Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compound. ed of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the discases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way is to retain, in so full strength, the special curative virtue possessed by each. The root of the Sarsaparilla plants found in Honduras, is that which we use in this found in Honduras, is that which we use in this preparation; it is the kind which all medical men esteem moss. About fitty per cent. of Bristol's Sursagarilla consists of the concentrated extract, the remainder, as above stated being Bristol's Sarsagerilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleansing and healing vehetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly overy other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.

preparations sold under the name of Galasparrilla.

By having our own agents at he places where the various roots, drugs, herbs and plants, composing our medicines, are produced, we are onabled to exercise that constant care in selection which insures uninformity of excellene, and we sparre no money and no effort to procure the best—and only the best—of every article entering into their composition; and it is with the most abiding confidence we say, to be sick of all nations and all countries, that, in Bristol's Sarrangerilla you have a remedy more reliable than any before offered to you, and which will no diappoint syou in the cure of.

BUDGET FOR 1874. The President's Message accompanying Minister Dominguez's proposed Budget for the in-coming year is suggestive of pleasant reflections. It is not yet five years since Mr. Sarmiento assumed office, and the revenue of the Republic has doubled. At the same time we note that the estimates of expenditure for 1874 are two millions less than the current year, and 51 millions less than 1872-

The report which we have before us recently presented to Congress, is drawn up in a lucid and comprehensive manner by Mr. Burton, who has published also a translation in English at his own expense. We may divide the report into a dozen paragraphs,

The first National Telegraph line was opened to the public on Sept. 10th 1870, from Rosario to Parana, 129 miles in length. In the following year this line was continued to Corrientes, Father Fahey, a Catholic Priest, he the information you possibly can restrict the information of the control brother's and a line of 822 miles opened from B. can find them for me and tell them to pecting my late lamented brother's Ayres to Tucuman. The uniform rate is 25 cents for 10 vords to any of the above places. When the service commenced, at a tariff of 11 hard dollars, the messages from Buenos Ayres never exceeded 25 phy and Harrington, spoke to the phy and Harrington, spoke to the daily, whereas now the clerks have often to work past midnight and send as many as 180 messages in a district to enquire into and report.

It was finally decided to leave the matter in the hands of Mr. acre. I will find four horses for the service of the flock; should emigrant to be more than one director in his district to enquire into and report.

There is no country in Europe which thereon: ises telegraph wires so much as we do n comparison with the Post-office Department. For example telegrams to etters appeared as follows-

The immense increase of business mperatively called for extra wires, and wo are now being placed on the Cordoba and Andine routes, besides an additional one from Rosario to Santa Fe; which Mr. Burton calculates will add 2,000\$ monthly to the receipts.

The interruption of the service in Entre Rios is a natural result of the re- this country some years since, as he bellion, but this is after all not so bad is happened in Spain, in 1869, when Mr. Jencken was beaten and almost killed by a mob at Lorca who supposed he killed children to use their fat in greasing telegraph wires:
