Projectors every now and then start up with plans for curing all the economical evils of society by means of an unlimited issue of inconvertible paper. There is, in truth, a great charm in the idea. To be able to defray the expenses of government without taxation, and, in fine, to make the fortune of the whole community, is a brilliant prospect, when once a man is capable of believing that printing a few characters on bits of paper will do it. The philosopher's stone could not be expected to do more. The substitution of Paper for metallic currency is a national gain : any further ncrease of Paper beyond this is but a form of robbery .- John Stuart Mill on X nconvertible Paper Currency. Paper Money properly means paper made egal tender, and not legally convertible nto gold, or anything else, at the pleasure of the holders, or at any given period. No part whatever of the value of such paper money is derived from confidence. It in culates because it is made legal tender, and because the use of a circulating medium is indispensable; and its value, supall cases inversely as the quantity in qir- received.
