The mortality returns in the Times of July 19th are much at variance with some fantastic figures in the morning papers, recently published; so far from Bombay being the healthiest city in the world, as our colleagues would have it, it shows 40 per cent. higher mortality than London or Paris...

Comparing these figures with our mortality, say 20 per cent, and putting down our population at 200,000 souls it gives 364 as the rate for B. Ayres, or nearly double the average mortality of London.

The last papers received from the Interior are as usual devoid of any news of striking interest. From the Upper Provinces the only news from Tucuman where a general lassitude prevails. The Chambers of that province are so done up with work, and the weather that "no quorum" is becoming chronic with them.

The Superior Tribunal of Justice up there has been obliged to issue an edict that has caused the whole city laughing at the "escribanos." It appears that the primary education of those wordies was atrociously neglected, and that they write such an "abominable fist" that there is not a judge in the province can decipher their scribbling.

The Court has decreed that they must write more legibly, but says nothing about sending them to school to learn how to do so. Canon Alvarez, the well known divine, and brother to the Governor, is seriously ill, and but slight hope is entertained of his recovery. Entre Rios the marauders about the camp are playing the deuce with the cattle owners, robbery and "carnearing" are going on in all directions, and the camp police are so few and badly organized that nothing can be done to check the monstrous abuses going on.

To-day is the anniversary of the founding of the Third French Republic. We hear of an intended "flare up" at Paysandu to celebrate the anniversary, but of nothing in the papers appeared in half-morning yesterday morning, in compliment to the memory of the late Dr. Urquiza. The most sincere regret is expressed amongst all nationalities in the city at the premature death of this distinguished judge.

The Constitutional Committee of the Provincial Chamber of Deputies has presented to that House another project for reforming the frontier service. We hope it won't fall through, like so many of its predecessors. The Frontier question is far more urgent than the National Bank question, yet inside or outside of the Government, houses no one seems to care a brass farthing about it.

The STANDARD cellar is as dry as a bone; and until the 70,000 ounces turn up we are too poor to replenish it. We mention this as some friends who called on us yesterday had to go away thirsty; so many future callers will be likely to require during their visit. We hope times will mend a little at the Court before the hot weather sets in. There is not even a devilled ham sandwich in the pantry.

All "patentes" on billiards, ball alleys and hackney carriages must be paid before the 15th inst, or the usual fine will be inflicted on the proprietors. The very latest project before the Municipality is one to form a limited joint stock company to look after the health of this city. What next? A joint stock association to relieve pious people from the task of saying their daily prayers. What is the Municipality for?

There was little general news yesterday from the sister city, but monetary and commercial affairs there are as brisk as could be desired. Mr. Pons is recovering from his wounds. Vice-Consul at Montevideo. The local papers inserted in the tramways and called on the Police to act vigorously in the matter. An outrage of this kind was perpetrated last week in one of the Union cars by a lot of young blackguards, the details of which cannot be published, yet the conductor did not interfere and the woman has no redress. Mr. Uccia who lately committed suicide left a letter stating that no one was responsible for his death but himself.
