Bristol's Sarsaparilla. Prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compounded of extracts from a number of Roots, Herbs, Bark, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their source in the blood and humors.

By having our own agents at the place where the various roots, drugs, herbs and plants, composing our medicines, are produced, we are enabled to exercise that constant care in selection which insures uniformity of excellence, and we spare no money or effort to procure the best—and only the best—of every article entering into their composition; and it is with the most abiding confidence we send, to all parts of all nations and all countries, that, in Bristol's Sarsaparilla you have a remedy so reliable that any before offered to you, and which will do no good, is a waste of your money.

As a means of building up the constitution that has been weakened by the excessive use of Mercury, Iron, or other Minerals, our Sarsaparilla will be found most excellent, and can be administered with safety to the weakest patients. As a purifier of the blood, and humor, in the Spring and early Summer, it will be found unfailing. It can be taken freely at seasons, rainy or dry. For some of the above diseases, the Sarsaparilla is especially fitted, and is a considerable time, especially for those that are hereditary or constitutional in their nature—such as Scrophulous, but a faithful compliance with the directions always given, will result in a cure, and in a great majority of cases will effect a complete cure. It will also be found, in all of the above diseases, that a cure will be brought about by using our Bristol's Sarsaparilla in moderate doses, in connection with the Sarsaparilla, they carry a large quantity of morbid or diseased matter out of the system by the Sarsaparilla, and in this way will facilitate the normal functional operations. —c— 46
