The "Saintonge," French pa arrived on Sunday morning and brings information up to the end of last month. The Emperor Napoleon is at Vichy whither he has retired to repair his health: although the official journals persist in stating that he is quite well, there is good reason to be-lieve that his constitution has suffered from the various coups d'etat incidental to his political career. difications have been made in the tariff regarding foreign sugar, Swedish iron, coffee and soap. The Toulon squadron has been ordered to Cherbourg. M. St. Georges inspector of the Imperial printing office, who did such service in circulating the Napo laon manifestos in '49, has been disgraced. Mirés, the bankrupt banke has been sentenced to three years imprisonment and fine. Prince Czartoryski, the distinguished Polish patriot and bosom friend of the Czar Alexander I. died at Paris in his 92d year. He had fought in the national ranks and been elected President at War eaw, during the brief independence of 1830. Prince Napoleon arrived at Lisbon. Mr. Patterson Bonaparte is about to marry the daughter of his cousin Prince Lucien Murat.

The Pope's health is said to be improving, but the united weight of years and affliction tells sadly on him: he often falls into a sleep-like trance, and the conclave has already fixed on certain Italian Cardinal of Austrian tendencies, as his successor. Disturbances are frequent at Rome. Coun San Martino has resigned the dignity of Vice-roy of Naples, and General Cialdini has been appointed in his stead The work of pacification goes on slowly, as we read of daily encounters between the Sardinian troops and Nea politan brigands for such is the polite term applied to all non-believers in Italian unity. The national parlia ment has voted several new railways and a naval arsenal at Spezzia; besides the great loan.

In Germany public attention has been distracted by the attempt to kill King William of Prussia, who was shot in the neck, at Baden-baden by a student named Becker. The assass is a native of Russia, aged 21, and thought to be insane.

Austria seems to apprehend revolu tionary movements in Croatia; 30,000 camp-bedsteads are ordered for that province: the Croats have resolved to separate from Hungary, in which latter country discontent still prevails.

The Empress of Austria is at Corfu, living very quietly and much given to boating excursions.

In England the volunteer movement and Blondin's rope-feats divide the general interest. Lord John Russell has been raised to the house of Peer and several changes have taken place in the Cabinet; but, Lord Palm still holds the reins of power, in spite of the vigorous opposition of the Irish members, so justly vexed about the Galway question.

Advices from Australia speak of new gold-fields, and the fears of t al insurrection in New Zealand. Prince Alfred is in Canada where the reinforcement of British troops caused some anxiety to the Yankees. Reof gold discoveries were rife at Halifax. The comot now visible in England has been supposed to be that

mer contradicts this elieves if to be a new has classened it St. suse it was first seen Our greatest enemy.

It is a serious mistake for Portend to imagine, that Urquiza is the greaest enemy to the advancement and felicity of this province, or that no ultimate benefit can be reaped until th audillos are exterminated. Any man of moderate perception must discover the social bane to be a spirit of lazines that is unfortunately associated with the name of Creole. Much good ex ample has been given on the part of foreign residents to inculcate and foster a love of en'erprising industry The born of plenty has shed such gol den gifts on thousands of our Europea settlers, that it should seem strange the rising generation does not emula to our activity to merit the favor of Dame Fortune. Yet, there is a radical evil in the training of the youth of this city, that leaves little room to ope for amendment.

A passion for gaming is too eviden in the hundredsof billiard-tables, crowded with untiring players, who waste their cash, and still more, their lifetime in this unprofitable and inglorious occupation. If one-half the per everance and skill manifested in this rame of marbles were devoted to deep study or commercial pursuits how immensely would Buenos Ayres gain by the reform!

An extravagant taste for dress and fashion may not at first sight seem so objectionable, but it is no less an item the catalogue of local vices. We all know that the riches of the natives are fast diminishing, in proportion as their property changes hands in town and country: nevertheless their style of living is growing every day more expensive; and, so far from imitating the Spartan simplicity of republicans, it assumes the haut ton of European aristocrats. It may easily be magined that a young exquisite who spends hours at his toilet, and interposes a host of perfumes betwixt the wind and his nobility" is of more profit to his barber than to society, and a better judge of kid gloves or Parisian boots, than in the matter of salted hides or refined tallow.

No doubt, much of this varlike en thusiasm; so prejudicial to all infant states, is traceable to the love of display which finds vent in a smart keni gold lace and brass buttons; and if we strip these youthful peacocks of their gay plumage we shall find the military fervor quickly to evaporate. that national sprit is unknown here, or a manly ardor reprehensible, but we fancy the strongest incitement to civil broils lies in the triple cause; ideness, love of show, and mis-direc ted ambition.

Another vital cancer in our moral constitution is the character of works imported into this country under the head; "light literature." Youth is the age for reading, but assuredly it would be desirable that our future statesmen dedicated more attention to historical research, political economy or the study of philosophy than to th ephemeral, though brillaut, produc tions of Dumas & Co.

Prograstination, through last no least, has been aptly termed the mil-Istone that weight down the necks of Portenes. "Mapana" is a word that we could wish to see blotted from the vocabulary. There is a golden axiom "defer not till to-morrow what may be done to-day" but we fear a century must elapse ere it sl:all be understood in this country, To reform these abuses, to eradica

te these defects should be the care and mission of our local press. Unhappily our Spanish colleagues are wanting the courage or will to attack the beloved vices. Let the government prescribe this remedy: Instead of prescribe this remedy: fettering trade with a 2 1 export duty, evy a tax off billiard-tables and players. Instead of supplying uniforms at public expense, cut down the taste for y making tailors' bills unre coverable; and then, cash payments may teach economy. Instead of maintaining a number of public clerks, increase the work, abolish matersipping, and keep the Post-office, and such like institutions, open to a later hour. In fine, make diligence and punctuality an essential ingredient in the educa-

cation, of our youth, and impress them with the belief that labor is more honorable than fashion. Leave polities to those who live by it: let every citizen be convinced that his country demands something more from him than to shoulder a musket in her me, and that the arts of peace are the surest highway to national greatness

Urquiza's address (From the Revista Comercial)

In saluting you, loyal soldiers of the Republic! assembled in this numerous army, by order of the Federal Government, to repress a daring rebellion: and in placing myself at your head, I rely upon the certain glory that your tried valor assures our native country.

Physical force is arrayed on behalf of the great cause which we are now summoned to vindicate: but, neither my own heart nor yours could exult if we were not also able to proclaim that we have on our side "God and our right". It is for this that you ha ve tranquilly awaited the issue of the se efforts for peace that our government and I myself have made to the best of our ability: it is for this that you have received with loyal enthusiasm and patriotic courage the tidings that our foc urged by the instincts of anarchy, is deaf to all advice of prudence and love of country.

The rulers of Buenos Ayres have not hesitated to sacrifice that rich ca pital for an unprincipled cause, and unprofitable interest. They tried to up the spirit of discord in our provinces ere they had, been quite re established under the benefical rule of our laws and at the cost of such immense sacrifices. The contempt for our loyal provinces blinds our enemies, and mistaking our dislike to civil war for a sign of weakness, they audacionsly defy the whole nation hoping to plunge it again in the whirlpool of passion from which Caceros extricated it: they wish to domineer in those provinces just recovering from the barbarism incidental to an insane civil war whose bare recollection suffices yet to draw tears from the eyes of its innocent victims.

And these are the same whom we conquered in Cepeda!

And these are the same whom conquered them, and gave the seat of honor due to conquerors! I remind you of all this without a feeling of repentance although our only return has been treason and ingratitude.

These acts, which redound to honor, coupled with our late efforts, augur for us a new triumph, and are worthy of the glory of our fatherland, the majesty of our cause.

Mankindapplauds us, and isinterested in our victory which will secure a reign of peace for the empire of right and liberty. These new efforts, have wrought a change in our national character which a gloomy past had served to obscure. The foreign settler confides in our future as a civilized people even when a treacherous faction madly rushes into the fight and haughtily refuses to bow down beneath the principles whose watchword at Caseros was: fraternity and fusion, peace and

Soldiers of the Constitution! benighted faction, whose rule in the sister province is incompatible with the peace of the Republic, tells us that a victory is yet wanting to perpe-tuate our tranquillity. Welcome then be it! Let us offer it to our beloved country with the firmness that might,

You are here assembled by the law and your own courage those agains twhom you are going to fight are, for the most part, torn from their homes by a power that sacrifices the people's interest to their passions Count upon many of their troops, for the moment you trend that province shall know that this is a rebellion which abuses its own blood and riches: these elements in a short time must be converted from their ruin to

form part of the national greatness. Soldiers of Cordova and San Luis! The nation is justly proud of the ca gerness wherewith you have passed from a great distance, over every obstacle, to obey her voice.

Your discipline and valor are my gua rantce.

The wreaths of Caseros and Ceneda are twined upon your brows: to arms, then, ye Argentine warriors! The law has made you brandish those weapons, God blesses them; glory ac companies, victory awaits you

Your friend and chief JUSTO JOSE DE URQUIZA. Head-quarters on march, Costa Pa bon, August 28, 1861.

The Argentine War.

At this moment active hostilitie have commenced, and are perhaps al-ready terminated by a decisive battle, for, by latest accounts an engagement was daily expected. Much anxiety naturally prevails in this state of uncertainty; the river communication with our enemies has been stopped, and such an immense land journey intervenes between this city, and headquarters that we shall probably hear of a battle and victory without anti-cipation. Rockets and music if Mitre gain, or some run-a-way horsemen it defeated, will be, no doubt, the first official announcement. It is amusing to read the confident promises of vic tory held out in all the government prints, when the issue is really doubtthese men had changed their skin. cuation; i. c. March 1st 62. We repeat that the National Guards magnanimously embraced after we had and foreign mercenaries compose the strength of Mitre's army and will possustain the whole brunt of Urquiza's legions, even single-handed.

The result will verify this assertion. A slight skirmish took place on Tuesday between 300 of the Argentine vanguard and 80 of ours, without result. General Hornos had not yet arrived owing to his want of horses but, on Saturday he must have rea-ched Rojas. Colonel Paunero lost his way for some days, but afterwards came up, with the artillery. Mitre hus instituted strict discipline, shooting 2 deserters and a spy, and exercising the troops in frequent manoeuvres and target-firing at sun-rise as well as in the after noon. Pickets were thrown out to guard against a surprise, and Flores made a recon with the cavalry. A correspondent from the camp gives 21,000 men as the sum of the army, with 35 pieces of cannon. It was expected they should march to meet Urquiza at the Arroyo Pabon 18 leagues off. The latter is represented to be very badly supplied with horses, mounting his ar illery with donkeys. This looks incredible, yet it is cortain Derqui,s army had to cross some 10 or 15 leagues of very desert campaña, and thus it may be true. The port of Rosario has been closed and the "Dolorcitas" steamer detained, with the object, as they say here, of concealing the onemys distress, but more probably to prevent our knowing his intended morements. Meantime the titular governor of Santiago has returned to Cordoba, fearing an unkind reception from Taboada. No less than 17 of the Cordoban deputies were shipped from that city for Parana, to serve in the line, against their Porteno allics. Don Marcos Paz has been set at lib-orty, probably on parole. The Con-

gress has passed a guarantee of 7 pg

on 7 millions hard dols. for the Cordo-

000 dollars for the navigation of the Salado under Mr. Rams. They have also passed a foreign loan of six millions dollars at 6 pg and 1 pg annual amortization. These projects are very considerable, and it is difficult to gues where so much money can be raised. Dr. Pujol of Corrientes is dead (and according to the C. Times, damned): he was by many reputed a man of ability and a friend of education. Dr. Zuviria has also died at Parana The President's expenses, in his trip to Cordova (says the Nacional), amount to 400 thousand dollars.

It is said that Urquiza has not ye armed the Cordoban contingent; that Dn. Pedro A. Zavalia a merchant of Salta supplies the cost of his ar my with 13,000 dollars monthly, at high interest. Moreover the Engl and French ministers are expected to leave for Buenos Ayres, with the view of looking after foreign property in this city

Our chambers have voted 50 mil lions for the purpose of carrying or the war. Pilar-Aug. 18th 1861. To the Editor of the Weekly Standard.

Dear Sir.

I must beg a small space in your columns for a question of importance to many sheepfarmers, and at the same time humbly request an opinion, advice or solution to it from your ex perienced readers on the subject-na-

"What class of rams are most profitable to the general sheep-breeder."

Many of us have not the means of practically investigating the subject: as such, the opinion of those who have already experimented would be

ery much in fashion but many are of opinion that they are more fashionable than profitable, they are generally delicate & the ewes very scanty in milk. Consequently they do not produce the average increase-their crosses even far removed are large boned, consequently bad fattening sheep on our scanty herbage & when not fat unable to resist the extremes of & wet-as such on the whole, rambouillets are not supposed the most profi-table. The profit gained in the extra weight of the fleece is more than doubly lost in the increase-such is the opinion of some few who have tried them but would be glad to be convinced by more experienced breeders to the contrary. The sheep breeders interest in this country lies as much in the wool as in the increase he cannot sacrifice the one to gain in the other, consequently the ram that he requires is that which will produce him most increase and at they same time

Such is the question that I have begged a space in your columns for & hope the appeal to those better versed in the matter will not be afade in vain-of course we will expect the answers through your colums, if you can afford space for them you would oblige by signifying as much when you Yours &ci

The Instices of the Peace in the camp.

Small indeed would be the benefit which an independent paper could confer on its readers and the local society at large were its columns narro wed up merely to passing news which in a few days ceases to command intorest. It cannot be denied that one of the primary objects of a news paper is to disseminate important and interesting news. But this is by no means the extent or limit of its usefulness, far higher and nobler is the sphere of an editor who feels an implied duty in publishing and extelling virtuous actions as well as in crydown prejudiced notions and one, sided justice.

not to be supposed for one mo-Li ment that a newspaper is to be occu-pied continually with frivolous plaints or even personal grievances but with no other feelings save thuse of pride and joy can we regard our paper when we reflect that by it we possess the power of holding up to s overbearing impudence, and injustice which it too often falls to the lot of our fellow countrymen to receive from some of our pigmy judges, or judidicial pulperos

confess to a limited experience but with very few exceptions we assert that the most of these petry judges, are men better, qualified to soll cana and yorba than deal with the imperishable rights of a resident in a free republic.

Were the independent native gen lemen of this country the justices of the peace we would not for an instar complain because they, possessing a N beral fortune, have had the adva ges of education and good bre indispensable to any judger prears these gentlemen esches pears these gentlemenese nity, hence it is the the

chupandino or a gringo. An interesting instance of this oc curred some little time since, not 40)eaes from the cabildo, in one of our all country-towns; the subject in oute was the amount of damage ar infortunate Irishman should pay for ding on an ageno horse it is er unnecessary for our purpose to go nto minute particulars, the Irishman brought a native gentleman to sneak or him, in vain he asked his worship for a little consideration, in vain be pleaded the poverty of his Hibernian riend, we are not certain but that we eard our friend cry out in the words the immortal Shakespeare.

Since Shakspeare was a gringo it is to be supposed his worship turned a deaf ear to his immortal attribute to mercy, for Shylock could not have proved more obdura e.

These facts bearing as they do the stamp of authenticity command the country.

The office of justice of the peace is one which enjoys such absolute and Eastern despotic authority here in the camp, it, ought at least to be conferred on men who if not exactly lawyers should at least be persone who would feel the value of the trust which the country reposes in them, and the tremendous responsibility which any illegal or improper conduct in their part must inevitably cutail.

Arbitrary to the last degree is the power of a justice of the peace in the Federal Government, mp and completely and diametrically opposed to the true spirit of republicanism, no doubt there are many senses to be offered for clothing the judge with such great powers, such the facility for crime, and escape, and the nowness of the country we voin, but there can be no exci se for utting power into the hands of men, o have but one notion; whose property the right owners are keeping them out of; and whose education is

Influenced by the purest and best motives of Christian charity we have refrained from giving the names of iny of the parties in question save our d friend, from Avon, but it is by no ans beyond our power, and any retition of such conduct will demand the strictest scrutiny, the question will then arise how high and mighty is the judge in a free republic whose conduct is above impeachment.

In the time of Rosas these judge could do justas they best pleased, but we apprehend their hour is fast aphing, they will not require their pectacles to read the hand writing on the wall: this country is rapidly toing ahead, and in a few years pe to see, either qualified lawyers not, at least some of the inde nt native gentlemen of the coune room of some of these pig-

The civil war in America

There have been no movements of any importance since our last. Mr. Lincoln and General Scott seem to be waiting for the sanction of Cong ess. was to assemble on the 4th inst., before ordering any further advance into Virginia. The report of the cutting to pieces of the Home Gu-ard at Piedmont, and the surrounding of an Indiana regiment at Cum and, Maryland, by Confederates under the command of General John ston, was entirely without founda tion. The Governor of Missouri, when heard of, was marching south ward, with a view of securing the lead mines in the south-west corner of the State. It was reported that Arkansa troops were on their way to aid the State Government of Missouri against the Federal Government. The blockading fleet have captured the British ship Amelia, bound to Charleston, and laden with stores said to be contraband of war-which were iron crates, camp-ovens, equipage, and ma chinery. She has been taken to New Another British ship, the Forfarshire, has been captured in the Gulf of Mexico.-reason not stated.

Connection between secoded States and the civilised world continues to be maintained by the telegraph and railway lines which run through Kentucky, and by private letter-delivery companies, which have their head quarters in Louisville, the chief city of this neutral State.

The Southerners, in addition to their other wants, stand in need of lucifer-matches and quinine. In many places they are obliged to have recour se to the old-fashioned tinder-box. The demand for quinine suggests the idea of fever and ague, so endemic in in the Southern and Western States. A Philadelphia house refused lately to supply even a Kentucky purchase with this valuable drug.

Thirty-four companies had volun teered their services to the Federal Government from Kentucky. The election returns from this State indicate that nearly all the Union candidates for Congress have been elected.

The French declaration of neutrality has been well received by the New York press. They profess to be able to see an important difference bet-

ween it and that of Great Britain. The New York Times of the 23rd ult, directs public attention to the approaching International Exhibition of 1862. It says in reference to the speedy appointment of a commission, "We know that a large number of our best mechanicians are anxious to exhibit, and we would inquire, on their behalf, if our Government has taken any steps in the matter. One day's time, expended by the proper bureau, could well be spared from war ma-tters, and would be ample to settle this whole bussines. We carnestly recommend this extremely important subject to the attention of the Goverument: It is a subject not of temporay, but of permanent, importance to the people.'

President Lincoln having, in his Message to Congress called for 400,000 men to enable him to restore the seceded States to the Union, Mr. Sal mon P. Chase, of Ohio the Secretary of the Treasury, (an official whe functions correspond with those of the British Chancellor of the Exchequer), presented to Congress on the 5th inst. intereresting written report, or budget, the substance of which we proceed to give. We premise that the fiscal year of the United States co mmences on July 1 of each year. The total estimates for the current fiscal vear (July 1, 1851, to June 30 1862) are 318,519,582 dols. or about £ 65,000,000. To meet this expenditure Mr. Chase thinks it advisable to raie 320,000,000 dols-

THE IRISH CENSUS FOR 1861 .-- At published. The total population en-umerated on the 8th of April, 1861, as obtained from the enumerator's 2, 804.961 males and 2,959,582 females, or 787,842 less than that relast ten-years. The present decrease is most apparent in the city of Kilcounties of Tipperary, Clare, Meath, Kilkenny, King's, Wexford, Waterford, and Cork. The only localities in wh ich an increase has taken place are Dublin county and the towns of Carrickfergus and Belfast, in which latte Accality it amounts to 18,941, or 18-SS percent on the returns of 1851. The Commissioners attribute the decrease chiefly to emigration and the effects of the famine which extended over the first years of the decade included in the present census. The Irish Census differing in this respect from the English, included an inquiry into the "religious profession" of the population; and on this point the report states that, "in only fifteen instances have complaints or objections te the enumerators' returns been made to the Commissioners." llowing is a summary of this portion of the report:—On the night of the 7th of April; 1861, those of the Roman Catholic Church amounted to 4,-490,583; those of the Established Ch' urch to 678,661; and Protestant Dissenters to 586,563-amongst whom those of the Presbyterian Church numbered 528,992. The number of inhabited houses is 993,233, and the decrease since 1861 is 52,990, or 5.08 per cent. The number of uninhabited houses in 1851 was 65,263, while in 1861 the same item shows but 39,-

were 250,000 paupers in the Irish vorkhouses, in 1851, while there were but 50,570 persons in the Irish wor khouses the day before the recent Census was taken.

MISCELLANEOUS.

THE LATE KING LOUIS PHILIPPE OF FRANCE.-In the sitting of the French Senate, on the 9th, a petition was read from a private individual, praving that the mortal remains of King Louis Philippe might, be removed to France. Count de Beaumont, the reporter, observed that the committee was decidedly of opinion that a mere for each an object, and that a member of the Orleans family could alone ma ke the request. Were such an application sent in, there was nothing lead to the belief that it would not be accorded. When the late King died, the Emperor had declared-as was confirmed by a letter from the Minister of State, which the reporter had in his ssession—that he should not oppose the translation of the body of Louis Philippe to Dreux. That decision was made known to the Orleans Princes, who did not consider it advisable to profit by the authorisation. In consequeuce, the committee proposed to the nate to pass to the order of the day. That course was agreed to.

- A Dublin paper states that the appeal in the Yelverton case, which was to have been tried at Dublin during the present term. has by consent heen postponed until next term, whences in October, befor ich probably the decision of the Scutch courts will have been given

-It is understood that, in addition to the Irish estate bequeathed by the Earl of Ladlow to the Duke of Redford, Lord John Russell takes, under the will of his brother, the late Duke, the hish property, purchased by John, Duke of Bedford. With regard to the personalty, there are various stories as to the amount left to Lord John. There seems to be no doubt that, in addition to the Irish property, there is a very handsome sum in ready money £30,000 has been named-but on no very positive authority.

TRADE WITH AMERICA-The trade of this country with the United States during the first quarter of the present year is stated to have consisted of im ports of American produce to the estimated value of £14,046,548 and of exports of British manufactures of the declared value of £4,147,019, sh a balance of £10,899,529 payable to that country. As the figures of the same period of last year consisted of £11,087,720 and exports £ 5,886,357, the balance payable to America on that occasion was £5,201,-363. Notwithstanding, therefore, the enormous quantities of wheat and flour we have now taken, the increase this wear in the balance to be paid was not more than £5,698,166.

THE EMPEROR OF AUSTRIA AND THE BRITISH AMBASSADOR .- A Pesth letter says:- 'I hear that a main reason why the Diet yielded the point about the style of the Address is, that all the European Ambassadors recommended the Emperor of Austria not to receive it so long as it left in doubt the legiti-macy of his title as King of Hungary Lord Bloomfield took the lead in this demonstration, and is reported to have said that if the Emperor by the reception of the proposed Address admitted Hungary, his diplomatic position we be very awkward, and Napolcon III. and Victor Emmanuel might in given circumstances make use of the admission sgainst him."

THE EMPEROR OF RUSSIA IN MOScow .- The following account of the Emperor of Russia's reception at Moscow appears in Bullier's Lithographic Sheets:-"Letters received from perwhen the Emperor Alexander entered the theatro at Moscow all the company quitted it, as if they obeyed a precon certed signal. It is added that the Emperer's aides-de-camp were insulted by the crowd. But what it still more serious, the insurrection among the peasants is extending every day, and is assuming slarming proportions. Hitherto the troops have acted without hesitation against the insurgents, but fears as to their fidelity are now beginning to be entertained."

Gerraal Bosco Asam, The Nea-collian General Bosco haid to have bolitan General Bosco haid to have tried in Paris for Salinger Count du tred in Paris for Salinger Count du to fight a duel. The cause of

quarrel is contained in the book writien by the count on the siege of Mes-

Gropors Savo - Madamo Dudevant (Georges Sand) has written a letter to a friend, declaring that there is no truth in the rumonr that she had received a present of 20,000f. from the Emperor Napoleon. Sho says: "It is very true that gracious offers bave been made me, but I did got believe myre'f at liberty to accept them, having neither desire nor need of any recompense or any distinction from any Govern-ment whatever.

ODDS AND ENDS.

Esquires-In Jamaica, any one who wears a black hat is an "Esquire" No gro servants pay no attert on to the ringing of a bell They consider such a summons a species of insult to their respectability and sense of equality as members of the human family. Nor will they often answer if called simply by the Christian name. They generally require the prefix of Mr., Mrs., or Miss. "Height dem call me like dang ho cril; me no go-me no dang."

-"Native and to the Manner Born" -1n the House of Commons last week Mr. Blake said:-"If the noble lord (Palmerston) was not born in Ireland, he was born out of his native land."

ERRORS OF THE PRESS-In a notice of Mr. German Reed's humonrous singing in a contemporary last week, "Humbug recitals" was substituted for "Hunting recitals."

INSCRIPTION ON AN AMERICAN TOM BSTONE- "Sacred to the remains of Jonathan Tompson, a pious Cristian and an affectionate husband. His disconsolate widow continues to carry on the tripe and trotter business at the same place as before her bereavement"

Bone of contention. - The other evening, as a worthy divine and a broad-thinking doctor were discussing alout the Essays and Reviens, some doubts were raised who ther Eve was formed from a "bone" when a poetical lady remarked. "We.l, if Evo were so formed, it must have been from the Bone of Contention!"

YOUTH AND CRABBED AGE-A cenas-toker in one of the districts in New York State has discovered a beautiful girl of fitteen with a husband one hundred and seven years of age. NEVER SAY DIE.-No young man really believes he shall ever die. Thea feeling of eternity in youth which makes usamends for everything. Death, old age, are words without a meaning-a dream, a fiction. To be young is to be only less than one of the immortals.

CONCEIT .- People seck for what they call wit on all subjects and in all places, not considering that nature loves truth so well that it hardly ever admits of flourishing. Conceit is to nature what paint is to beauty; it is not only needless, but it impairs what it would improve.

WOULD AND SHALL .- There are a good many people in the world who spend half their time in thinking what they would do if they were rich, and the other half in conjecturing what they shall do so they are not.

PRUDENT RESERVE—A young lady

should often maintain a prudent reserve and silence) in the presence of her lover; he will be certain to fancy her a great deal wiser than she can show herself by her talk.

AVELICTION DIGESTED- Before at afflction is digested consolation ever comes too soon: there is but one mark M between these two, as fine almost as a hair, for a comforter to take nim at. HUMAN NATURE.-There exists in hu man nature a disposition to murmur at the disappointments and calamities incident to it, rather than to acknowledge with gratitude the blessings by which they are more than counterbalanced. CRUSHING THE FLOWERS-How many a man, by throwing himself to the ground in despair, crushes and des-troys for ever a thousand flowers of hope that were ready to spring up and gladden his pathway.

THE AUTUMN OF LIFE .-- The of a lady in the autumn of life and the leaves of the trees in the autumn of the year often grow redder and redder, but nature is not always in both

good offers of marriage are too No-ing by half.

AWEIL CHARGES.—In an advertisement by the E. C. railroad company of some uncalled-for goods, the letter "I" had dropped from the I word law-ful, and it read, People to whom these packages are directed, are requested to come forward and pay the awful charges on the same."

A DEFINITION-"Now, papa, what himburg?" "It is," replied papa, is homburg?" when ma pretends to be so very fond of me, and puts no buttons on my shirts

LITERATURE [FROM THE ATHENARUM]
-"A Letter to His Grace the Archbishop of Canterbury, upon the Question of the proper Treatment of Cases of Polygamy, as found already existing in converts from Heathe-mism." From the Right Rev. J. W. Colenso, D. D, Bishop of Natal (Pictermaritzburg, Davis.)
That a Bishop of the English Church

an under any circumstances, tolerate polygamy will appear to many persons rather startling. But the Right Rev. J. W. Colenso, Doctor of Divinity, and Bishop of Natal. not only telerates amy, undercertain circumstance polyg but defends it on the ground of religion and humanity.

A well-known story represents the circumstances with which Dr. Colenso has to deal. An African chief is converted by missionary zeal to Christianity, But there is a difficulty. The proselyte has two wives. The Christian toucher tells him he must put one of them away, for the new law does not permit a man to have more than one wife. The chief is sorely perple xed. It is no easy thing to disturb domestic institutions, and the poor convert goes away to his home rather dark in the countenance. But a light fell suddenly upon him; and when next he met the missionary his eyes were wild with jcy. "Me bery good Christian now," he shouted; "ine only one wife."-Ah, very well, says the mi ssionary, and what have you done with the other?-"Other," says the gleeful savage, "me ate her up-nicel"
