THE B. AYRES, M.VIDEAN AND BRAZILIAN TELEGRAPH.

The vast importance of a speedy telegraphic communication in the daily business in Great Britain under the transfer of telegraphs to the Government even in the face of a cheap and regular postal communication bears evidence'that electrical speech through the wire is one of the necessaries of this age of advancement. The more distant from each other are the commercial centres the more valuable by eason of comparative annihilation of time and space does the communication become; and it has bence been

There are two classes of ecclesiastics

who are 'sent': the first and primary ones are Bishops, the successors of the Apostles, who govern certain tracts of country assigned to them by the church, and are subject to the Pope alone. Such I am not, nor so sent. The second and secondary class of those also duly 'sent' are priests, the successors in the ministry of the seven ty-two disciples. These are subject to Bishops with whom they cooperate, as far as Bishops think proper to employ them. They are 'sent' when the region and character of their duties are assigned them. Such am I, a priest on ly, and so sent. I have come from Rome with the blessing of the Holy Father, and having the honor to be furnished with high commendatory let ters to the Right Rev. the Bishop of Auton. His Lordship has received me most cordially, and has expedited my licences. Yet one would suppose from the manner in which Father Leahy's letter is couched that I had not been to Rome, had not been told in any way to come here, and that it was as it were doubtful whether I had been received or tolerated. In the foregoing report I have endeavoured to treat of all matters connected with the proposed railway, and I trust the information I now lay before you may be the means of promoting the speedy realisation of one of the most important undertakings of the age we live in.

An interoceanic railway connecting Buenos Ayres with Valparaiso, and opening a market to the vast mineral treasures of the Andes, would develop as if by magic the resources of the country and give to Buenos Ayres and increase of trade and prosperity unparalleled in history.

Mr. Pealer the contractor, and Mr. Moses Newman te hydraulist, were welcomed on Change to-day. Mr. Pealer comes to push on the Barraca road pavement, and Mr. Newman goes up on Tuesday to superintend the new meat preserving works at Bobicus.

The multiplicity of railway schemes now before the public is truly astonishing—hardly have we finished the Rio Cuarto Railway, when now a continuation of this line to Mercedes, 60 mile, is ordered by Congress. The luminous report by the Cumnitteea of the House on the Carril railway law we advert to in our editorial columns. It. law we advert to in our editorial columns. It is a document worthy of the House of Commons of England, and reveals the attentive study and or England, and reveals the attentive study and mature appreciations of the members, not merely as respects the various lines under consideration, but touching the grand and splendid future opening to this country. We are with the men who speak of five million inhabitants and 40 millions revenue. With peace, a free and liberal legislation, and a good economical government, that programme will in a very few years be realized. We hail this maeterly report as a good sign, as an evidence that public men have bounded from the narrow limits that have hemmed the nation in so long. Our public men are at last taking a comprehensive grasp of the situation, of what the country will soon be, if properly governed and blessed with peace.

GRAND OFFICIAL INAUGURATION,

SEPTEMBER 8th, 1872.

This New Establishment is of the first order, both in respect to the building, which is new, and of the most improved structure; as also the internal arrangements, which which will be found in every way faultless.

The 'Cnisine' is decidedly the best in Buenos Ayres. The House is furnished in regal style.

Single Rooms for Bachelors. Suites of Rooms for Families.

At the back is a large Garden, neatly planted with fruits and flowers, and inter-acted with "love lanes," all through lit with gas, and when illuminated at night the effect is very pretty.

THE ADMINISTRATION.
1.,209 14ps20 have had many years' experience. It is not a simple extract from one article, but is compound, ed of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue of power in caring the diseases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way as to retain, in as full strength, the spec al curstive virtue possessed by each. The root of the Sarsaparilla plants found in Hon-lurss, is that which we use in this preparation; it is the kind which all medical man esteem moss. About fifty per cent. of Bristol's Sarsagarilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleansing and healing veheable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.
