THEY NEVER REAPPEAR -Eruptive and decoptive maladies are banished for ever by Bristol's Sarsaparilla. They never re-appear by Bristoi's Sarsaparilla. They never re-appears either in their original shape or in a new form This is not the case when mercury or any other mineral agent is employed. Suppressed at one point, the disease crops out at another. In many cases it is transferred from the surface to the bones, or from the external fleshy fibre to the vital organs. The secondary symptoms which so often follow mercurial suppression, are as dapperous and as obstinate as the original disease. This great vegetable depurative does not drive back the disosder, or scatter its seeds through the system. It is an extirpator. When through the system. It is an extirpator. Whe work is done it is done thoroughly. cj-jy29

The brokers spoke of nothing to-day save th Provin ial Bank. It appears that at the board on Monday the applications for discount were large and many were refused. This led to immense inquiry as to the cause, but none was assigned. Mr. Marenco, the very popular discount clerk in the bank, was besieged by brokers to obtain some explanation; he, however, it seems could give none. We heard of one broker who had sent in a number of trade bills with some of the first signatures in the market, and had been refued: he took the bills to a private bank, and had them discounted at once at 61 per cent. Other bills were done in the open market Salling to-day at six per cent.
