Sundry schemes for a National Bank occupy the attention of Congress and ed to Mr. Polonini, one of the the public, and it is hard to predict whether this great enterprise will be brokers here, all the shares that were entrusted to European or Argentine capitalists. The River Plate General subscribed for and applications for millions seerling, the Government subscribing one-fourth. Many rich native capitalists are in this scheme. A London company, represented by Mr. Lloyd, proposes a bank with a capital of three millions. The business is in this city. It is believed the new Brazilian and Chilian colors. or a nature to induce capitalists to view it with favor, as banks have giv-

en splendid results in this country. The Government and Legislature of Buenos Ayres are busy with a plain of organizing the rural departments on a new footing, and providing a suitable police force et 2000 mounted vigilantes' and 500 foot constables, the former to afford some protection for lite and property and arrest ciminals in the camp, the fatter for keeping order in the little towns, all which brings the rate up 50%. to be under the control of a certain

number of Chie's of Police. As if to urge on the authorities the necessity of at once taking measures in this sense, a band of gaucho maranders has sufead terror in the northern districts during the past fortaight, robbing several escaucias, native and foreign, and in one case putting to death a 'pulpeto' and his son. Our legislators are now impressed with the sad reality of lawless violence in the camp districts; and, as a determined effort to restore order can in a great measure remedy the evil, it may be permitted us to nope that the banditti

will be strengously put down In every other respect the affairs 3 the country are in a most promising condition, and it would be afficult to find a more prosperous state o. tungs. The camps are covered with passure, the flocks fat, the estancieros growing rich, the value of farming stock and produce at a high figure. At the same time the Upper Provinces are tranquil —we hear no more of revolutions, our railways, telegraphs, and new enterprises on all sides. In Buenos Ayres we have to note a flattering rise in real estate, the prices now paid for build ing lots in towa being double what they were only a year ago, and every indication of a rapidly increasing pros perity, such as in the early days of Melbourne or San Francisco. trade returns show a development that people would hardly believe if they were not based on minute official data, the tonnage of our port last year show ing 1,700,000 tons. The new period of peace pernits us to celebrate the first step in this great work. The Santa Rosa railway is an established fact. The Di rectors in England advise us of 3,000 tons of material on the way, including two locomotives which bear the names Then His Excellency advancing into of Salto and Gomensoro. Hence you see the railway may be considered as good as made. Besides congratulate ng the Gomensoro Government on this step forward I offer, on behalf of the Directors, the warmest felicitations to the townspeople and local authoriies, and give you the toast "Prosperi-

Dr. Albistur, sub-editor of the Sigle said—Hardly five months have elapsed since the peace-convention was signed between Blancos and Colorados, and already railways are beginning to open | up the country. We have come five hundred miles from M.Video as precarsors of the new era of progress, to commence a work that was before impossible. Let us remember the sad esson of the past, with all its woes and when this lovely land of ours is and hatreds, and resolve that it shall nevercome again. The clock of Time has struck the hour of peace and re generation. Already a new current ruas through our yeins, a movement of prosperity is observable on all hands: let us second it. The splendid manifestacion of to-day, on occasion of the North-Western Railway, prepares a great future for Salto, by the resources of the department. The thanks of the country are due to all concerned, and I beg to unite in one toast the healths of the Engineers and the Directors.

It is to Saltenos. At midnight Capt. Morse the Press and our friends of Buenos had boats in readiness at the wharf, Ayres ("hip, hip, hurra," and calls for which took us safely on board. I may remark that the Company's represon tatives, Messrs. Human and Elliott, did not allow their guests to bear any expense at the hotel or elsewhere, and t is believed that the cost of the inaugaration amounts to £1,500 sterling. The guests were not only gratified at the attention they experienced from the moment of their embarkation till their return, but also expressed to Captain Morse their personal obliga-

The Municipality has just passed an excellent ordinance that has been long required in the city: it appoints a Chemical Analyst, at a salary of 6000 paper dollars monthly, to inspect all the food and medicines offered for sale in town. The new official will have two assistants, but it is doubtful whether even with their help-the work can be efficiently done. However, the move is one that meets with general approbation, and is one that meets with general approbation, ar it will be easy to increase the staff if required.

Immense is the discontent which is expressed by property holders at the stupendous valuation which the Government appraisers have placed upon city property: by a rather anusing incident the matter became known on the Bolsa the other day. It appears that Messrs. Bullrich and Company sold some city poperty last Phorsday at auction for the sum of \$10,000 dollars, which price was considered highly remumerative to the owner, who, to his product as to have the sum of the sum had been fearfully sacrificed, inasmuch as its official valuation was no less than 51,600,000.
Stumed with the intelligence, he at once historical to the auctioneer to acquaint him of the ruinous sale he had effected. Bullrich smiled, and assured his client that as for see? assured his client that as far as he was a judge off real estate, the place had realized its very outside value, and that there must be some mistake at the Government House. After much ado, we understand the valuation was altered. In the consideration of this matter it is right to observe that when the tax was raised four per mil., it was emphatically and strictly in relation to the then official value of real estate, and some of the first lawyers in this city are of opinion that the Government appraisers have no more right to disturb the valuation which existed at the period of the passing of the law than they have to double the tax and declare the contribucion directs for the present year to be 8 per mil. Property holders are the creditors of the Government for the extra tax of one per mil, which they paid last.

The following lots were sold assured his client that as far as he was a judge of real estate, the place had realized its very outside extra tax of one per mil, which they paid last year under the dolusion that the money would be employed for city improvements, for which purpose it was absolutely and awowedly collected; mayhap, Buenos Ayres will this year supply a Hampden to test the right of the Government in the matter.

The Platino Edizaliza Telegraph Company bot the land the 180 stimated at £303,00 , and the laying, stations and contingent expenses at £100,000, the whole cost being about £400,000 including the price of purchising the concession and adding 25 percent to the English price.

The Rhone cleared toolay with a fine cargo, It is doubtful, however, with the gets away or not owing to the weather. She took a mail. The mails from M ntevideo were up at the saul hour, but there was not ing of the French problem.

The meeting of the Rural Society, called for next Monday, will have one feature of interest for next Monday, will have one feature of interest for the mercantile community, inasmuch as the exportation of dirt will be the chief topic. Mr. Webster's patent, if successfully worked, will initiate a great reform by freeing the wool, which is our chief export, from the worthless carretills which for the last few years we have been shipping to the European markets in enormous quantity, and besides saving the country a very uscless expenditure it will improve our export and enhance its market value. A scheme fraught with such importance to the industrial interests of the country merits not only the attention of prowith such importance to the industrial interests of the country merits not only the attention of pro-ducers but the most liberal support from the Government, and now that the wool season is ap-proaching no better time could be selected for giving the process a fair-trial and testing its merits, we look, therefore, for a crowded attend-ance at the Rural Society next Monlay:

FRIDAY, AUGUST 30, 1872.

THE LONDON AND RIVER PLATE BANK.

Much annovance was caused vesthere was a run on the branch of the London Bank at Cordoba. The telegram was 65 hours old, being dated Aug. 26th, and this ought to have been enough to put the news in quarantine. Letters received by the mail to day state that a few days ago there was a slight run on the bank, but the bank paid out nobly to all comers, and the intrigues of a pack of would be oncessionaires were defeated.

There is really much room to cen sure the conduct of the Bolso direc tory in allowing such telegrams to be put up. Even a newspaper THE AGENCY for the Album Stamp has been removed from Rivadavia. No. 113, to SAN MARTIN, No. 76, where will be found every other class of Stamps for Banks, Commercial Houses, etc.

Still there is a loose screw somewhere, for a few months ago through the translated blunder of a Montevidean message this very same bank was made the object of a most injurious report from Montevideo.

Banks, "ke newspapers, have now and then stormy times of it, and as legitimately engaged in camp pursuits success often breeds envy it happens one way or the other shares in this A SQUARE LEAGUE and A-HALF of that the most useful institutions are prosperity. The branches more recently established at Rosario and Cordoba, alcharacter of the head-establishment, and the managers in those places held such a high social position as might be termed flattering in the extreme. Not long ago Mr. Todd was elected to the Municipality, and, if we rightly remember, the chair of President or Mayor of Cordoba was tendered to him, which he wisely declined.

The Bolsa telegram was as follows-Cordoba, 26th 5 p. m.

R. Navarro to the Nacion:-"Absurb and infamous rumour gainst the London Bank. "Great alarm, and a run on the

Bank. "The Government has published a ontradiction of the rumours.

"The Bank pays splendidly." At this distance it is difficult to as certain the precise circumstances, but we may mention that private telegrams from Cordoba, received on the 28th, say nothing of the matter, and it is passing strange that Mr Navarro's telegram took 65 hours in transmission. The gentleman named is editor

of a newspaper in Rosario. We telegraphed to Cordoba for news and received the following reply:-"Cordoba, Aug. 29,

- "Confidence completely restored.
- "Only lasted a few hours. " Merchants offered assistance.

"Answer-No assistance required.

" Cordoba.." This rather unpleasant affair has ended far more to injure the Bolsa than the River Plate Bank; and but that we feel convinced that the message in question was put up on the of, or authority from the manager or the Board, we should yield to the request of many merchants to comment upon the conversion of the news-board of the Bolsa into a channel for the publication of a malicious libel-

in the partido of Arrecifes. The facts. although not officially given, are a matter of public notoriety; almost every paper in the city has published them, but our colleagues stopped terday by a telegram rather hastily there. Even the owners of the estan posted in the Bolsa to the effect that cias in question have to the present re mained silent, and as forthe 'jueces de paz and 'alcaldes,' their silence in the matter can only be accounted for by the supposition that these excellent rustics thought the mauranders were

Indians. Accustomed as we all are to regard the country districts in the most unprotected state, a row in the camp has little treshness; yet there are few prepared to know that in broad day light, and on this side of the Arroyo del Medio, a band of gauchos could with im capitazes, within hail of a 'juzgado,' and under the very nose of the 'teniente.'

The sacking of Perez Millan's estancia is an event of immense significance to the government of Buenos Ayres. Had the onslaught been against an unprotected sheep farm, or a solitary puesto, there, perhaps, would be nothing unusual in the occurrence; but matter with an importance which it is equivalent to 94 per cent. in bonds, would be an error to overlook.

The state of camp aff irs is peculiar. The rise in the home market, the construction of railways, and the influx of capital have lent a prosperity to sheepfarmers, estancieros and land owners hitherto unknown. Everyone From the first opening of the Bank prosperity can effect, will elevate the ly since the present scorching season report a probability of war between except Boston.

Already many native estancieros have adopted this plan, which, in fact, as camp affairs stand at present, is the only safe one left. If the Indians had broken into Arre-
