THE ARGENTINE LOAN.

It is a coincidence worthy of note, that the first attempts at launching the corkscrew steamer, and the Argentine loan proved unsuccessful. Fulton Mendez failed because he put the screw where the keel ought to be, and the Loan Commissioner failed through having screws everywhere. When Mariano Varela received his powers to negotiate the famous thirty million loan he had too much wind on his stem to go very far on the ocean of finance. The bankers of London, Antwerp, and Frankfort-on-Maine threw out their baits wide and far. The President of the Republic and his ci-devant month; then Mr. Varela was booked in Brussels before he even set foot in London by a mob of demi-semi Argentine nabobs, who offered to take the whole loan right off on their own aclion of patacons to the Government above impeachment. without saying "oste or moste" to Don | It is impossible to study the modern

Argentines and othof the Commissioner at Brussels. Messrs. Bonum, Shavum and Co. had agents on the wharf watching every steamer that entered to see if the Argentine was on board.

The people on the London Stock Exchange, sharp fellows they are too. heard about the new loan and at once began to bear the old one. Argentine Bonds were sold short and long, on time and for eash, for account and on account, and in one week the fancy man in the financial world was "Dou Varela," and the fancy stock on zilians supported their candidates at in and around this town. 'Change " Argentine." Fellows that never heard of the Argentine Republic is some mighty under-current at work Excellency President Sarmiento visitbefore rushed off to George Street, 30 on the minds and passions of the peo- ed Mercedes on Sunday last. His Ex-Cornbill, and secured a River Plate Handbook. During that eventful period every financial man in London from Rothschild down studied sections A and B of the Handbook.

The book produced a favourable impression, and the anxiety of the London bankers to have a hand in the business was such that ' Don Varela' was besieged on all sides, even at his very hotel. Had the loan been launched right off on the arrival of the Commissioner in London, beyond all doubt it would have floated, but people forgot that 'Time hath a wallet at his back.' The speculation in the share market called up a very strong and influential party to defeat the new loan. "Too many cooks spoil the broth," and too many fingers in the loan business resulted in a complete flasco. The hour for launching arrived, everything was ready, Messrs. Cohen & Co. stood at hand to let slip the new financial bark 'the Varela Loan.' Offshe goes sink or swim, 88 is her mark, but unfortufull swoop she got snagged, and would not move an inch. Some said it was a hawser that Thompson, Bonar & Co. had thrown across the ways, others that one of her joists, called the Santa F6, got bilged in; however it was, the launching proved a flasco, and the unlucky hull had to be at once propped up on both sides to save her from keeling over. Had the vessel been launched in the regular way all agree she would have floated, but there was a deal of the ' corkscrew under the bottom' in the business; too many small screws were brought to bear on the To postpone the slavery question keel; the screws worked inversely, real draught was 84 or 85; she was e ppered and copper-fastened, yet her bottom gave in when tried in her element : she looked a noble craft on land, and if placed on wheels would run well on shore, but ber rigging was too heavy, her boilers too thin, her bows too sharp, and her horse-power excessive for her size: her defects were so apparent that they will be readily remedied, and she will soon be ready for sea again, drawing say 84 to 85, and with higher screw pressure and diminished horse-power. In criticising this loan business it is, however, right to remark that the negotiations effected here by the Finance Minister with the agent of the house of Messrs. Thempson, Bonar & Co., have greatly interfered with the free action of the to purchase from the Portuguese a Loan Commissioner, who, unaware treaty for the abolition of the trade, of such negotiations, was doing the the Brazilians ever showed a willing best he could with other bankers. Thompson, Bonar & Co., had certainly ment. a right to expect a preference, inasmuch as they had made such beavy concluded, France ceding Alsace advances to the government, and it is every way probable that before the loan is launched a proportion of the commission must be paid them. The only real drawback to Brazil which postponed the event. That a subject of such mighty import should move the people and even shake the nation, is only to be anticipated; in fact, were it otherwise, we should feel disposed to question the intelligence of the people or the freedom of their institutions. So far back as the year 1815 the Brazilians evinced a desire to abolish the slave trade; humanity and interest combine! to put a stop to that infamous' trade, which was so successfully carried on by the Portuguese, and which kept filling Brazil with negroes. Mr. McDonnell has also offered assistance to the pastors of our countrymen of all deno-

We are requested to call the attention of the Western Railway to the course adopted on the Southern line by Mr. Banfield of turning carriages and waggons into dwelling places for from Buenos Ayres, and returned this the poerer people leaving the city through fear of the epidemic. Such a course would greatly mitigate the present crisis. There are thousands of poor people sleeping in the open air and in all kinds of places, owing to the imbecile proceeding of the health authorities in turning sick and hale alike out of their houses without there being any accommodation whatever provided

A subscriber asks us to insert the tollowing remarks in this column :-"We are informed that the first train which leaves the Tigre Station at 6.20 a.m. will be suppressed on and after the 3rd prox." This being so, it in the least devinting from his path of will be undoubtedly necessary to have six first-class carriages and two second to accommodate the passengers up trains, as that by the first train balf this number is required, and as many more for the second train. This change in the time-table would be very good if we were free from the reigning epidemic-more so, as the change of the time-table should be made when, the traffic decreases, and not when, it increases. There are

many passengers that at present come in by the first train, who will be obliged to live in town, it not being possible for them to neglect their duties, until the second train, due at the Plaza 25 Mayo at 8.55 a.m., which frequently arrives about 10 minutes or more after time. Therefore, we call the attention of Mr. Crabtree with respect to the mentioned first train, which is absolutely necessary. We hope that we shall be attended to in the above observations." We would also call Mr. Crabtree's attention to anostreets are as gloomy, wet and muddy ther abuse which business men comas can well be imagined. We are now plain of greatly, viz., the frequent ankle-deep in mud; after excessive stoppage of the tramway by carts crossing it to and from the beach. The overtaxed horses are often brought to a stand still right across the line, and the tramway cars have to halt, sometimes for half an hour. We would suggest to Mr. Crabtree to have two stout horses harnessed at hand, in order to get the carts out of the way when such accidents occur. The police are at present so overwhelmed with having nothing particular to do that they cannot be expected to re-

> In another column will be found the advertisement of a new Anti-eptic just introduced from Sweden, the invention of Dr, Gahn, who has taken out a patent in Sweden and England, and is now procuring one from the Argentine Government. We learn that the invention has been recently sold for £5,000 sterling, and it will probably be applied towards the preservation of meat. Mr. L. L. Jones, who has it on sale, will be able to give full explanation as to its nature and the method of using it. It is also on sale at the European Library, Calle Florida, and a sample may be seen at this office. An instance of the scarcity of shelter

for the fugitives to the camp is afforded by the fact, of a large hay-dealer in Merlo having abandoned his legitimate business for the present, and having converted his 'galpon' into a temporary lodging-house, for which he receives \$7000 mic. per month.

It may be a source of satisfaction to those who adopt the axiom that,"there is a certain pleasure in the misfortunes of even your best friends," to hear that the fugitives from town now crowding the camp are awfully "hard up" for news. It is probably this speciel want that induces them to manufacture so many ridiculous reports, the latest of which is that the editors of the leading newspapers of the city intend to "cut and run" like the majority of their readers, taking type, compositors, and all the materials and editorial means to boot with them to some camp town. There is not a single newspaper editor in town dreaming of such a thing. We may add that the STANDARD intends 'standing-by at 118 San Martin under any and every circumstance.

We were glad to hear yesterday that some native families have returned to town. This is a good example, and will help to stem the plague-panic.

Letters from Valparaiso state that there has been an extraordinary movement of the earth observed lately in the Cordillera; in fact, an earthquake of some magnitude must have taken place, as the roads are cracked and their directions changed in various

A frightful outrage was perpetrated a few nights ago on a poor man living in Calle Paraguay, corner of Vernejo. Some Italians fired rockets at his rancho, and being afraid it would take fire he remonstrated with them. He was at once shot down, and stabbed while on the ground; his wife and child, who screamed for assistance, being treated in a similar manner. Every day we hear of robberies and outrages of all kinds committed in the city. The plague and unreasoning cowardice of the majority of the wealthy population in flying from it, has emboldened the criminal classes. In fact. the bonds of order are being loosened to such an extent, that some very vigorous action ou the part of the police is called for, Yet of what avail is it for the police to catch criminals it they are not punished?

Our correspondent 'Quevedo' sent usa communication yesterday respecting the valuable services rendered by especially to the writer and his family. The skill and energy of Dr. Ayer have been well known for a length of time to the public of this city, and we are happy to add the testimony of 'Quevedo to that of public report as to the unceasing services rendered to rich and poor alike by Dr. Ayer in the preent dreadful crisis,

Gentlemen, With surprize I have read in today's STANDARD a letter from Mercoday's STANDARD & letter from mercedes, the writer of which (without, apparently, baving read over, or thought over the matter sufficiently to warrant his writing about it) pronounces the Comision Popular to be, in common parlauce, a failure, declaring that it has done nothing, is doing nothing, and will do nothing, either to prevent the spread of the epidemic or alleviate the sufferings of those attacked by it.

Such an numerited attack as this upon the humane and talented gentlemen who compose the Commission, deserves the warmest censure from every intelligent member of the com-

Is it not enough that all the newspapers in the city acknowledge the great services rendered to the Republic by the Commission, the members of which go personally to the infected houses of the poorer classes (the greatest sufferers) and see for themselves, and satisfy with the greatest promptitude the great want of proper medicines and medical attendance; even, in some cases, the want of proper clothing for the sick is supplied.

Your Mercedes correspondent may ridicule the Commission, and sneer at its noble efforts, but I venture to assert that he would not remain in the city, much less assist the sick as the members of the Comision Popular (to whom all honor) have done and are doing.

Hoping you will find space for the above tew lines in the columns of your valuable paper, I remain, Your obedient servant,

NOTICE TO BRITISH SUBJECTS. HER BRITANNIC MAJESTY'S LEGATION.

Her Britannic Majesty's Charge d'Affaires being fully aware of the deep sympathy which will be felt by Her Majesty's Government and the British public for the sad ravages caused to the inhabitants of Buenos Ayres by the ruling epidemic, and the concern which thes flerings of British subjects will occasion to them, is desirous of at once conveying to his countrymen o all denominations, without distinct tion, as an evidence of that interest, the assurance of his readiness, in conjunction with H.M's, Consul, to render punction with El. II s. Country towards reliev. para vestir-e, I mea lavatorio, I toilet, I mea de caoba redonda, I maquina de coser, sillas, altheir official authority towards reliev. their official authority towards relieving all cases of distress of a deserving character which may be brought under their notice; and he hereby invites all those poor and afflicted persons who have been deprived of the means of M support to make personal application to Her Majesty's Legation or to the British Consulate, accompanying their applications with such recommendations as they are able to obtain from their respective clergymen or from any respectable resident.

ON CHANGE.

March 23, 1871 day, as, though 15,000 were noted on the board

at 64%, yet the sale actually took place on the preceding afternoon. Holders of Bonds are beginning to recover their confidence; prices will not decline much further. Exchange passed at 50 to 501d on London;

the usual drawers assert that this rate cannot be maintained. Montevidean bills passed at half per cent. premium; many drawers.

Discounte are still very difficult. Great hopes are placed on the action of Gover or Castro and the Legislature, on allowing an extraordinary issue of metallic notes; it is, perhaps, more the effeet than even the actual emission that is required to stop the monetary panic. The well-known case of the Bank of England, which, in a recent panic obtained permission to suspend specie payment, caused a return of confidence which rendered the permission unnecessary, and the panic turned from the moment that it was felt that any solvent firm would be assisted. There is here no necessity, and no desire to go the length of suspending specie payments, simply a relatively small increase in the circulating medium, and this boon can be obtained without the slightest risk of our present institutions.

It is a well known fact that the pressure is now chiefly confined to those importers who are compelled to provide for their endorsements to page res discounted.
