J. Collis Brown, (late Army Medical Staff), to which he gave the name of CHLORODYNE, and which is admitted by the profession to be the most wonderful and valuable remedy ever discovered.

As a remedy for general utility, we must question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every gated to the native bazanis, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances "ad infinitum" of the extraordinary efficacy of Dr. Collis Brownes Chlorodyne in Diarrhoea and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative that have occurred under our personal observation during general sedative that have occurred under our personal observation during many years. In Choleraic Diarrhoea, and even in the more terrille forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's from a firm Conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate Breach of Faith on the next of the Chemist to prescribe and Carinet alike.

It is the only Dip that is so durable in the wool as to keep the sheep clean and free from contagion from dipping to shearing, thus saving a great deal of valuable time and labour to the Estanciero during the winter months. It is fast becoming the favorite Dip throughout the world, as it never fails in the worst cases of Scab.

ring was a flare-up in Catalinas Mole Shares, which spurted up to 172 for end of month and 180 for end of July. The demand for latter date was extraordinary and so dumb-founded sellers, that at every fresh transaction an advance of two and even three points was recorded. Nothing is definitely known as to the cause, but it is rumoured that for every old share an additional new share will be given as divi dend, as the profits of the company in their lands alone are simply enormous. It is asserted that these lands are set down in the balance-sheet as low as 60 dollars the square metre, although they must be worth ur times that amount.
