POLICE INTOXICATION.

Probably one of the chief springs to many of our political troubles, is the want of respect in the masses for the authorities of the land. The native people, as a general rule, are very deficient in this respect.

Accustomed so much, however, to see every day these boyish frivolities on the part of the police, we have survived surprise, astonishment, and regret; consoling ourselves with the reflection, that possibly there may be less real vice where there is so much openness.

A drunken policeman on the very steps of the Cathedral, and at that hour: what a subject for reflection! Where was Cazon at that moment?

GOLD-MINES IN MAR CHIQUITA.

The Mayor of the diligence plying to El Moro reports the wonderful news of gold-discoveries in the hilly country near Mar Chiquita.

The discoverer is anxious to get up a company for the working of the enterprise, and intends placing the quartz on exhibition at this office.

The ground where the gold mine is supposed to exist belongs to Don Juan Bautista Peña, whom the discoverer wishes to take as partner in the business.

example, and it should be Oson's study that the public be fully made aware of the chastisement inflicted on this drunken officer of the law.

MAILS FROM ROSARIO.

The Ferro-carriil dates to the 20th inst.

The lawsuit of Don Adolfo Mancilla against Messrs. Brassey, Wythes and Wheelwright is to come off on Friday 26th inst, before Dr. Fernando Allende, Criminal Judge: the action is for damages sustained, last July, by the train running off the line.

"We are happy to say that the appropriation of railway lands in the province of Cordoba progresses favorably. Sr. Echeague has set out for Frayle Muerto, commissioned by Government to arrange with the land-owners, who have agreed to take an equal quantity of State-lands in other parts of the province.

"To-morrow (20th) is the day fixed to begin the great auction of lands ceded by the Province of Santa Fé in exchange for those expropriated by the Central Argentine Railway Co. They are in the district called Romero, and have grown into importance in the last two years; being now the only state-lands in the south, except those near Fort Meliucú.

"Romero was a wilderness only last year; and now there are 25 Englishmen settled down there—Messrs. Talbot, Richardson, Monroe, Cookson, Wheatly, Reynolds, Patton, Trail, Gape, &c., who will soon be joined by hundreds of others.

The O'Loughlin and Mackay dramatic Co. is playing at Rosario; also the Aymar American Circus Co. Some emissaries of the Mendoza rebels are said to have arrived.

QUARTZ DISCOVERIES IN THE CERROS DE PEÑA.

EDITOR'S TABLE.

We have already called attention to the very serious inconvenience arising from the levy on the lighters, and as the War Minister has not thought proper to introduce any reforms, the nuisance continues and the complaints increase.

We notice a protest by some of the Tribuna subscribers to Mr. Peña's letters: they are really very superfluous. The last Brazilian transport which left this port for Paraguay took up a quantity of gases, for the balloon expedition over Humaita.

An éstanciero from the Banda Oriental assures us, that for the last 6 or 7 years he does not recollect the camp in such a splendid condition as at present; sheep of a good class can be got near Mercedes at from 14 to 15 reales, but there are no sales.

The Arno leaves on Thursday, the 27th. We publish our packet edition on Christmas Day, as there will be no paper on Wednesday. We hear that it is probable Minister Octaviano and Baron Tamahdare will take the packet to Rio.

The Argentine Bank, we understand, has taken Mr. Medina's house, alongside the Provincial Bank, all the present tenants having received notice to quit.

Great disputes are now going on between cab-drivers and passengers. Some of these fellows ignore in toto the \$25 regulation, and now charge what they like; people therefore had better bargain with the coachman before they take a ride, as the coachmen are inexorable, and Cazon can do nothing.

There have been large sales of wool at Gualeguaychu, the highest price paid being 35 reales; but the complaint is general about the want of vessels. The houses in Gualeguaychu are all full of wool, and the principal holders are the shopkeepers.

The Mendoza Rebel Government has ordered the collection of the 'contribucion directa' for next year, and a new law of patents is about to be introduced.

MAILS FROM PARANA.

The Paraná of the 17th continues its polemics about the difficulty between the Bishop and the Freemasons. The only news from the army is that a reinforcement of 51 Corrientinos from Esquina and San Cosme had arrived at the seat of war.

From Santa Fé, 15th inst, we learn that Governor Oroño and his Minister had returned from Rosario. A grand dramatic performance is to come off at the Jesuit College.

IMPORTANT FROM AUSTRALIA.

The Kaikoura arrived at Panama on the 6th ult, with dates from Sydney to October 1st, and New Zealand, October 8th: she had 28 passengers, mostly en route for Southampton, and over £40,000 in gold.

Several important measures are now before the New South Wales Legislature, and others have passed into law. Among the latter are the Acts to establish Industrial Schools, and to establish Juvenile Reformatories.

The Tasmanian Government offer six per cent per annum on costs to any company that will lay a telegraphic cable between Victoria and Tasmania.

The Queensland Government has imposed additional customs duties, besides an ad valorem duty of 7 1/2 per cent. Stamp duties and the issue of Treasury Notes have also been enacted.

the new patent slip is progressing very slowly.

The news from Westland is of the same favorable kind. The influx of diggers from Melbourne continues to increase as the season advances, and the accounts from the various gold-fields are of a most satisfactory character.

The Great Southern Railway was to be opened as far as Rolleston point, about 15 miles from Christchurch, on the 15th.

The following remarks on the success which has attended cotton planting in Queensland are taken from the Queensland Guardian of September 19: "In spite of the decrease in the price of cotton, occasioned by the termination of the American war, and in spite of the inducements to the cultivators of other products, it would appear that those who have systematically entered upon the planting of cotton are sufficiently well satisfied, in many instances, not only to continue their labors but to extend the area of their operations."

A poll of the citizens of Adelaide, South Australia, was taken on the 25th Sept., on the question of lighting the city with gas; the result of the poll was in favour of it.

In South Australia, large numbers of laborers are besieging the Government offices for employment.

The discovery of an auriferous reef near the north bank of the Brisbane River is reported.

Initiatory steps are being taken in Melbourne for the establishment of an asylum for inebriates.

Some very valuable deposits of copper have been discovered within a few miles of Ipswich, Queensland.

There has been no important news from any of the gold-fields this month. No large finds have been reported, nor have any new fields been discovered.

The state of the country was flourishing, and people were hopeful as to what the future would bring forth. The agriculturists have not yet had time to experience the fruition of their hopes, but they have had encouragement for their further indulgence, and are more confident than ever as to a successful issue in return for their labors and anxieties.

At the date of our last monthly summary, says the Sydney Herald, the state of the country was flourishing, and people were hopeful as to what the future would bring forth.

The town has a goodly number of groceries, draperies, shoe-shops, inns, coffee-houses &c., in all at least 80, and a splendid hotel will be opened in a few days, in the plaza. The population is increasing so rapidly that there are over 300 azotea houses, including some of great elegance and richness, besides 600 houses with roofs of straw or French tiles.

LATEST FROM MEXICO.

(Via Panama.)

The intelligence to hand in regard to Mexico is very interesting. General Sheridan has recently issued an order from Brownsville, Texas, announcing that the Juarez government was the only one to be recognized in Mexico, warning all parties not to attempt to violate our neutrality laws, and denouncing Maximilian, Ortega and Santa Anna as "buca-neers."

The present Alcalde, Mr. Lacueva, is an excellent magistrate and well beloved by all. It is time for him now, to give names to the two great streets; the first might be called Calle Campeamento, as the site of the town was first used as an encampment for Paraguayan cavalry, to protect the pass of the river against the Indians who then held all the country north of same.

A bridge was projected so early as 1830, when D. Lucas José Obes was minister, besides another at Mata-ojo on the Canelones river: the plans still exist in the Government-house. That of Sta. Lucia was to have 5 spans of 20 yards each: there were several tenders for it, but Dr. Obes said he had sent to England for a draw-bridge, and the matter dropped during the endless political dissensions from 1836 down to the present.

At that time it was found about 100 waggons crossed the river daily, and now there are at least double that number, besides troops of cattle, &c. The necessity of a bridge is much felt not only for Sta. Lucia, but also for San José, Colonia, Poronogo, Durazno and Mercedes, the traffic of all which has to pass here.

DREADFUL HURRICANE IN THE WEST INDIES.

The Nassau Guardian of the 3rd, says the hurricane commenced on Sunday night, the 30th, at 8 o'clock, blowing all night from the north. On Monday morning, the barometer went down, and later the gale became stronger.

A part of the town of Nassau was destroyed. Trinity Church was completely demolished. The Government House suffered considerably and lost

a great part of the roofing. The entire roofing of the Military Hospital was carried away. From the Arsenal, West Bay-street, to Eastward, no one could pass, on account of the obstruction in the way caused by the ruins of houses, boats, fragments of vessels and of the wharves. The Arsenal wharf completely disappeared. Many of the houses and goods-stores that were thrown down were swept away by the hurricane, including the beef and fish markets. The catalogue of the property destroyed is very long.

The gunboat Nimble was thrown on the bank in front of the Arsenal, notwithstanding the great efforts of her commander and officers. She does not appear to have suffered, however, and it is hoped she will be set afloat shortly.

The Canal Company's steamer Relief is now hard and fast near the tower of the lighthouse; and the steamer General Clinch went to pieces near the public abutment. The only vessel that rode out the hurricane was the Minnie Gordon, as her spars and rigging were down.

The like weather has not been experienced since 1813. The most doleful accounts were being received daily of the effects of the hurricane in the adjacent islands.

The church at St. John and thirty-six houses in Harbour Island, had been completely destroyed, and the establishments upon Spanish Well, Current, Governor's Harbour, and Eleuthina have been completely swept away; Green Turtle Quay, Hop Town, and North Harbour are in ruins.

A correspondent, at Great Harbour writes that the hurricane has ruined all the estates, destroyed the cisterns of water, public schools, etc., and that the poorer classes were exposed to starvation. The sch. Victory sch. President, and bark Ticker, of New York, were lost here.

THE SUBURBS OF MONTEVIDEO.

FIVE DAYS AT SANTA LUCIA.

Santa Lucia is destined to be one of the most important towns in the Banda Oriental: it is in a charming situation and on the great highway from Montevideo to the camp. Its progress of late is astonishing, the Junta having given grants of building-sites to 80 different persons during the last two months. Last summer there were but 5 brick-kilns, and now there are fourteen, and yet bricks have risen from 9 to 12½ a thousand. Labor is scarce, and peons who earned last year 8 reals a day can now earn 12 reals. There are at present some 20 brick-layers, and 6 or 8 carpenters, but more than double the number are in demand.

The town has a goodly number of groceries, draperies, shoe-shops, inns, coffee-houses &c., in all at least 80, and a splendid hotel will be opened in a few days, in the plaza. The population is increasing so rapidly that there are over 300 azotea houses, including some of great elegance and richness, besides 600 houses with roofs of straw or French tiles.

TRIAL TRIP OF THE STEAM-TUG LUZIA.

The difficulties to be surmounted in this country in order to achieve something new, and at the same time useful, are of such magnitude, that few have the courage to propose, much less to carry out, such enterprises, especially on their own personal responsibility. We have proposals for steamboat mail companies, with Government subsidy, railway companies with Government guarantees, telegraph companies, banking companies, dock companies, with innumerable shareholders all over Europe, assisting by their means these enterprises, which in course of time will probably yield a good return to those who may be interested in them.

On Thursday last, while the 'wire party' were receiving ovations and being crowned with flowery wreaths, by the fairest hands in this southern clime, while the railways were pouring their treasures into this great emporium of South America, the new model steamer Lucia quietly made her trial trip.

She steamed out of the Riachuelo, and succeeded in navigating the 'canaleta' with only 23 inches of water, made the circuit of the outer roads, and in passing saluted the Arno, which was returned with three British cheers. After steaming from the Arno to within a stone's throw of the Mole (which was done precisely in 20 minutes), the Lucia then made for the Boca, and in order to test her towing powers three of Mr. Hall's largest heavy iron-lighters, deeply loaded, were attached to her, when she bravely walked off with them (to the great chagrin of the 'patrons' of at least 300 wind and water-bound lighters of the old model), and in a very short time left her charge within hail of the vessels to which they were bound.

Santa Lucia.—D. Cayetano Gavazzo, D. Juan Garcia Wich, D. Alejandro Ohncarro, and D. Francisco Molé: the last-named built the windmill that overlooks the picturesque valley of Santa Lucia: this place will be ere long the pleasure resort of the citizens of Montevideo.

NEWS FROM THE CAMPS.

WEEKLY REPORTS FOR 'STANDARD,' SAN PEDRO.

San Pedro, Dec. 6, 1866.

To the Editors of the Standard, Gentlemen,

There is little news of importance. Boats are extremely scarce; all kinds of prices, from \$4 to \$5 mpc, are being paid, whereas last year \$2½ to \$3 mpc. was the current price. Good sheep can be bought for \$20 mpc.; cattle \$60 per cut. Plenty are anxious to sell cattle and invest in sheep at these prices.

In the village, one or two days ago, I hear of a Mr. Andrada's 'capataz' having wounded one or two soldiers in a pulperia: he has been sent to San Nicolas, and from thence will be, no doubt, forwarded to Paraguay. The stores in this neighborhood are doing a splendid business: the one owned by Mr. Leslie, of the Estrella del Norte estancia, since changing managers, has improved wonderfully, and does the spirited brother of Mr. Leslie's mayor-domo much credit. Unfortunately about all almacenes there are vagabonds in plenty—your humble servant had the pleasure of finding on his return home the other day he was minus a valuable knife and handkerchief: since then I have also heard there were about 13 valuable rings stolen.

Good steady men can always find employment here at from \$250 to \$300 per month.

A San Pedroino named Garai has at last been brought to justice. He has committed many petty thefts. He recently entered the rancho of Mr. P. Moore and decamped with \$5000; he also entered the house of Mr. Jas. Kehoe, taking with him a watch and several articles of clothing. It is to be hoped he will be made an example of.

PROFESSOR HERMANN.

The popular and benevolent prince of wizards has returned from Chascomus after two very successful performances in that town for benefit of the Invalidos. Mña. Hermann also sang on the occasion, and the arrangements were got up under the direction of D. Santiago Estrada and the Municipality.

The professor is going to perform on Sunday for the Lorea bazaar, where they are fitting up a temporary theatre with 1000 seats for ladies. The benefit for the sufferers by the inundations in France has realized, we believe, over £300 sterling.

Mr. Hermann now proposes a benefit at the Coliseum for the suffering citizens of Quebec, where 20,000 people were left homeless by the recent disastrous fire. He requests us to invite the British Minister and residents to form a committee and arrange details: the whole receipts are to be for the purpose specified.

IMPORTANT AUCTION. The undersigned, National Commissioner for the expropriation of the lands of the Great Central-Argentine Railroad, informs the public that on the 20th, 21st, and 22nd of the month of December next, will be sold at public auction, in the City of Rosario de Santa Fé, by the auctioneer Mr. James J. Wild, and for account of the National Government, all or part of the area of the public lands ceded to the said Government by the law of 6th March, 1863, by the Provincial Government, and the product of which is to be applied to the purchase and payment of those lands, property of private individuals, lying within the zone conceded to the Company of the said Central Railroad, by contract with the National Government dated 19th March, 1863, and sanctioned by the National Congress on the 26th of May of the same year.

The tract offered for sale lies to the W. and S.W. of the capital of Santa Fé at a distance of from 12 to 22 leagues; from San Gerónimo de Coronda 13 to 18 leagues; from the Colonias de Esperanza and San Carlos 8 to 15 leagues; and from the line of railroad, at its nearest point, 8 leagues; the average distance from the coast of the River Paraná being about 18 leagues.

The part of these lands measured by the Surveyor General, consists of lots of from two and a-half to four superficial leagues each, making in all one hundred and thirty-one and a-half leagues (131 1/2); and the part measured by the Engineer Campbell contains twenty lots of various sizes from two to five superficial leagues each, making in all fifty-two leagues (52); forming a total of one hundred and eighty-three and a-half square leagues (183 1/2), as is demonstrated on the corresponding plans of the property, which may be examined by the public from the date of this advertisement.

These lands are bounded on the N. by their extreme point by the line of military posts, and in the vicinity of a reserve destined by the Government of this Province for an agricultural colony, on the S. by lands of the Public Domain and others belonging to Mr. Samuel F. Lafone; on the W. by lands of the Public Domain; and on the E. by Public Lands, by the property known as Las Prusianas of D. Martino de Elia; by lands belonging to the Colony of San Carlos, and others belonging to Mr. Tesodoro Santa Ana, Mr. Talbot, and other English proprietors; who have lately purchased in that locality a tract of fourteen square leagues for the purpose of establishments of estancia.

The description of these lands and other circumstances, in reference to their sale, which may be required by the Public, will be seen in the Auctioneer's advertisement, published simultaneously with this; and for further information application may be made to him, or to the Committee, Calle de Aduana, No. 100.

JUAN M. PERDRIEL, National Commissioner, Rosario de Santa Fé, Nov. 2, 1866.
