SATURDAY, JULY 23, 1864. ARGENTINE NEUTRALITY

The present lamentable condition o the Banda Oriental, and the dangers which now threaten her independen justify us in presenting to the public the prejudicial consequences of Argen

tine neutrality. It is now nearly a year and a-half since the man who possessed Argenting sympathies, set off from the Gas house, accompanied by two followers to raise the standard of revolution in his native country, and under the protext of avenging a wrong, to overturn the best Government which the Republic of Uruguay ever enjoyed.

We are willing to admit, for the sake of argument, that at the commencement of the revolution. Presi dent Mitre's Government was in a rather critical position, and that any hostility displayed towards the rebe Flores, whose cause was so popular in this city, would have jeopardised the National Government itself. But we and that our over to the fact, that Argentine neutrality is, if not the imdiate, the remote, cause of the pre sent state of affairs.

We do not now attempt to defend the 'Blanco' Government, or the 'Colo rado' cause, but to call public attention to the danger of neutrality, the errors of neutrality, and the possible chastice-ment of neutrality, in a struggle un-worthy of the name of war, unde-serving of the title of rebellion, and in which, every winciple these should inworthy of the fille of rebellion, and in which, every principle that should in-fluence a sound Government, demanded

serving of the title of rebollion, and in which, every principle tent should be a served to the present proper any to easily which are provided to the present proper and the present provided and expectation of gold instead of paper in the case been for both the Oriental and Agree the Republic, and we, instead of presenting a neutral policy, raised some the Republic, and the present proper in the charge of the third present proper in the charge of the which the present proper in the present proper in the present properties of gold instead of paper in the charge of the these who have sounded or presented and the present properties of gold instead of paper in the charge of the work of alurn, in order to prepare the charge of these who have sounded the hard and hand with Flores periade under the process of analyzar and the state of the straight of the present principles of moral with what lately the present principles of moral with what lately the present properties and the present present and the present present in the River Plan.

PRITORIS TARE

There was a rumour affoat vester day, said to proceed from ministerial quarters, to the effect that Lucas Mo-rono had disbanded his army, and the

Government of Montevideo abdicated, in view of the countless enemics and troubles with which it was menaced on all sides. The report is probably promature, and seeing its alleged author, we suppose 'the wish was father to the thought,'

To-day the Pavon is due; she will urehably bring us news from Chile. nd we expect to welcome our untiring friend Symuel Renebase Phibbs so turned from his tour along the proposed route of the Grand Central Argentine.

Speculation is rife about Mr. Wells balloon ascent to-morrow, but the weather scome worse than on the two former occasions of disappointment. Mr. Wells (pozos) has a very aqueous name, and, it is a strange fact, that overy time he proposes to go up we have bad weather. The clouds con-spire against him, to punish his au-dacity in invading their dominions. The state of our streets is awful, and

the question is in everyone's mouth, "What does the Municipality do with the 20 millions mgc per annum?" The Callo Belgrano is almost impassable, and requires paving much more than Don Lorenzo Torres' 'barranca.' The Calle Victoria is now torn up opposite the 'Tribuna ' office : riders will please ake care.

There is at present an unusual num-er of young Englishmen looking for situations, of course without success. They had better go to the camp.

Our packet edition will be published

on Tuesday morning, 26th inst. The Mersey will leave next day. (See ad

yertisement).
Some people have met with trifling accidents at night, crossing the Plaza Victoria. It is said the poles are left standing for Mr. Wells' benefit, but if Sr. Cazon is afraid to suffer the balloon to be attached to the clock-tower, why not let the accomput use the Recolu arch : if by chance he carried off the whole Recoba it were a clear gain fo. the city.

Whatever claims Flores may have s a revolutionary leader he has none whatever as a military writer; his pro-clamation to native and foreign residents is more in the style of a country pulpero than an experienced military

general.

Our colleagues are all fur ous about the Provincial Deputies not attending the Chamber on Wednesday night. We find every excuse for them how. ever; in the first place it was freezing hard and the streets were covered with mud, and in the next the subject which was to be laid before them, the sub-division of the camp partides, is a matter which they and almost everyone else considers should be laid on the

table for the next five years.
The great automaton is we fear again getting out of order, some Argentine officer having given one of the wires

1.000 Miles of Railway Voted.

Few people in the River Plate have even the remotest idea of the rapid ad vancement of our neighbor. Brazil, especially in railways. A concession has passed, prolonging the Dom Pedro line 25 leagues, in two sections; a branch to Porto Novo, (36 miles), and another to Rezule, (40 miles). The estimated cost is £1,555,000. The length of road is but one-third of our Cordoba line, the cost of the former
