(By H. H. G. G.)
Paris, 19th.—M. Lohren, at present secretary of Legation at Pernambuco, who arrived at Bahia on Monday, 18th, has been appointed to the post of secretary of Legation at Pernambuco, where he will be replaced by M. de Souza, who has been appointed to the post of secretary of Legation at Bahia.

REVIEW FOR EUROPE

The fortnight has been one of empty discussion, and affairs are no better than at the departure of last mail. Congress has not yet opened its session, and the only business of importance is the discussion of the bill for the reorganization of the Ministry of Finance. The bill is a measure of some importance, and it is expected that it will be passed in the course of the session.

ROSARIO

(From our own Correspondent.)
Our installation of the electric light is now in progress. I do not know the reason why it should have been so long delayed. It is a pity that the Government should have allowed the company to be so long in making arrangements for the supply of electricity. The company has been very prompt in its arrangements, and it is to be hoped that the installation will be completed in a few days.

LA PLATA NEWS

Our exchanges from La Plata yesterday contain some references to the cabinet crisis which has just taken place in that city. As we stated in our last issue, the resignation of Mr. Carranza, Minister of the Interior, has caused a great deal of excitement. It is expected that the Government will be reorganized in a few days.

LATEST FROM MONTEVIDEO.

(From the Montevideo Times.)
It will be remembered that the colonies initiated by Dr. Cabello in the Department of Arizaga, in virtue of the Government's concession, were abandoned by the Government in September and taken over by the colonies. As the affairs of the colonies are in great confusion, it is impossible to give a full account of them. It is, however, known that the Government has issued a decree which has been just issued by the Ministry of the Interior, ordering the sale of the land in the Department of Arizaga.

ENGLISH LITERARY SOCIETY.

LECTURE ON DIAMONDS.
We are unable to give in full Mr. M. Hassan's brilliant and instructive lecture on diamonds at last Tuesday's meeting. The principal points were as follows:—
Amsterdam, Antwerp, Paris and New York, are the only places where the art of diamond cutting is properly developed. In London, however, there are many who cut diamonds, but they are not so good as those cut in the other places.

THE MISSING MILLIONS.

Baron von Pilgrim proposed the health of the country in a financial standpoint. The Emperor broke up at a late hour after a most enjoyable evening.

June 20th. Now that the private banking crisis has passed, and the working classes have withdrawn their deposits, everywhere there is a general feeling of relief. The public has become of the great mass of money. According to our own estimate, the total sum withdrawn from the banks during the past two years exceeds 50,000,000,000. And as the actual currency reaches 270,000,000,000, there are 220 millions unaccounted for.

It is a common belief among Argentines, especially in the interior, that the money has been exported to Europe, which has doubtless arisen from the fact that during the past two years enormous sums of dollars have been shipped to London. But this is not the case. The money has remained in the country. It is a common belief among Argentines, especially in the interior, that the money has been exported to Europe, which has doubtless arisen from the fact that during the past two years enormous sums of dollars have been shipped to London. But this is not the case. The money has remained in the country.

THE ONLY SOLUTION.

June 20th. A general principle is the urgent need of the hour. It is an axiomatic fact that the public has become of the great mass of money. According to our own estimate, the total sum withdrawn from the banks during the past two years exceeds 50,000,000,000. And as the actual currency reaches 270,000,000,000, there are 220 millions unaccounted for.
