asiatic cholera is reported, but of so exceptional a character that there is no danger of the disease spreading. The authorities, however, should neglect no precautions that it may be in their power to take, as we are now on the eve of the hot weather.

The effective strength of the Argentine army in Paraguay is set down at 5,200 men of all arms.

A new burlesque, 'Fleur de The', was produced at the Alcazar on Monday night. Madlle. Douvry made her debut as a singer on the occasion, and was well received. The 'can-can' in the last act requires a little more spirit infused into it to make it tell. The scenery and dresses are magnificent, and perfectly in accordance with the traditions and customs of the Celestial Empire, in which region the plot is laid.

The news from Catamarca and Rioja is of a satisfactory character. Tranquillity prevails throughout both Provinces. Trade is reported as improving, and still further activity is expected. In Rioja the manufacture of wine is obtaining extensive development. In both Provinces the approaching elections are engrossing much of the public attention. There has been a heavy fall of rain in these Provinces since last advices, and communication with the adjoining centres was interrupted for some days.

Sr. Cubas, the popular Spanish actor, takes his benefit at the Colon Theatre on to-morrow evening. Mesdames Carrozzini and Siebs will appear on the occasion.

In making the new road from Cordoba to San Juan, it has been discovered that an extensive mineral tract lies in the direct route. An official despatch has been addressed to the President of the Republic by the authorities of Cordoba, asking for the co-operation of the National Government in determining the nature and value of the deposit. Specimens of the mineral have been forwarded to the Government, with a view to an analysis.

On Friday some important building lots, situate in Calle Las Artes, will be sold by auction by Mr. Billinghurst. This locality is a most healthy one and enjoyed impunity during the last ravages of the cholera. It is within easy distance of the Northern and Western Railways, and the new tramway will afford every facility for easy communication with the centre of the city.

Sr. Alfredo Halbach has been appointed agent for the American Exhibitors at the forthcoming Exhibition in Cordoba.

Dr. Navarro Viola has applied to the Superior Courts for penalties against the directors of the so-called School of Rational Instruction, for libel. The article complained of,
