WEST COAST TELEGRAMS.
THE SENATORIAL MIDDLE IN CHIEF.
Santiago (Chile) 5th.—The Senate had elected Valentín Fierro, Governor's candidate, as its President, by 16 to 15 votes; but in view of such a nominal majority, Valentín Fierro resigned, and the Ministers Rosales and Espinoza did likewise. It is understood that the Government will be composed of the Committee, Dr. O'Farrell, and Mr. J. P. Gahan. There came Messrs. Dowling, Nelson and a host of other well known gentlemen whose names were the subject of a vote which was warmly supported. The gathering was a most brilliant and distinguished one, and showed how powerful and influential the Irish community is becoming in the Plata.

RURAL AFFAIRS.
There is a wall of wool from the Southern camps owing to the scant supply of wools on the Great Southern Railway. At this time of the year, as a rule, the rolling stock of that line is so farced to work that it is impossible to get any wool, especially the case today, when the convenience of life-stock. At all the Stations, wethers are kept waiting for the absence of wools for their

It is 375 years to-day since Bayard breathed his last, in that distressing campaign of Francis with which the battle of Marston is associated. The inscription on the monument says: "Born in the house of the Chevalier Bayard born 1413 deceased at Rebecq, April 30th 1492." A few miles outside the city, close to the railway, you pass a ruined tower, the only vestige of medieval life in the town. It is here that in modern history the most nearly reminds us of Bayard's Undefeated heroism, whose name is mentioned by a striking coincidence in the requirements of the annexation of the United States on this same day. It is here that the hero of the Middle Ages was also the hero of the last century as a patriot, and the hero of the present century as a noble in the annals of chivalry.

THE RIO COLOREADO CANAL.
Of all the schemes presented to Congress this session, one of the most plausible is that of the unfortunate Sociedad Territorial de La Plata for the construction of a canal from some distant point on the banks of the Colorado river to a north-westerly direction to the Atlantic Ocean, by San Blas or Union Bay. Any person familiar with the barren features of that immense and promising mesopotamian basin between the rivers Negro and Colorado and stretching to the foot of the Andes, will immediately see the enormous advantages which the country will derive from the construction of such a canal. We all know that the great base of the Andes is a sterile territory, and that the only crops which grow there are such as the potato, the turnip, and the cabbage. The soil is so barren that it is necessary to import manure from the States of Chile and Peru. It is a fact that the drainage of the Colorado river is so rapid that it is necessary to build a dam across it to prevent the water from running off so fast.
