PHOTO-DRAWINGS.

This new style of picture, introduced by Mr.
S. L. Reignolds, of London, makes the finest and most effective style of Portrait known at the present day. Their purity of colouring and delicacy of tone is such, that some of the first English artists have been unable to determine whether they are Photographs, or simply and purely Water Color Drawings. The process is poculiarly applicable to the reproduction and enlargement of Card Photographs, enabling the artist to introduce accessories and backgrounds, change dresses, or alter figures; and, in fact, to make a harmonious portrait, which will be a Picture' on which the eye rests with pleasure, as well as a faithful likeness.

THE REMBRANDT STYLE.

This is a recent American invention, and has created a 'furon' in the States which bids fair to revolutionise Photographic Portraiture. Its peculiarity is, that, it makes a Portrait stand out in bold relier from a black background, like a statue done in marble.
