Di FEATED AT ALL POINTS.—Dysh puts may be defined as a disease pronounced unacenquerable by generalising theorists, but which Bristol's Sugar-conted Pills aiways conquer. Three organs are involved in the disease the stomach the liver. the cure is effected is simple. Three organs are involved in the discuss—the stomach, the liver, and the bowds. The pills act in three ways. They strengthen, cleaner, and regulate—imparting vigor to the digrative finctions, and reau larrity to all three. Their effect is the same in all cases, and they fire glapted to all constitutions and climates. > All the gentlemen present had their correspondence post paid, and only required to be allowed to throw their letfors and papers into the receiver.

But "there was the rub"; there was uo box outside and the room had got so full within that it was found necessary to close the door to keep the crowd out. This served to increase the difficulty. For, as an excited crowd will gather round the point of attraction heedless of consequences, so on this occasion the people closed round the door preventing thus all egress or in gress. In vain people, called for order and that a space he cleared for the exit of those within. Had the bint been taken in time every one might have been served, as few had even to buy stamps, but in the hurry flurry of the moment everything but the door, the wretched door, was forgotten, and

so the precious time was lost. As one o'clock approached the crowd lost patience and seeing no chance of getting in first broke the windows and then tried their strength on the door. A shout from within brought down the pólice, who made postage stamps of a few; the sight was disagreeable as it was improper, and public opinion holds but poor sway where such things are tolerated by the rulers or the ruled.
