MEN AND MACHINERY FOR THE COAL-FIELDS.

THE NEW DREDGES AND RAILWAY.

(from our own correspondent.) Port Alegre, Jan. 10th.

The most notable event of last month has been the arrival of men and machinery for the working of the extensive coal mines of the Arroyo das Ratas, a short account of which I mean to give you. The coal was first of San Jeronimo, and was first experimented with in 1848. From these experiments the Government sent down reported the non-existence of coal, but that lignite abounded. So that the coal-mines were forgotten until the period of Counsellor Sinimbu's presidency, when your correspondent happened to meet Gen. Andrea, then arranging the limits between this country and Banda Oriental, and from a conversation with the General about the coal-fields the latter gave me a letter of

January 29th, 1871. To the Editors of the STANDARD,

Gentlemen, Having suffered in common with many others in the camp from the irregular delivery of letters from home I have availed myself of my stay in town to make some enquiries in the matter, fully convinced that the English arrived and ignorant can show the name of democracy authorities who have clearly shewn me that all this trouble and annoyance might be overcome by the esof Repeaters, who could swell their the two countries. As far as the camp is concerned I am convinced, nay know majorities to any desired naure.

Add to this the fact, that a large positively that such a treaty would part of the business men and probe a real boon. I therefore call upon

This class of diseases, so common in all parts of the world, and specially prevalent in malsipus districts and vicinage of water courses are almost invariably accompunied by more or less derangement of the liver, and frequently by a defective action of the digestive organs.

The mere breaking of the Chill is but a step towards completing a radical cure. The various organs of the body, especially the stomach and liver, must be brought to a healthy and vigorous condition before a permanent curs can be established, und this fact has been specially kept in view by Dr. Jayne in his treatment of these complaints. MOCKFORD'S SULPHUR CARBOLIC

An anti-poisonous preparation for

applying to Sheep. This preparation, of which the good effects are so well known and highly appreciated by the Shee-farmers in Australia, has been proved recently in this country with the most bene kild results, as will be seen by the following testimonial from the managerotone of the most important Establishments in this Province;—

"In October 1870, immediately after Shearing, I dipped all our rams, which, at the time, were in low condition and generally scabby. I so dipped in February 1871 all the pure French Flock, and found in both instances that the result was to my satisfaction.

The improvement in condition, particularly of Rams after dipping, was very marked.

I therefore do not hesitate to recommend this Dip to all Flock Masters.

It meets all the requirements of a thoroughly

Dip to all Flock Masters.

It meets all the requirements of a thoroughly good and efficacious Dip, and being entirely free from Mineral Poisons, does not injure the health of the animal nor the staple.

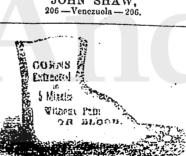

The simplicity of its proparation for use, in efficacy and its cheapness render it a most valuable acquisition te all Estancieros in this country, Estancia del Espartiilar, June 5th, 1871.
