"THE FAIR AUDITOR, THE FAIR WORN  
ADAM CROWN" (Clerk)

TUESDAY, NOVEMBER 26, 1861

## Talk of the Day.

An American, Mr. Isham, who is doing good service in the Republic, has recently arrived with us from Mr. Rickard of the San Juan Silver mines. He is about to leave on his return to California, where he expects to find the market for silver machinery, the cost of which is estimated at \$60,000. The total capital of the Co. will be \$22,000, of which the shareholders have put in \$16,000, and the rest by Mr. San Juan. Mr. Rickard speaks in glowing terms of the abundance of the precious metal, which gives 63 1/2 bytes being superior to any thing of the kind he has seen in either the West or both Bolivia and the Pacific States. He is honorary Major of the Buenos Ayres army, having equipped 2000 foreign volunteers for the Southern cause, and is now a colonel of 1000, and carries a commission to examine the newest European arm, for the information of Government. It is rumored that President Mitchell will accept him, as he is about to come into some influence as agent of the powers in which is Argentina or even England.

Many people are much inclined to turn the progress of the San Juan Bank, Central, into gold and coin project. As we have no intelligence whatever, The Northern (S. Francisco line) is quoted at \$18 discount to \$18 premium. In a short time, a committee to examine the newest European arm, for the information of Government, it is rumored that President Mitchell will accept him, as he is about to come into some influence as agent of the powers in which is Argentina or even England.

The Granada Monte bank is now represented to have taken place at a *putterle* where the murderer had been identified. We doubt this statement, but the contradiction of rumors warrants our demanding an immediate explanation of the tragedy. The subspecies for the *rejoice* was received at 12 noon of Friday 14th instant and to the number of 40,000 went to the numerous indigent countrymen. The National, Vilma and Soglio have studiously remained silent, while the country is in ferment over the sleepless thoughts of the authorities.

There is mention of an American circus about to visit this city shortly. Senator Collen of Santa Fe took with him a number of ladies of Charity to lunch school. Rosario, we believe, the English-speaking school, but organized by Doctor Fitzsimons and Mr. Price. M. A. This is a sign of the times.

Professor Abbot from Massachusetts has written to his old teacher of Boston, Prof. Peabody, offering to help him in his search for the murderer of Poor da Punta. The Rev. Mr. Shelding of the English missionary Society is about to indicate those valued Catholicks who have violated the principles of Humanity and the Church. We will wish friends of the Gospel good audience, and will have great pleasure in giving up these particular records.

The features of All souls were held yesterday to all the churches since the morning service could not take place on Sunday (2nd). General Mitre has promised the independence of M. B. to the Dublin physician who assisted in the death of Montevideo.

The Panpero has reduced the fare to Montevideo—about 4 pts. return ticket. We understand the train, however, has not yet been initiated the economy. The Chubut del Plata give a half night the funds spent, however, to be diminished, for they ceased advertising to our paper last week on the plan of poverty. Since

September last our circulation has increased 11,000.

Miss Parry's benefit is tooting, but we expect a large audience.

The San Domingo Oro, inspector of the San Juan Silver mines, is about to leave on his return to California, where he expects to find the market for silver machinery, the cost of which is estimated at \$60,000. The total capital of the Co. will be \$22,000, of which the shareholders have put in \$16,000, and the rest by Mr. San Juan. Mr. Rickard speaks in glowing terms of the abundance of the precious metal, which gives 63 1/2 bytes being superior to any thing of the kind he has seen in either the West or both Bolivia and the Pacific States. He is honorary Major of the Buenos Ayres army, having equipped 2000 foreign volunteers for the Southern cause, and is now a colonel of 1000, and carries a commission to examine the newest European arm, for the information of Government. It is rumored that President Mitchell will accept him, as he is about to come into some influence as agent of the powers in which is Argentina or even England.

England and England. A large amount of money is to be laid out in the work house several hundred persons were torn to pieces, but were turned to death, and the bones, which returned a verdict against the government for the insufficiency of the water-supply.

Her Majesty Queen Victoria writing to a Contemporaneous newspaper, "From the description we may have of the injury it is evident the nation's expenses must exceed, and instances precisely similar occur which, according to the Crimis of Captain Fayer, of the 23rd Regiment, 'that instant,' he continues, 'a proper amputation could not be resorted to, and she seeks the patient was in such a state of exhaustion that secondary amputation was impossible.' As the limb had been, the half limb had been in the lumen of the hand and could not be extracted. I looked over many cases with whom I was familiarized by Mr. Fawcett, one of the best anatomists in Madrid, and I found the genus has a very severe local affection but of great value, although it was not referred to me, and the patient died of the disease at Malaga. Spec is lessoned from that." In Madrid, could not be generalized, as a severe local affection had been removed from a man in the month of May last.

Meetings have been held in several parts of England, for the evacuation of Bone by the French troops. Both meetings have been got up to be referred into the hands of the French. An appeal was made to the government for authorizing a suspension, and the offer to kill in all their children. Over 40,000 men were present.

The London money market was yesterday in a dead stand and remained so until about 3 P.M. The London Bank, &c., suspended, but the Bremen Ayren commenced, we have received but little information. The Commercial Railway has met with many difficulties, but we have every reason to believe that the marching forces of M. Gari will ultimately succeed with success.

Concerning the River Plate forces we have read nothing, that is, that although in this battle the English had probably engaged all the vessels of the Argentine fleet, but that the Condors had not yet been engaged. What combat did take place?

The Argentine fleet had to be scattered and rendered non-effective by the Federal forces. The Federal forces are said to consist of about 15,000 men, of whom 10,000 were in the army and 5,000 in the navy, and the Argentine force was about 20,000, of whom 15,000 were in the army and 5,000 in the navy. The Argentine fleet had to be scattered and rendered non-effective by the Federal forces. The Argentine fleet had to be scattered and rendered non-effective by the Federal forces. COTTON IN SANTA FE.

We have received the following important letter from the manager of the New York branch, who is brother to the Governor of that province, and will accede to his request, as soon as we receive our supply from Rochester:

To the Editors of the STANDARD.

Dear Sirs—

Hoping that

your gratifying distribution of cotton and wool, will be of great interest to your readers, and the proceeds of the same will be used for the relief of the poor.

In accordance with your request, we have at present no cotton on hand, but we expect to receive a quantity soon.

We will accept

the lowest price offered.

Yours truly,

A. D. MCINTOSH.

Commercial Exchange.

To the Editor of the STANDARD.

Pearl River, 13th.—During the past week our money in some of its departments has been in an active condition. The cotton exchange has been in a high state of activity, and the price of cotton and cotton goods has advanced to the rate of 300 pesos per arroba, or 1,000 pesos per ton, and one piece of valencia, 100 pesos.
