

we are informed that the civil war had not yet terminated, as Sr. Correa had not been defeated, but his troops dispersed, who subsequently re-assembled numbering about 400 men in the sierras, and Governor O'Mill had not sufficient force to expel them.

Colonel Fernandez had arrived as commissioner from the province of Santiago, but being extremely unpopular had retired without effecting any settlement.

Moldova.

The troops in this Province had received orders to retire to Bucnos Aires.

The Provincial government had committed a breach of trust to the national authorities. It seems that they were allowed to occupy the Custom House, but they presented an exorbitant account of \$10,000 for expenses incurred during the late expedition against the Oscheo, when they armed 500 militia men. They have accordingly kept all the custom now so proceeds in part present and not charged the balance.

THE LATEST FROM CHILE.

Splendid mining operations.

GREAT EXPORTS OF WHEAT.

NO MORE CIVIL WARS.

Savings banks, railways, and dry docks, terrible murders, swindlers, shocking deaths.

VALPARAISO, JULY 23, 1892.

No event any particular importance has occurred during the fortnight ending this day. The country is enjoying the blessings of peace and order, and looking forward with confidence to a future full of hope.

We were in the middle of one of the severest winters, we have had for many years. Our coast has been visited with a succession of gales and storms, interfering materially with our shipping and land communication. The rainy season has lasted long enough to swell all the rivers and render roads unfit for travel, making difficult and expensive the transport of merchandise and passengers.

The crops are not injured yet, we are in fact, not at all the weather conditions are rainy, or up to the present, it is most likely that a great deal of injury to our fields would naturally be the result.

The government has issued a circular forbidding the circulation of Bolivian dollars coined in 1890 and 1891. It was then ascertained at the Mint, that the stock of 1890 was wanting in weight 586 grams, and those of 1891 about 510 grams.

The news of the commencement of hostilities by the French troops against our sister republic of Mexico has caused a very lively feeling of sympathy in favor of the invaded nation. The societies called the "American Union" for promoting the welfare of all the republics of this continent, and repelling foreign invasion, or European intervention in whatever form it may happen, have taken the subject under mature consideration, and steps are being pushed towards having the President sent immediately a Chilean Representative, near the Mexican Capital.

Congress has continued paying due attention to the bill establishing a National Bank;

A plausible and successful step has been taken in the establishment of a Savings Bank at Valparaiso. On the evening of the 24th ultimo a meeting

of citizens and influential merchants was held with that purpose at the rooms of the Exchange. Several resolutions were passed accordingly. A board of chief directors was chosen of D. Agustín Edwards, Mr. George Lyons, D. Ricardo Escobar, and Mr. Juan Torres. Other directors were likewise appointed. The regulations for the management of this Bank were submitted and approved without delay. Several gentlemen spoke highly, on the occasion, of the benefits that institutions of this kind would calculate to bring to our country.

FOREIGN MISCELLANY.

The twenty-three pieces of china in the hall of the South Kensington Museum are valued at \$37,000. They are marked "M.P." and "P."—the initials of Henry IV. of France and Diana of Poitiers, and 23 pieces only were made.

The capture of two more English steamers—the *Cambria* and *Estrella*—by United States cruisers has caused much excitement at Liverpool, where both vessels are said to be largely insured.

Leon Lyons.—Lord Lyons, our able and zealous Minister at Washington, may be expected in London shortly. The American journals, no doubt, make many extraordinary surmises, and indulge in many strange statements respecting the motives of his lordship's journey at this moment. We believe, he has coming here, where his business, as he has not been in England since the death of the admiral, his father.—*Army and Navy Gazette.*

AMERICAN COTTON.—The Manchester market reports express the opinion that there have been no reliable accounts of the destruction of cotton to justify the belief that there will be a large amount of cotton to come forward whenever the circumstances will permit. The question when will it come to market is difficult to answer, under the most favorable circumstances. Everything seems to point at present to obstruction in the way of trade, however soon the ports may be opened to frequent serious fluctuations in price, and much doubt whether, except in cases of panic or undue depression, we shall for many years ever see a return to the average of ordinary years.

THE YALVERTON MARIKAK CASE.—The Yalverton marriage case turns up once more in the Scotch law reports. It appears that the "Melanie" in the Court Session at intervals for the last month and that it had been brought to issue by Mr. Yalverton. Mr. Yalverton seeks to be declared the wife of Major Yalverton, while the major's object is to put the lady to "perpetual silence" as regards this claim, and to have her answered in the sum of £250 of damages for advancing it? The printed papers relating the case fill a quarto volume of 418 pages, 112 of which are occupied with the correspondence which passed between the major and the lady during their courtship, and after the alleged Scotch and Irish marriages.

Correspondence.

To the Editor of the Standard,
North Parson, August 4th '92.
Dear Sir,
I was much rejoiced to see in your paper of 21st July the speech of his Excellency, the Earl of Kimberley, on the Young Governor of New South Wales, as well as the valuable paper of Mr. Perkins on the islands of the Pacific,—both having reference to the important subject of cotton-growing.

Your own observations likewise to the effect, that "Greater, far greater than the victory of Pavon would be the clearance of one thousand bales of cotton from this country to Europe." I trust, have effect on the thinking organs of the Argentine government.

I do not ask anything from the National Authorities here, or from the Lancashire capitalists. In *forma pauperis*. I know and feel the importance of our family fibre to the whole human race, in a civilizing as well as a commercial point of view, and I therefore claim to be heard.

For many years I have been a native of this province of Santa Fe. It matters not whether my ancestors were indigenous to this continent or if they emigrated here with the Jesuits or the earlier Spanish settlers. Because I think it is of much more practical utility to know that a gentleman from Paraguay in 1841, says it was customary for the people of that republic to send loads to Cordoba in our province for the reason given above, in order to make the finer qualities of their lace, for which the home-grown fibre was not sufficiently good.

I should like the Lancashire explanation—before whom I see by the Manchester Cotton Supply Reporter, Mr. Perkins letter has been laid,—would enquire into the truth of what one of my relations says, namely, that the cost of land and cotton cultivation, in the cotton growing states, is not on the banks of the Plata, Uruguay, Paraná and Paraguay, than it has ever been in the United States.

With this comes the assurance of a gentleman in Liverpool, a knowing chat at judging of cotton fibre,—that the quality of the article produced here, even without cultivation, surpasses that of the Mississippi river; thereby affording evidence of the suitability of soil and climate to its production.

Could you manage to have these things re-referred in the *Sats* of the Manchester cotton supply Association?

If you have space for the speech of Mr. D. C. Cain at Sydney—where Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M. G. of C. can calculate 2,500 lbs. of picked cotton to 5 acres of land, or in fact 500 lbs. per acre. I observe likewise Sir John Young spoke,—I think you will find it contains a deal of useful matter, I send you a copy of it herewith. You may say by it,—instead of the calculation which you make, (according to your *Sats* correspondent H. G. L.) of 250 lbs. per acre,—how M.
