"All kind salutes, all veri non audiam dicere." WEDNESDAY, DECEMBER 12, 1866.

ELECTRIC TELEGRAM. Montevideo, Dec. 11, 1 p.m. Proudfoot to Mulhall. Arno arrived yesterday about four o'clock. Till now no newspapers were delivered. They thus do all they can to neutralise the benefit of the telegraph, and you ought to expose such abuses.

NEWS FROM EUROPE. THE ENGLISH MAELS. ALLIANCE OF RUSSIA, PRUSSIA, AND UNITED STATES. REPORTS AGITATION IN ENGLAND. ANNECATION OF VENICE.

THE POPE ABOUT TO LEAVE ROME. The Arno arrived in Montevideo on Monday evening with dates from London Nov. 9th, and Lisbon 13th. We translate from the Mala de Europa as follows:

The Reform agitation in England, the alliance of Russia and Prussia with the United States, the question of Turkey, the difficulties of the Pope, and the situation of the Emperor of Mexico, are the all-important topics of the day and engross the attention of all diplomatists.

Mr Gladstone under the late administration sought to effect an extension of the franchise, but now the masses in England loudly clamor for universal suffrage. Large meetings have been held at Manchester, Birmingham, Leeds, Glasgow, and other cities, and the demonstrations of the radicals have assumed a formidable appearance.

The alliance concluded between Russia, Prussia and U. States is much commented on: warlike preparations are afoot on all sides, and it is feared hostilities will soon break out somewhere. Prussia will probably cede her Polish provinces to Russia, and strip Austria of Galicia and Cracow, giving her in exchange a portion of Turkey, in the dismemberment of that empire by Russia.

The American navy is now considered the most powerful on the seas, especially in iron-clads, being double in number over the united fleets of England and France, and far superior in point of artillery. As soon, therefore, as Russia declares war, the Yankee monitors will appear in the Baltic and Black Sea to aid the Petersburg cabinet.

The Mexican question is, meantime, the nightmare of the Emperor Napoleon, who seems, moreover, nowise inclined to go to war till his Great Exhibition of 1867 be over.

The annexation of Venice has now completed the unity of Italy. The Pope still refuses to recognize the kingdom of Victor Emmanuel, and telegrams announce a recent allocation of His Holiness in which he protests against the spoliation of his dominions, and adds that he is prepared to seek protection in a foreign country. The Pope also complains that the Czar has violated the concordat of 1846, persecuting the Poles and banishing their Bishops.

Kossuth, ex-dictator of Hungary, has summoned his countrymen to Greece. The Russians are stirring up seditions in the Turkish provinces of Epirus, Macedonia, and Thessaly. The French occupation of Mexico draws to a close, and vessels are being fitted out to bring back the troops, after their 4 years' sojourn in that country to support Maximilian.

Count Bismark is ordered by his physicians to remain some time in retirement. The Emperor Napoleon has written to the Pope that France would be highly honored if he settled in that country, and offered him any part he may choose for a residence. The Italian Government is taking every precaution to prevent armed adventurers invading the Papal territory. In Rome it was rumored the Pope intended sending a new commissioner to Florence.

Despatches from Constantinople announce that after the battle of Urissa the Cretan insurgents capitulated and laid down their arms: 3 commanders and 136 officers were conveyed to a Turkish fortress. The London papers think the Reform bill will be laid before Parliament in the beginning of November: it will be introduced by the Derby ministry.

Prince Hohenzollern has been recognized Hospodar of the Danubian principalities by the Sultan, and will soon be recognised by the rest of Europe, especially as the Czar is openly opposed to him. On his return from Constantinople he was joyfully received by the inhabitants of Bucharest. The French forces in Mexico are 20,000 strong: part will return to France, and the rest proceed to Algiers.

The Dublin papers mention a splendid banquet at the Rotunda given to Mr. Bright. The O'Donoghue and Sir John Grey presided, and several ecclesiastics were present. Mr. Bright concluded his tour through Ireland on Nov. 2nd, embarking at Kingstown for England. The Gazette of Vienna contradicts the rumor of a marriage between Prince Humbert and the Archduchess Matilde.

The Presse confirms the report of an alliance concluded between Russia and Prussia with certain specific purposes. Russia cedes the left bank of the Vistula and receives eastern Galitzia in exchange. The temporal sovereign of Japan died at Osaka. Telegrams by the Atlantic Cable say that Mr. Secretary Seward has requested the British Government to pardon the Fenian prisoners in Canada, two of whom were sentenced to be hanged.

The French army is to be raised to a million of men. The Russian army is now up to that figure, while Prussia will soon have 1 1/2 million under arms, and Austria is also making a general enlistment. The world is likely soon to see the greatest war ever witnessed. The French papers deny the rumor of a new loan for £40 millions sterling. The King of Portugal reviewed 12,000 men at Lisbon on Nov. 4th, and gave a grand banquet at the palace of Ajuda.

The Empress of Mexico is now entirely recovered, and has written to the Emperor Napoleon requesting his influence to make her husband King of Poland. The Emperor in reply tells her to advise Maximilian to cede two Mexican provinces to the United States and that he will then be enabled to consolidate his Government. The Emperor sent a letter to the Pope by Cardinal Reisch stating that he will maintain the temporal power at all hazard, and if necessary re-occupy Rome. He has sent a General to command the new Franco-pontifical Legion.

An awful fire has reduced to ashes most of the city of Quebec: more than 2,500 houses are burnt, 30,000 people left homeless in all the rigors of winter, and about 3 million sterling of property destroyed. The Queen has headed a subscription for the sufferers. The entry of King Victor Emmanuel into Venice took place with great pomp on Nov. 7th, when the vote of the Plebiscite and the Iron Crown of Lombardy were delivered to His Majesty. For the first time since the reign of Attila, a period of 1,400 years, Venice comes to form a part of Italy.

Advices from India, says the Morning Star, give sad details of the famine, which has already carried off 2 1/2 million of people in five months; yet there was a sum of £14 millions sterling unemployed in the treasury. Telegrams from Egypt announce that vessels already navigate the sweet-water canal of Suez, and the works of the isthmus are now almost finished. The Greek bankers of Constantinople have made a loan of one million sterling to the Sublime Porte. The Greeks who took part in the revolt of Candia have begun to return to Athens.

The railway from Madrid to Lisbon was to be opened to traffic on Nov. 16th. The officers returned from the Pacific have been received with great ovations, and a funeral service is to be performed for those who died in that expedition. The Chilian prisoners are treated with every consideration. An attempt was made by a shoemaker to assassinate the Emperor of Austria, but Capt. Walter, an Englishman, wrested the pistol from the murderer's hand. It will be remem-

bered that the Emperor's life from a similar attempt in 1853. A Spanish fleet has arrived at Olinda Vecchia, and Queen Isabella offers to cede one of the Provinces of Spain as a principality for the Pope. It is also rumored that Austria offers the Pope the territory of Tyrol, with the historic city of Trent for capital. The Times Dublin correspondent complains of the Orange demonstrations under the new Viceroy, Lord Abercorn, and says Lord Derby's cabinet has incurred great animosity among all respectable classes in Ireland. Cardinal Cullen did not attend the Bright banquet, but sent a flattering reply to the invitation.

THE WAR OF THE ANDES. LATEST FROM MENDOZA. 1,200 MEN IN THE FIELD. The rebels of Mendoza have convoked the Legislature to elect a Governor, but, what is most amusing, they have summoned the same Deputies who elected the deposed ruler, Arroyo, to name another. They have 1,200 men under arms at a place called Plumerillo, 3 leagues from Mendoza. The Nacion Argentina asserts they are badly armed, but our advices are to the contrary, as it is supposed they get abundant supplies of arms and other necessaries from Chile. Their infantry is composed of Chilian filibusters or volunteers, under the command of Col. Olascagana, who rebelled against the Argentine Government and attempted a revolution in 1864, when he fled into Chile. It will be remembered that Capt. Manilla was sent to Chile to recover the arms and offer a pardon to Olascagana's men who had deserted en masse from the Argentine service.

The Governor of San Luis has called out the National Guards of that province, to place them at the disposal of Gen. Pannero: it was thought this contingent would reach 1,000 men. All communication with Mendoza was strictly prohibited. At Rio Cuarto an insurrection occurred under the direction of (Col.) Olazabal, with a manifesto against the National Government, but, on the following day a detachment of the 7th bat. of the Line arrived and restored order, seizing the ring-leaders. The Governor of Cordoba wrote to Gen. Pannero advising him of this revolt and begging him to use strenuous measures towards putting down the movement.

PAUNERO'S ARMY ON MARCH. (FROM OUR SPECIAL CORRESPONDENT) No. II. Frayle Muerto, Dec. 6, 1866. Seven hours' smother and pleasant travelling have brought me to Frayle Muerto; headquarters of Gen. Paunero and the army of the Interior. The camps all the way from Rosario are in splendid condition, and teeming with stock. They tell me there is much more rain here than down in Buenos Ayres, and I am inclined to believe it. I was surprised to find so many English on the line; they evidently form a prominent feature in the province.

The expeditionary forces, now under canvas near the railway station, number 342 all told; and have a park of 6 rifled 6-pounders. As to tents, ammunition, &c., they are better provided than I expected, and they also rejoice in the luxury of an English surgeon. The General will start from here within 3 or 4 days, by which time he expects to have received the promised contingents from Cordoba, Santa Fe, Buenos Ayres, and the frontier, where the Minister of War is busy raising every man available. Being joined by these levies, the expedition will number at least 2,000 fighting men, a force amply sufficient for the work in hand.

At head-quarters the belief prevails that the insurgents will offer but feeble resistance, and upon reaching Mendoza the General hopes to be able to turn his attention to the Indians, against whom decisive measures are in contemplation. You are aware that several years ago Paunero made frontier defence the subject of close and practical study, embodying his views in a pamphlet form, which I would recommend to the reading of everybody interested in the matter. And I think a part of the programme then laid down may be realised now. Of course, Frayle Muerto is crammed full. It is a matter of great difficulty to obtain a bed. Nevertheless, I was received by all the Americans and English with the utmost hospitality. Mr. Woods, the talented engineer of the railway here, procured me very comfortable quarters in one of his snug little wheeled houses, and invitations to visit neighboring estancias have come from all sides.

Amongst the foreign community great satisfaction prevails on account of the National Government having determined upon the establishment of a military colony, for the protection of this district; nor is it at all subject to doubt that this measure, if carried out properly, will be of immense benefit to the neighborhood. As there will be a general meeting of the English settlers in 4 days or two, where this matter will be fully discussed, I reserve it for a future communication. Suffice it to say, that great hopes are

entertained by the National Government, and that the Argentine Republic will be a military colony, for the protection of this district; nor is it at all subject to doubt that this measure, if carried out properly, will be of immense benefit to the neighborhood. As there will be a general meeting of the English settlers in 4 days or two, where this matter will be fully discussed, I reserve it for a future communication.
