Respecting the flying rumors of cholers in l'osario, we hear on good aut! ority that the Oriental Consul, who died up there, did not die of cholera, but from an attack similar to that which rupture in the intestines caused by the improper use of fruit and overloading of the stomach.

The first telegram in town the morning was to the STANDARD, announcing 12 days' quarantine on the steamer that left here last night, the aturno, and a great probability of the port being cosed to-day. This caused an uneasy feeling, as later on the Bolsa received a message to the same import, which was put up on the board. People expected the Silex and Rio Grande up to-day; neit'er came, and in fact many people think now that soon we shall have no st-amers at all and be dependent on our old friend the 'Cooter,' as the European steamers will possibly all stop at Montevideo, so as to escape quarantine on the return voyage. At an early hour to-day there was a great ga-

thering at the Bolsa. Men came there to hear the news and talk that news over. When Iferne entered, people knew that he had a telegren in his b eeches' pocket, which, owing to a row with the Boisa, would not be put on the board. Room had nothing more than that the Saturno will probably come to-night rather than lie down there for 12 days. Rumours of course, were affoat, of further sickness in Ensenada, and some parties gave out that some of the quarantine police. men down there had died. That there is alarm in the city there is, of course, no denying; but most people consider that the reason is so favourable, such constant rains and delightful atmos phere, that epidemic disease here this summer is improbable. News to-day was received from Martin Garcia; not a single case of sickness on

the island. This shows well. Merch nts and others opine that the Municipality ought to be more circumspect about the fruit now selling in the market; much of it remains over for days and days in the stalls, when by right all this stile fruit should be swept away every night. Look to this, Mr. Bunge!

and some of her crew. In Montevideo they have news of five new steamers being on the stocks in England, for the French and Spanish trade with the Plate. The growth of our steam hipping trade with Southern Europe is something unprecedented. There was a good tir in the Montevidean pro

duce market before the leaving of the Eothen : some 50,000 arrs. of wool sold at 3.30-35, and a large lot of Americ n hides at 7.8 per 40 l a. We hear that there is an active wool shipping business now going on at Gualeguaychu, and some of the wool has arrived at Montevideo where it sold well and is now gone forward. It is really most unfair that people in Gualeguay-chu can ship whilst those in Gualeguay' are hermetically sealed up. We hop to see the Entre-Riano ports next week all declared open.

figure is given. 'aho B azilian Government has just granted another important concession to Baron Maus for the extension of the Mana Rai way to Petro polis, the Government giving a 7 per cent guar antee on 300,000 pats., the cost of the line.

It was announced on 'Change to-day that at meeting held in the Government House the Ensanada saladeros are to be stopped working This news of course gave firmness to other sale deristas who refused to-day what they would have taken yesterday; such is saladero business The sale of a cargo of hides is spoken of as concluded to-day at reserved rates.

It is estimated that now that the Entre-Riano war is over some 300,000 dry hides have to come down from that province. To-day in the South market a large lot of matadero hides were sent into deposit.

The sale of estancia land effected this week by that a coal company down there has contracted Halback and Veyra has attracted notice; 8,000 for delivery of 300 tons coal daily and wanting pa's per league for Santa Fe lands is a high hands has sent up orders to B. Ayres to engage figure. We hear of an estancia in Entre Rios now offering in this market at 4,000 pats. per league; a time there was when Entre-Riano estancia land was considered cheap at 10,000 pate. per league.

The fall in sheepskins as announced by Ric Grande telegrams is stiff enough-one senny, and has already operated on this market, not only as regards sheep kins, but wool also.

BULLRICH & CO.'S GREAT AUCTION

CALLE POTESI, No. 70

Open from Eight to Five every Day.

THE

GREATEST LAND AUCTION

Of the Year 1873

Will be held by BULLRICH & CO.,

On SUNDAY, the 21st of December,

At the Hotel, in front of the Great Southern Railway Station of

Of the fine, high Land, all completely surrounding the Station, which is judiciously divided into

Town Lots and Quintas.

Each Block is measured, mojoned, and the mojons numbered; so that you can see exactly what you buy, and where it is; and you can take possession of it at once on payment and on receipt of Title Deeds.

The spacious Plazas are enclosed. Land is cede ! for two Churches, Catholic and Protestant, and for Municipal buildings.

DONSELAAR is very little more than 10 leagues from Buenos Ayres, and eight from the PORT OF ENSENADA,

A Short Railway to join them has been solicited from the Government by Mr. Rigby, Civil Engineer, and Mr. Denne're.

Wheover looks at the maps that are being circulated, and which are to be had at Bullrich's Co.'s, Ca'le Potosi 70, must a see at a glance the grant fature in store for thems? I was of Donellar; that it is far but a situated far commercial purposes on the Southern line than even Merlo on the Wordern Ruitson; yet those who invested in lands surrounding the Marko Station a few years ago have made onless of money. Therefore, now at this first great auction of the place, is the time to go in for an investment in the New Town of Donselsar.

The Town Lots will be put up at only \$ 00 the yard front by 50 varis deep; even the lots near the Station and the Plazas, though THEY must be worth fron \$2,000 to \$3,000 the vara front.

The Quintes, which commence at only 500 yards from the Station, will be put up, to begin with, at a price so very moderate that it is beyond all cavil—only 4 reals, or half a paper dillar the square yard. At the same distance on the Western line, and only 500 yards from even the least important of its Stations, what would be the price of such land for Quintas?

These prices are so very moderate that whoever means to invest in well chosen Town and Quinta Sites should not, on any account, neglect the golden opportunity that will be aforded them by Bullich and Co. on Sunday, the 21-t December.

Train leaves Central Station, Pasco Julio, at 8.10, Cille Lima at 8.5, and Plaza Constitucion at 8.25.

CALL AT HIS OFFICE, POTOSI No. 70, between 10 a.m. and 5 p.m., for Free Tickets for Train and for a Feed fit for

Those who attend the Auction from any other Station on the Southern line will be paid their railway fare, on presenting

To prevent all false purchasing, each buyer will be called on to decosit \$200 on account of each Town Lot, and 10 per cent.

lication of great practical utility. One part consists of directions to trustees in the matter of investment, and these are very brief and clear, and embrace apparently every invortant point t ustees should attend to, stress being very priparly and on such matters as the strict limitation of their powers, and the uncessity of acting on legal advice in all important variations of investment. Mr. Cracroft states in h s preface that the whole of the part of the work ha been 'advised upon' by good lawyers, and it contains intrinsic evidence of extreme care having been used. The la ger part of the work consists of a 'Table of Se urities,' which possesses a value of a different kind. The securities, with a few exceptions, are those which are to be found in the official list of the Stock Exchange, and the information concerning them, including the variations in price for several years—in some cases six years—is stabulated in a convenient form for reference. The list necessarily contains a large quantity of securities in which the majority of trustees are restricted from investing, but the powers of trust deeds vary greatly, and the object has been to enable the taste to see at a glance what the history of each group of investments he may be permitted to select from has been, and he may thus obtain quicely a general knowledge of the class of investment before he makes any puricular selection under the guidance of his solicitor. A dictionary of this nature will be extremely useful to solicitors themselves, who have to be the advisers of trustees, and to whom therefore some learning in the matter of investments is practically serviceable. The compilation of this part of the work has also be n made with great care and accuracy.''—Keonomit

"Contains a useful summary, expressed in plain and tonciae language, of the effect of recent statutes, and many of the cases on the subject. The tables are most conveniently arranged, and cannot fail to prove useful to all investors.'—Solicitors Journal.

"Since Mr. James Van Sommers, S to the Managers of the London Stock Exchange, published his fine work on 'The Fluctuations of the Three per Cent. Consols,' members of the Stock Exchange do not appear to have given much attention to publication. Other professions have their literature and their manuals. Considering the extent and importance of the subjects involved on the Stock Exchange, the perary of works of reference in connection with investments is, to say the least, remarkable. The slipshed books one occasionally sees are, on the face of them, for the most part, the shallow production of mere outsiders, speaking without

production of mere outsiders, speaking without authority, and too often apparently designed to kidner the unwary.

"Mr. Craroft's receut publications form an exception to the rule. A member of the London Stock Exchange, and head of a large stock broking business, he seems to have broungt his literary training to bear on his experience as a stock-broker. We understand, moreover, that he has undert then to write the articles connected with the Stock Exchange for the forthcoming edition of the 'Encyclopedia Britamirea,' to be published by Moess Black and Co., of Edinburgh. His investment tracts, a series lately commenced, have been solid works rather than tracts. His Consols' Chart, the first edition of which appeared some years ago, being a tion of which appeared some years ago, being a practical history of the British Funds during the last eighty-three years, from the year of the great French Revolution, 1789 to 1873, has been rightly procounced to be a monument of labour, transp rancy, and originality of arrangement. The 'Tract on American Railways of Investments', within for this series by Mr. as Investments, written for this series by Mr. Robert Giffen, the well-known member of the Council of the Statistical Society of London,
