111-CALLE SAN MARTIN-111
12 New Patent R.R. Grease YELLOW GREASE

Manufactured and Patented by RICHARD GAMBLE.

Suitable only for this Climate and Not for Europe.

It is manufactured to suit Summor, Winter and Spring, and is only used for Railways, Tramways and Carts, Bullock Waggons, &c.

It consists of Nine different fluid oils and solidified by a chemical process. It will resist the hottest sun, and will not get into a liquid or fluid state. It is only when the action of the axles commences it becomes a rich creamy fluid, and when the action stops its again solidifies.

It is of a suitable consistency, of good lasting power, attended with but little increase of temperature even at the highest speeds, and leaves but the smallest residue in the axle boxes. A greense which is too firm will remain comparatively solid in the box, and allow the axle to become hot, whilst on the other hand one that is too thin becomes exhausted by a few mifes running.

This Gresse is of more importance than at firm sight appears; for while the grease account a railway companies forms no inconsiderable ited of expenditure, the waste of motive power and wear and tear of plant entailed by the use of unwinted process is corrected. suitable groese is enormous.
The morits of the Gresse, in its general utility

LUBRICANT,
and also for its
CHEAPNESS,
are shown, when compared with other kinds hitherto used, that are entirely useless for any pur
pose but that of lubrication.
It is therefore much less liable to be pilfered
and missuplied than tallow, lard, neatsfoot oil,
petro oil, rape oil or gallipole oil.
These oils always command a ready market if
pilfered, a circumstance which induced the principal railway companies in England to adopt
Yellow Grease for their protection and manufactured to suit European climate. LUBRICANT,

In the second place there is no offer of the necessary funds, nor has the Provincial Government promis-

ed any guarantee of interest on same. The mineral wealth of San Juan requires only an outlet by railway, to pecome a valuable staple of our exports; while imports by Uspallata from Chile, according to a statement in the Republica, amounted last year to 1767 mule-loads; and the trade in fat cattle from our provinces to the West Coast is still more considerable. From these thece sources of traffic (without counting passengers) there ought to be enough to pay half the amount of guarantee, leaving the Government obligation on a narrow-gauge line from B.
