#### NEW ADVERTISEMENTS

WRY DOES THE APPETITE FAIL? why does the appetite fall?—because the organs of which the appetite is the durveyor do not duly perform their functions. When the food, instead of nourishing the body, becomes a source of pain and discomfort, the desire for it diminishes. A "cathar ic invigorant," in other words, a medicine that will remo e the crude results of indigestion from the bowels, and at the same time tone and regulate the liver, and truly prevent future obstructions of a like nature, is the only apputiser required. Now, this is exactly the operation of Bristol's Vegetable Sugar-coated Pills. They will put the digestive organs in a condition to consume any digestive organs in a condition to consume any ntity of food necessary to promote health.

NATIVE ENTERPRISES. THE MUTUAL GAS WORKS.

A scarcely less important enterprise than the Retiro Cloth Factory, of which we last week gave our readers full particulars is the Mutual Gas Company's establishment at the foot of Calle Defensa between the Boca and Barracas. The site is admirably chosen. On a low ground just at the outskirts of the town and in the heart of a dense, industrial population, stand the works, facing the General way, and running back half way to the sioners Lavalle, Olazabal and Lind- E. Riano difficulty.

Few who knew this place a dismal swamp some years age could recognise it to-day, so much has native enterprize done for the place. The fields have been drained and ditched to keep out the river, and new houses run up on all sides. The Gas Works, covering 70x200 yards, are already walled in, and offices and sheds built, costing in round numbers £6,500 sterling. The quantity of bricks employed is some thing astounding, there being nearly as many below as above the surface; for not alone was it found necessary to sink foundation very deep, but in many places the level of the yards had to be raised. For solidity of finish there are few works in the River Plate to compare with it. The whole front is taken up by the Company's offices and stores flanked on either side by the manager's quarters, and a large coal store 100x 30 , yards capable of holding 4,000 tons of coal. In the centre is the grand entrance, an arch which is to be surmounted by a clock shortly expected out from England.

The coal shed is divided into three compartments of 33x30 yards each. provided with an elevator or trimming machine. The engineer calculates the saving effected on manual labor at 6,000 hard dollars or say £1200 per annum. The retort house, about half the size

of the coal shed, stands in the centre of the yard. All the retort beds are fixed in native brick and cement, space being left for the chimney not yet begun. The end next the entrance is raised to 10 feet high, and presents a well finished appearance. The retorts are not yet ready, but when completed will be placed in 24 beds, of 8 in a bed, in all say 200 retorts of various sizes, capable of making 1,000,000 cubic feet of gas per day.

To the right is the engine and boiler above ground, with door - frames both the channel and tosca, in which

The next in order is the excavated in circumference and 12 deep. The tank is what is termed the 'scrubber-' This scrubber must be a monstrous affair, judging by the brickwork prepared to receive it.

The 'condenser,' the engineer informs us, will be placed in a tank fixed over the engine and boiler house.

The 'rimtrins' foundations are all fixed in very solid brickwork, ready to receive them on arrival from England. Columns of brickwork have been sunk near the rimfrins, to contain the iron colums for the purifying shed. The now before Congress may be said to purifying material will be partly of

to harmonise with the different qualities of soil and herbage in various districts of the camps.

The importance of this breed, with its everythmen qualities, is easily comprehended, through a reference to European markets, where the long, full, and bright siapled merino wools command the ready sale at the lightest prices, while the short wesk wools are a comparative drug.

The Rams offered for sale are 16 to 16 months old, with wool corresponding to that age. Also there will be included in the lot a few select two year old Rams, with ten months wool on.
