The Standard. WEDNESDAY, JANUARY 23, 1867.

LATEST FROM MONTEVIDEO. (BY ELECTRIC TELEGRAPH.) Montevideo, Jan. 22, 4 P.M. Weather fine; light southerly wind; therm., sunrise, 62—2 o'clock, 70. First regular business meeting at the Bolsa to-day; very well attended; a disposition to make it popular. Bolsa Stock at a premium of from 2 to 5 per cent. Nine hundred recruits for the Brazilian army arrived yesterday. ARRIVALS. Rio Paraná, from Buenos Ayres, with 150 passengers. Brazilian brig Concepcion, from St. Catharines.

NEWS FROM EUROPE.

THE NEW STEAMER IRONSIDES. DATES TO DEC. 15. The Brazilian transport San José brings dates from Rio Janeiro to 14th January. The Tocantins arrived at Rio from Pernambuco with Lisbon papers of 15th December, brought by the new Liverpool steamer Ironsides. The insurrection in Candia, which was supposed to be extinguished, has blazed out afresh and with greater force, so much so as to cause serious inquietude to the Turkish Government and threaten complications in the East. Reinforcements were to leave Constantinople immediately, under the command of Omar Pacha. The consolidation of the new empire of North Germany meets with grave obstacles. It appears that the Cabinet of Berlin directed the Governor-General of Hanover to suspend all the public employes, their fidelity being considered doubtful, to imprison in the fortress of Minden the Hanoverian officers suspected of fomenting discontent, and to try by court-martial any seditious persons insulting the Prussian uniform. In Venice there was an outbreak of the working-classes in the first week of December, the mob assembling on the Grand Canal and shouting for "bread and work." The authorities succeeded in inducing the rioters to retire to their homes, and ordered the works of the canal to be commenced without the intervention of any company or contractors. The laborers thus finding employment order was restored. Letters from Vienna represent the city a prey to the most fearful misery, and numbers of suicides occurred daily. The rumor gains ground of the Greek church seeking to be reunited under the Pope of Rome: a great number of Greek patriarchs and clergy have communicated their desire for the step.

The Queen of Spain and court left Lisbon, to return to Madrid at 3 p.m. on the 15th, being accompanied by the railway-station by King Luis and his court. Hopes of an arrangement between King Victor Emmanuel and the Pope are now more likely to be realized: Counsellor Torello left Florence for Rome, charged with a new mission and commissions in favor of the Vatican. The latest telegrams received at Lisbon were as follows:—

Paris, Dec. 14. The Monitor of yesterday publishes a telegram from Marshal Bazaine, dated Mexico, Dec. 3, in which he stated the Emperor Maximilian was still there and had as yet taken no definitive resolution. Generals Sherman and Campbell had arrived at Vera Cruz on Nov. 29, and started for Mexico on Dec. 3. It is thought their mission is a conciliatory one. The Empress Eugenie will shortly leave for Rome. Darmstadt, Dec. 9. General Stockens, who was to be tried yesterday by court-martial, committed suicide. Civita Vecchia, Dec. 10. The French frigates Mogador, Labrador, and Seine have arrived; another is expected, and then the troops will begin to embark. Florence, Dec. 10. Counsellor Torello has left for Rome.

IMPORTANT FROM UNITED STATES.

DISSENSION OF PRESIDENT AND CONGRESS. THE MEXICAN QUESTION. The American yacht Witch Queen arrived at Rio on the 13th, with dates from Boston to Dec. 4. Pres. Johnson's message to Congress was badly received. A motion was made to suppress the reading of it, while in the middle of the document, and the reading was only carried by a majority of one vote. A bill was afterwards carried by 111 votes to 29, depriving the President of the faculty given him by law of July 17, 1862, to give an amnesty to parties implicated in the rebellion. The Finance-reports are the ensuing year is calculated thus: Ways and Means, 436 million dollars; expenditure, 350 millions—leaving a surplus of 86 million dollars. The National Debt reduces last year 31 millions, amounting now to 2,650 millions. The revenue last year was 90 millions more than calculated, and the expenditure 200 millions less. The navy has been greatly reduced, comprising now only 278 vessels, carrying 2,351 guns and 13,600 sailors. The Brooklyn Flint Glass Works have been burnt down—loss \$500,000. The General in command on the Rio Grande frontier has received orders to observe strict neutrality in the affairs of Mexico.

BRAZILIAN MAILS.

IMPORTANT NEWS. FORTNIGHTLY REVIEW. (From the Anglo-Brazilian Times.) The weather during the past fortnight has been an almost continuous pour and the oldest inhabitant cannot recollect such a season of extraordinary and lasting rain. Under such circumstances little animation was to be expected, even had the holiday times of Christmas and New Year not occurred. Preparations for the fast coming resumption of operations in Paraguay are still unabated, and besides munitions 1,500 men have been forwarded to join the army. The provincial levies are coming forward more rapidly and will probably in most part have reached the army in Paraguay by the beginning of the coming month. In this as in most other matters the retarding influence of the rains has been greatly felt, and it is likely March will come before the onward movement will be made, but this will afford more time for the organization of the army corps which the Baron do Herval is forming in Rio Grande with the object, it is believed, of a concerted flank attack from another point. To meet certain calls upon the Treasury a supplementary credit of 2,422 3618 has been granted to the Ministry of Fazenda. The Chili legation has been separated from the Pacific legation, and has been placed in charge of 'Charge d' Affaires Sr. Francisco Xavier da Costa Aguiar de Andrade. A large list of promotions in the Imperial Orders has been published, and among others Mr. Pearson, the British vice-consul at Valparaiso, has been honored with the dignity of knight of the Rose for services rendered to the Empire. The title of Baron de Bambuly has also been granted during life to Sr. Francisco das Chagas Andrade. Dr. Francisco Ignacio Marcondas Homem de Mello has been appointed president of Rio Grande do Sul and has started for that province to assume its charge. By order of Government the Brazilian mail packets will henceforth leave Rio for the North on the 1st and 15th, of each month, so as to alternate with the foreign mail steamers. In the British Agency here the money order system is in force, and mail matter for the River Plate can

be prepaid, as far as the sea postage is concerned, at lowered rates. St. Thomas has been declared a port infested with yellow fever, and vessels thence as well as from Dutch Guyana, Loanda and Dalker will be put under surveillance. The new communitate Bank of Mauá & C^o has gone into operation with a capital of 10 000 000\$. This bank includes all the banks in the River Plate and elsewhere carried on in the same name. The Correio Mercantil and the Diario do Rio have changed hands, the former becoming the property of Srs. Cardoso & C^o and the latter of Sr. Sebastião Belfort. The Russian gunboat Garnastoy has sailed for Behring's Straits to join the United States gunboat Mohican for the purpose of aiding in the laying of the telegraph connecting North America and Asia and which crossing Russia will form a second line of communication between Europe and the New World. The first Hawaii vessel seen in this port arrived upon the 26th December with a load of flour from Valparaiso. She is the bark E. T. L. The Baron de Penedo, president of the Brazilian commission to the Paris Exhibition has been nominated member of the Jury of Special Rewards; and the Visconde de Barbacena, Commandador Manoel de Araujo Porto-Alegre, Julio Constancio Villeneuve and José Riveiro da Silva, members of the commission. The news from the provinces has little variation from the usual tenor of events within them. The levies were coming forward rapidly from the interior and some have already received transport. Pressing for the army and navy, and drafting from the national guard were to cease about the 6th January, 30 days before the elections, in all the provinces except Rio Grande do Sul, where the elections have been postponed sine die to permit of the formation of the third army corps organizing there in haste. In Maranhão the explorations of Mr. Nathaniel Plant and Judge Dr. Polycarpo de Leão have, besides establishing the great value of the copper mines of Chapada, shown also that steam river navigation is practicable, with a little expense, nearly to these mines. From Amazonas we learn that the apprehensions as to the fate of the long absent surveying expedition up the Jannaro have been in part realized. Lat. S. 69 50' was reached with labor. There, however, the enmity of the Indians was provoked by the cutting of their foot logs across the river, cut to allow the boats to pass, and they attacked the two boats with arrows. The crews landed to repel them but were overpowered, their commander mortally wounded, the other officer severely and five others more or less hurt by arrows. However they succeeded in getting away with one boat; but the last surveys, of some 70 miles, were lost. The Codó mines did not present the value supposed as coal mines, the beds being thin, but Mr. Plant has ascertained by analyses that the bituminous schists abounding there yield largely, by distillation, in coal oil of fine quality. Towards the interior of the province the Indian outbreak there, noticed previously, had assumed greater proportions, and some further massacres had occurred of the traders and others in the Indian region. The British Ship Metropolis, Captain Chaston, from St. Johns with coal for Rio, was lost upon the reef to the north of St. Roque. The crew were saved. 793 of the 1080 convicts at the island of Fernando Noronha are to receive pardon and rejoin the army to go to Paraguay. The crimes of the other 290 are judged too serious to permit this remission being conceded to them. In Bahia a defalcation to the extent of 266,000\$ was discovered on the 22d, ult. in the coffers of the Bank of Bahia, that sum in notes having disappeared from the safes, during the preceding week, without leaving trace of how it occurred. Two arrests were made and 10,000\$ have been offered as reward to any one who will discover the mystery. The disease in the sugar cane around Eazareth continues, becoming more and more serious. Writers are in consequence advocating the cultivation of the Otahete variety in place of the Cayenne, which they considered has become utterly worn out, diseased, and comparatively unproductive since its first introduction.

OUR BRAZIL CORRESPONDENT. R. Janeiro, 8th Jan. 1867. To the Editors of the Standard. Gentlemen, I wrote you by the Arno, which left this port on the 6th inst., in charge of her new Commander, and will probably have had a rough passage down, if the weather here may be taken as a criterion of what it is further south. I think you should make enquiries in the competent locality respecting the Standard sent by the English mails to your Rio subscribers. We do not know here where the blame lies; we only know, to our great annoyance, by the English mail the pa-

pers are rarely forthcoming at our Post-office here, where the Brazilian officials confidently assert they have not been received. By the French for some reason or other we receive our papers far more regularly, so that there is evidently a screw loose somewhere, and it is high time for you and your subscribers to find out by your united efforts where the "hitch" lies. In consequence of the continued rains the traffic of Dom Pedro II railway is again suspended, and the damage done to the cuttings and embankments is said to be very great. The Commercial Bank has announced a dividend of 1200 per share, equal to 12 p. per cent. for the half year ended on 31st, ult. A new edition of 'Brazil and the Brazilians,' corrected and revised with additional information and statistics up to the present time has been published by Mr. J. C. Fletcher, and is now on sale here at a very reasonable price. The average temperature during the past month or five weeks here has been only 73 Fahr. in the shade. The Baron de Penedo (Sor Carvalho Moreira) has been appointed by the Brazilian Government President of the Commission which will represent Brazil at the Paris Exhibition, and also member of the Jury of special prizes lately constituted by the French Government. A murder was committed on the night of the 6th inst. in the house No. 75 Rua do Hospicio. The victim, a colored woman, was found yesterday morning lying dead on the floor of her sala, with four stabs in the region of her heart. No one in the house or neighborhood witnessed the fact or observed anything to arouse suspicions of the perpetration of the crime, so that the murderer is at present at large, and no clue has as yet appeared to raise a suspicion on any party, but the police have taken the matter in hands. Exchange on London closes at 23 3/4 for Bankers drafts and 23 1/4 to 24d. for private bills. Some Treasury Bills (English) were passed at 23 1/4. On Paris the rate closes at 390rs. to 402 p. fr. On Hamburg the rate is 75rs. p. M-B. Brazilian gold is quoted at 12 p. per cent. Sovereigns 108 2/5 to 108 3/4. Bank of Brazil shares, dividend paid, \$175. The total amount of the Internal funded debt of Brazil is 185,078,100\$000, and of the Foreign £14,615,600.

THE WAR OF THE ANDIENS. ROSARIO ADVICES. GENERAL GLANCE. (FROM OUR OWN CORRESPONDENT.) Rosario, Jan. 18, 1867. Gentlemen. The weather since the 'norther' of last week has been pleasantly moderated by cooling breezes, and is by no means uncomfortable. Altogether, with due respect to your theory of the approximation of the earth to the sun, the summer has been, up to the present date, colder than the general average. During the months of November and December we had scarcely a hot day, six days at the commencement of the year being the only oppressive ones we have experienced. This weather has been favorable for the harvest, and the greater part of the wheat crop has been secured. A considerable quantity has been cut by reaping machines, and an important saving of labor has been effected; but on the other hand, the peones look on these machines with an evil eye, and have in many cases refused to work on the farm where they have been used. This, added to the scarcity of hands, has made the harvest work very backward this season. To-morrow we have elections for three municipalities. As usual, there is an official ticket and a popular one, and as usual, I suppose the former will triumph. The names on the popular ticket are—Messrs. Andres D. Millar, Pedro A. Eclague, and Luis Lamas y Hunt. All respectable and good men. I am sorry to see in Rosario the authorities putting forth a ticket to be voted for by the vigilantes, changadores, &c.—people who don't know what a Municipality is. The members of this body itself will vote the popular ticket. The news from the Andie provinces is not consoling by any means. Gen. Paunero confirms the defeat suffered by Campos, the Governor of Rioja, at Poeitos, near San Juan. The want of regular troops will probably frustrate Gen. Paunero's plans, as there is no faith to be placed in the provincial national guards under his command. If he retires from San Luis, that province will undoubtedly be 'en masse,' and join the rebels. The "Puntanos" are wild for Juan Saá, and wear his portrait round their necks along with the image of their devotional saint. What can we expect from such people? The poor wretches, without one single spark of patriotism to inspire them with a sentiment in favor of their country's well-being, will allow themselves willingly to be led to the slaughter by any ignoble local chieftain. The gauchos, who refuse to fight their country's battles with a foreign foe, and for which they would be well paid and well cared for, and honoured for their

patriotism, precipitate themselves with alacrity into the horrors of civil war when there is, for them at least, absolutely nothing to gain by such doings, but everything to lose. Were it not undignified in a respectable nation like this to allow these misguided men to cut each other's throats, I should like to see Santa Fé, the key to the Interior, well secured against marauders, and then let the Upper Provinces fight it out until exhaustion settled the business. They should be left to their own way for a couple of years, to be thoroughly convinced of the despicable figure they would display without the help, the example, and the civilization of the Litoral. But this cannot be. The revolution must be put down, and put down thoroughly. The Government has abundant resources for the work, the only difficulty being that the greater part of them are now in Paraguay. But in order to take time by the forelock, we ought to have three thousand regulars from the army, or at all events a sufficient number to form a firm nucleus for the good men of the country to rally round. The main object is to isolate Santa Fé from the contagion, because, as I have said, this province is the key of the Republic, and as long as we are quiet here, revolutions in the Interior can never have the slightest effect on the general progress of the 'Litoral.' As far as I can hear there is no danger of any seditious movement in Santa Fé. On the contrary, the very best spirit reigns, except perhaps that a few restless spirits look upon the revolutionary movements as offering an opportunity for overthrowing the Government of Sr. Oroño. The Governor of Santa Fé having despatched the vanguard of the expeditionary force, under Colonel Nelson, to the Chaco, is about paying another visit to Rosario. Nelson takes up 300 men. On the 10th the force had arrived at the colony of Esperanza. Judging from the route they have taken, it seems that this expedition intends going up the right bank of the Salado, probably with the object of crossing at Aguara, and taking the tribes established between the Saladillo Dulce, the head waters of the Saladillo Amargo and the Salado, 'a retaguardia.' The intelligent surveyor, Mr. Toribio Aguirre, accompanies the expedition, and from him I expect to be able to procure a good deal of information. Last night the ladies of Rosario gave a concert in favor of the 'Invalidos.' It was very well attended, and although the performers were all amateurs, the music and singing was very creditable. I see by the Standard that you complain of the general rise in prices of articles for household consumption. I am sorry to see that you are not singular in Buenos Ayres. The expense of living in Rosario has been augmented at least 50 per cent. within the last year, and articles on which the war can have had little or no effect: such as double the price that it was last year; bread is out of the reach of poor people; vegetables, eggs, poultry, and milk are excessively high. The income that sufficed last year for all the wants of a family, goes now to supplying the table alone. The general property, however, is on the increase: commerce is extending itself; buildings are going up in all directions, many of them very handsome edifices, and within a few months three or four retail establishments have not only eclipsed our old ones, but can compare favorably with the finest of Buenos Ayres. One improvement I will mention. Our ladies have no longer to buy their ribbons and dresses from lazy, vulgar clerks, and proprietors in their shirt sleeves and cigar between their lips. The new establishments have well-dressed, attentive people behind the counters. In another letter I intend giving you a list of our principal houses, and will try and get data on various other subjects, for it behoves our foreigners to work hard for the land of our adoption, and fill our only English paper with information on every subject, and more particularly on those eschewed by the native press as undignified and unnecessary. Immigration, commerce, agriculture, mining, &c. The commission for expropriating the lands for the Railway Company is getting along, though slowly. The state attorney, however, has commenced his operations, and this will hasten the business. Several proprietors, however, have arranged amicably. The National Government is acting in this affair with considerable generosity. Although empowered by law to expropriate the lands at the value they would have had had there been no talk of a railroad, the Government has offered prices that in many cases it would be difficult to get in the market. These prices vary from 2,500 to 15,000 Bolivian dollars the square league. It is supposed the amount obtained by the sale of the Provincial lands in December will be amply sufficient to cover the value of the expropriated lands, some thirty-five square leagues. I remain, Gentlemen, Yours truly, W. P.

THE WAR IN THE NORTH. FULL DETAILS FROM HEAD-QUARTERS. FIGHTING IN THE WOODS. We call from the columns of our Correntino, Montevideo, and city colleagues the following items, which, in the absence of a special correspondent, will keep our readers acquainted with the state of things up the river. The other evening all was excitement in the camp; no one knew what was up, but some advices of the great importance had come to hand, as all the troops were ordered to sleep with their arms in readiness, lighted matches for the guns; nine rifled guns had been mounted near the Laguna Piris in the day time; the night however passed without anything novel; some guerrillas in the woods, nothing more. On the morning of the 7th a Paraguayan deserter crossed over, who declared that Lopez had just received four brass cannon of heavy calibre, which he had mounted at Curupaity. On the 9th a Paraguayan crossed over, who stated that he belonged to the 40th regiment, and that the explosion the day previously at Curupaity killed 20 men and wounded 48, besides blowing up about 400 bombs and shells of 68 and 80. On the morn of the 10th we heard tremendous shouting in the Paraguayan camp, and a stiff fight occurred in the woods with the Brazilians; a Brazilian Captain was cut down with several of his men in the fight. The Oriental division at headquarters is very hard up; uniforms all worn out and no shoes. The regiment looks like a Paraguayan force, it is so badly off for clothes. Captain Galiano with a Paraguayan deserter was sent up on a special commission to the Brazilian squadron; it appears that the Paraguayan, whose name is Bonifacio Bardon, is very intelligent and knows all the passes in the river. On the 14th inst. the guns of the squadron and Curupaity were at work, and the belief amongst our officers is that this place is completely exhausted. Lopez is living in the Paso Brit encampment, and has despatched a force to look after some 'Montoneras.' The great row about Caeceres has been laid before the Commander-in-Chief, who replied that the case should be taken before the Federal Judge, and if he was ordered to appear he would make him obey. But the best and most detailed version of things at head-quarters is doubtless to be found in the last letter of Matto's to the Nacion. This correspondent is a 'proveedor' of the squadron, lives on the gunboats, and knows everything that passes. He says in the last attack on Curupaity the firing lasted five hours. The Araguay, Yguatemy, and Coimbra entered lake Piris; no iron-clad attempted to enter. Captain Mamede commanded this squadron, and threw 360 bombs before the enemy replied. Mamede, seeing that the Paraguayans would not respond, began firing into the woods, where he thought the enemy might be hiding. All that is said about the enemy's loss in this affair is 'bosh.' No one knows if they ever lost a man. At the same time, and while this was going on, three iron-clads, Colambus, Bahia, and Tamandare, steamed right up to Curupaity, and fired away every class of projectile, the enemy only firing a few shots. About the iron-clads going up above Curupaity, and near Humaita, is all nonsense. The iron-clads and the army are precisely in the same position to-day as the day after the memorable 22d September. The Tamandare and Barroso went up much higher on the 8th. The new ironclad Sinbad arrived here, and two days after the Cabral. Both are lying off Cerrito in the Paraguayan river. Admiral Ignacio has published an order of the day, making sweeping changes in the commanders of the vessels. The iron-clad Brazil will leave shortly for Rio. She has suffered so much she cannot be repaired here. When she arrives at Buenos Ayres people ought to go and see her, and then form a correct idea of the war. The gunboat Belmonte is also done up, and has been ordered to Rio. On board these vessels several officers of the fleet return to their native country. The Paraguayans now have mortars, which on the 13th opened fire on the Brazilians at Curuzú. The iron-clads at once opened fire on Curupaity, which lasted for over an hour. On the 15th instant a Brazilian officer, Colonel Antonio Pexioto de Acevedo, dropped dead at Curuzú. He served under Port Alegre, and was a brave officer. To-day (16th) I leave for Curuzú, and shall continue sending you all the news as usual. The soldiers are now busy making large 'galpones,' nobody knows for what. The horses are in good condition, and bay keeps arriving. I remain, Gentlemen, Yours truly, W. P.

OUR LATE CHIEF OF POLICE. We invariably feel regret at losing an old neighbor, or seeing a public servant of many years' standing disappear from the scene of politics. The Standard has had many a squabble with the late Chief of Police, but not the less is it foremost in paying him a parting salute, and calling to mind the better qualities of the man, while we overlook the foibles of the magistrate. Don Cayetano Cazon sent in his resignation on Monday, in reference, it is said, to the extra energetic measures of the supreme authorities in the present critical times. He was Chief of Police for more than 6 years, and served all that time without salary or remuneration. He was a well-intentioned man, but somewhat rough and stubborn in his way of doing things; he was above bribery, and of a very kind disposition. The worst his adversaries could say of him was, that he was not fitted for the post, nor sufficiently active and penetrating. He rendered good service in improvements in the suburbs, and would, no doubt, have done much more if the Municipality gave him more funds. He was always at his post on public occasions, seeing personally that the vigilantes kept order. His successor, Don Emilio Castro, who held the same post during the troubled times of 1859 and '60, is a much more active man; and this was perhaps the reason why the National Government now accepted the resignation of M. Cazon, so often refused before. In the hurry of the present moment we can only offer M. Cazon our compliments, and testimony to his good intentions; and at the same time salute the new magistrate, hoping we shall be able to maintain a complete entente-cordiale.

EDITOR'S TABLE.

The retirement of Cazon brought us rain, as if nature sympathised with the Policía, and the very elements wept at the loss of Buenos Ayres. The new Chief of Police is a first rate man, and, we believe, speaks English; he is not himself a subscriber of the Standard, but some of his near relatives are. There was a great 'ereciento,' or flood-tide, in the River on Monday evening. The water completely covered Paseo Colon, and the waves beat around the old brick establishment, near where the great coal mines were thought to exist. The railway, however, suffered no damage. We have just learned that the Welsh Colony of the Chubut is to be wound up. Minister Rawson, of course, in the present state of affairs, could not accede to the colonists' application for another year's provisions, but offers to remove them—either to Patagones or Santa Fe. We hope to have further particulars of the affair for our packet edition. Yesterday we had no news from the Interior, but to-day the Rosario boat is expected, which will probably bring news of importance. Through a slight mistake at our office, a private telegram, of no public interest whatever, from some friends who had been inaugurating the new Bolsa at Montevideo, found publicity in our columns of yesterday. The telegram is a novel message in such stormy times, and possibly refreshing to the general reader. We notice in our riverine exchanges that there has been a tremendous storm in Entre Rios: houses knocked down, trees pulled up, and immense damage done to property near Nogoyá. Mr. Proudfoot, of the Telegraph Co., left Montevideo yesterday for Rio Grande: we wish him a pleasant voyage. His name is identified with River Plate progress, and we hope to see him soon back again in Montevideo. The Bolsa of Buenos Ayres has passed a most complimentary note to the Provincial Government, congratulating the Governor and his Ministers on the admirable working of the Bank Exchange-office. We fully concur in the expressions of the Bolsa Directors: the Exchange-office Bill has worked immense benefit for us all, by stopping speculation and making money cheaper; and the members of the Provincial Government, particularly the talented Minister of Hacienda, merit the highest eulogium for this great reformatory measure. We received the following telegram from Montevideo yesterday at noon:—'The inauguration of the Bolsa passed off well. Mr. Proudfoot leaves for Rio Grande at 4 o'clock. Nothing particularly new.' Respecting the very grave charge made against the owners of the light-ship, we have made many enquiries, and are happy to say that the affair seems to be a great exaggeration, inasmuch as only a few weeks past a vessel with fresh provisions for one month was despatched thither. We have full reliance on the statement of Capt. Shore, but, from what we can learn, the crew of the light-ship must have exaggerated their real condition. Owing to the general citation of Nat. Guards going on, we are much inconvenienced, as three of our workmen belong to the Guards, and an office boy we had for folding the papers

HOTEL BELGRANO.

WATSON'S Fine Army Bed Rooms. WATSON'S Delicacies Breakfasts. WATSON'S Hearty Dinners.

THE PANTECHNETICA.

88 Calle Rivadavia 88. For a Good Clear. For a Good Tobacco. For a Good English Pharmacy.

SAVINGS BANK.

BANK MAU & CO. 101-Cangallo-103. BUENOS AYRES.

The immense advantages of Account Current are now so generally felt and appreciated in the two great emporiums of the River Plate.

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.

F. Sprunck & Co.

93-CALLE ZAVALLA-93. Agents for the 'Standard', have constantly on hand, Pianos of Pleyel, Wolff & Co. Paris.

Bate & Co.'s Photographs of the War. (1865-67). A small lot of these pictures still on hand at Lodel's Book Store will be sold at the remarkably low price of 100 DOLLARS A SET.

These views, taken at the Paso La Patria, Itapua, Boqueron, Potrero de la Cruz, Tuyuti, and other points of importance, by Don Javier Lopez, commissioned by us and presented by the Oriental Government, are invaluable as mementoes from their historical interest as from their giving a faithful portrait of the horrors of warfare.

Several thousands of these views having been already distributed in Brazil, the Banda Oriental, Corrientes, Rosario, Salto, &c., the original negative plates have become worn out, and we strongly advise any wishing to obtain a correct idea of the War with Paraguay, as seen through the camera obscura, to improve the present opportunity, as no other of these views will ever again be put in the market.

To be Sold. Three-quarters of a League of Good Camp in the Partido Lanin, with houses, corral, queros, &c., known as the Estancia de la Cañada del Sauce; also 1,600 to 1,700 head of Jornero cattle, some horses and mares, &c. For further notice apply to Albert Mohr, Grocer and Tea-Dealer, Salto.

Good accommodation for horses, carts, &c., to be found at same place. All kinds of commissions taken, judiciously and on the most liberal terms. ALBERT MOHR, GROCER AND TEA DEALER, SALTO.

GALBRAITH & HUNTER. Beg respectfully to call the attention of their numerous customers to their present large stock of Plain and Fancy Weaves and Serges.
