men to press the Dutch Government to withdraw from the negotiations with France: thus the question might be dropped without bringing the Cabinets of Berlin and Paris into collision. The policy of strict non-intervention which Lord Stanley has laid out for his guidance may, we are led to believe, be on this occasion slightly departed from.—Orel

TROPICAL SKIN DISEASES. In hot climates the skin is stimulated to excessive action, and an almost infinite variety of cutaneous and dermal distempers are the results. Prurigo, or constant external itching, without much apparent inflammation, spotted acne, caused by sluggishness of the skin, scaly eruptions, pustulous pimples, pemphigus, or water-pimples, Rosacea, or false measles, crusted tetter, and rashes of almost every shade, from light pink to the deepest crimson, may be mentioned among the number. These, with all other external eruptions caused by heat, are safely and speedily removed by Bristol's Sarsaparilla, the most wholesome of all vegetable detergents. In all skin diseases, the bowels should be kept laxative by using Bristol's Vegetable Pills at the same time as the Sarsaparilla.

ON CHANGE. June 7, 1867. Ounces, \$400. Sovereigns, 225. Patucos, 123. National Bonds 563. The Bond market ruled slightly quieter to-day. The amount sold for cash shows that holders will not sell, whilst the sales on time betray a very serious speculation. Owing to the number who have lost heavily by selling short, and the extreme difficulty in obtaining Bonds, save by buying in the regular way, it is said that no broker of any position now deals without having the Bonds; but this supposition seems very extreme, and close observers attribute the present rise in prices to nothing more nor less than the bears are driven into the market to make good their transactions. Differences between the selling and buying prices are rarely exceeded. The Bonds, and nothing but the Bonds, will do. Where the market is at present from the 15th to the end of the month, the sales maturing are said to be unusually heavy, and, for the most part, these Bonds have to be bought now. In fact, if the news from Europe is of a peaceable character, the bulls will have the market all to themselves. To-day several heavy sales for the middle of July were made, but by parties who are known to have the Bonds, still the price is high, after the payment of the coupon, astonishes all. The market rules firm, and in the liquidation-room prices showed an upward tendency. In Exchange the rate ruled at 48, although we heard to-day of some bills at 49. On Franco some small bills passed at 5.10, but there few drawers. Sovereigns are again in demand—two sales made to-day at a premium of four reales per gold; this has been bought to be shipped. By telegraph we learn of an Exchange operation on Franco for 400,000 francs at 5.30, and the sale of 15,000 dry hides at 48. The Everett had again suspended her sailing, and it was dubious whether the Rio de la Plata would leave or not. In the wool world there have been a few small sales in the deposits at 570, and some borra wool in the carts at 550. Dry hides still readily, but very few are coming in from the country; those from the rivers are at once taken up—14,000 Entre-ríos at 43 1/2, and from 5,000 to 6,000 Correntino at 36 1/2. The army hides seem to be kept up in Corrientes at present. In wheat and maize there is speculation going on: last sales—wheat 260 per fan, maize 90 per fanega.

SPANISH MERINOS AND THEIR MANAGEMENT. BY HENRY BOYNTON, WOODSTOCK, VERMONT, CORRESPONDING SECRETARY VERMONT STATE AGRICULTURAL SOCIETY.

But a little more than fifty years ago the first pair of Spanish merinos ever introduced into this country were brought to Cambridge, Massachusetts. So little knowledge of their value had the man into whose hands they came, that they were butchered and eaten. Now, two or three thousand dollars for a single ram, and as many hundreds for a ewe, of this same breed of animals, is no unusual price. Such has been the change in the public estimation of this class of sheep, in little more than a half century. And the man who should now be found feasting upon thorough-bred Spanish mutton would be classed as a near relation of the woman in the fable, who killed the goose that laid the golden egg. Indeed, such is the zeal now displayed by the devotees of the famous stock, that it is a matter of serious question with some, whether, at this day of almost universal intelligence, when nearly every one knows something of almost every subject that comes before the public mind, these men, "gone crazy" on the sheep question, show wisdom much in advance of the ancient Greeks in their mystic age of fable, with their belief in the existence of a ram which bore a golden fleece. There have always been some men like the narrow-minded John Randolph, who have been ready at all times "to go a mile to kick a sheep," yet in every age, from the earliest beginning of civilization to the present day, sheep have always held a high place in the estimation of those best qualified to judge of the sources of a nation's wealth, and it should be a matter of sincere congratulation to the American people that the subject of sheep husbandry is receiving such earnest and intelligent attention. Some things each generation must learn for itself, and one of them is the fact that the sheep is as necessary a companion for man now as in the more nomadic condition of the race, when Laban kept his flocks, or the angels sang their song of joy around the shepherds on the plains of Palestine. So true is this, that a history of the attention paid to sheep husbandry in any nation forms no inconsiderable means of judging of that nation's progress in wealth and civilization. THEIR ANTIQUITY. It is a significant fact that an authentic history of the Spanish merino reaches back for a period of nearly two thousand years. The fine, rich fabrics worn by the Roman officials in the early days of the Christian era, and which found their way to the courts of most of the nations lying along the shores of the Mediterranean sea, were made from the wool of the flocks which grazed on the plains of Trudantia, in Spain. Through all the political convulsions which have harassed that country, which has given them their name, through all its conquests and reconquests, this race of animals has sustained itself. It has suffered trans-ports across the seas, endured the rigors of a cold country, stood the

test of acclimation, taken even firmer and deeper root in our soil than it had in the sunny plains of its native Spain, and recently, through the skill and energy of a Vermont gentleman, has proved, at the international exhibition at Hauxburg, that the American production of the Spanish merino stands at the head of all other sheep in the world. The interest that is now being manifested, and the largely increased attention given to sheep husbandry, in a great portion of our country, has created an unprecedented demand, till many call the present awakened interest in the business the "sheep mania," and hint of the "hen fever" and "morus miltianis" times, predicting that the same fate awaits this enterprise. Ten dollars per head is now paid for the service of some of the first-class rams in Vermont, and hundreds of applicants are refused even at these terms. Some breeders, not over-enthusiastic men either, confidently believe that the time is not very distant when one hundred dollars will be paid for the same service. So great has been the demand for this class of stock that not a thorough-bred flock can be found in the State of Vermont which has not been reduced below the number its owner has chosen to retain. It has now become a serious question with many men whether such a demand and such prices can continue. As to all other branches of business, the war has given an increased, but when this stimulus has become abated, thorough-bred stock will hold the same relations to all other classes that it does now. Thirty-five years ago first-class merino rams could be bought for ten dollars per head. Old ewes, "culls," sold in the autumn for three dollars per head. At this time native sheep sold for one dollar and twenty-five cents. As the prices of the merinos gradually increased, till culls sold for five dollars and an extra ram for fifteen, there were a plenty of men who said such prices could not continue—men buying sheep at such figures must fail. The wise prophets of that day held on to their native sheep, and in many instances are holding on to them still, contented to clip, 4 pounds of wool per head, and to sell their surplus stock in the autumn at three and four dollars, while their neighbours, who went into the "ruminous speculations" of fine woolled sheep twenty-five years ago, now clip from 8 to 10 pounds of wool from their ewes, and from 15 to 25 pounds from their rams, and sell all the stock they will let go from their flocks at prices which would severely tax the credulity of a man not acquainted with the business. This experience of the last quarter of a century will form a very reliable basis on which to base a calculation relative to the future.

U. S. Agricultural Report 1864.

THE VALPARAISO WATERWORKS COMPANY, LIMITED. (From the River Plate Mail.)

A prospectus of this company has been published for private distribution, and we believe a considerable number of the shares have been privately subscribed for, as, in these anti-speculative days, it is almost useless to invite public subscriptions, however tempting the bill of fare may be. In the whole range of public companies it would be difficult to find one of a more practical nature than these Valparaiso waterworks, or one which presents a more desirable investment, and had it been brought out in the halcyon days of speculation it would undoubtedly have gone to a high premium. The supply of water to a large city is generally a profitable business, and in this case the return for the capital invested shows at least 20 per cent., in which we quite believe. It may appear a long distance to bring water 140 miles for the supply of a city, but the mountainous nature of the country renders it peculiarly easy, requiring only a moderate extent of canalisation, with the advantage of irrigating parts of the country through which it passes. The Republic of Chili is amongst the most rising of South America, with an enterprising, industrious population. Its nominal capital, Santiago de Chile, is situated some distance inland, but Valparaiso is the real commercial emporium through which the business of the Republic flows: The prospectus gives the population at 75,000, with 14,000 houses, but both are in a state of constant progression, besides which there is the supply of water to a large fleet of shipping constantly in the bay. Late occurrences with Spain have brought Valparaiso more prominently before the public. The war has been a drain on the resources of Chili, otherwise native capital has been employed to a large extent in the construction of railways and other public works, nor do we doubt that it will be found there for the carrying out of this important water-supply if the capital is not fully subscribed in this country.

FRANCE AND LUXEMBURG. A communication has been made by the Prussian Government to Lord Stanley on the subject of the cession of Luxembourg to France. Without describing the exact nature of the communication, we may state that the object of it is to induce our Govern-

ment to press the Dutch Government to withdraw from the negotiations with France: thus the question might be dropped without bringing the Cabinets of Berlin and Paris into collision.

The policy of strict non-intervention which Lord Stanley has laid out for his guidance may, we are led to believe, be on this occasion slightly departed from.—Orel

TROPICAL SKIN DISEASES. In hot climates the skin is stimulated to excessive action, and an almost infinite variety of cutaneous and dermal distempers are the results.

Prurigo, or constant external itching, without much apparent inflammation, spotted acne, caused by sluggishness of the skin, scaly eruptions, pustulous pimples, pemphigus, or water-pimples, Rosacea, or false measles, crusted tetter, and rashes of almost every shade, from light pink to the deepest crimson, may be mentioned among the number.

These, with all other external eruptions caused by heat, are safely and speedily removed by Bristol's Sarsaparilla, the most wholesome of all vegetable detergents.

In all skin diseases, the bowels should be kept laxative by using Bristol's Vegetable Pills at the same time as the Sarsaparilla.

ON CHANGE. June 7, 1867. Ounces, \$400. Sovereigns, 225. Patucos, 123. National Bonds 563.

The Bond market ruled slightly quieter to-day. The amount sold for cash shows that holders will not sell, whilst the sales on time betray a very serious speculation.

Owing to the number who have lost heavily by selling short, and the extreme difficulty in obtaining Bonds, save by buying in the regular way, it is said that no broker of any position now deals without having the Bonds; but this supposition seems very extreme, and close observers attribute the present rise in prices to nothing more nor less than the bears are driven into the market to make good their transactions.

Differences between the selling and buying prices are rarely exceeded. The Bonds, and nothing but the Bonds, will do. Where the market is at present from the 15th to the end of the month, the sales maturing are said to be unusually heavy, and, for the most part, these Bonds have to be bought now.

In fact, if the news from Europe is of a peaceable character, the bulls will have the market all to themselves. To-day several heavy sales for the middle of July were made, but by parties who are known to have the Bonds, still the price is high, after the payment of the coupon, astonishes all.

The market rules firm, and in the liquidation-room prices showed an upward tendency. In Exchange the rate ruled at 48, although we heard to-day of some bills at 49.

On Franco some small bills passed at 5.10, but there few drawers. Sovereigns are again in demand—two sales made to-day at a premium of four reales per gold; this has been bought to be shipped.

By telegraph we learn of an Exchange operation on Franco for 400,000 francs at 5.30, and the sale of 15,000 dry hides at 48.

The Everett had again suspended her sailing, and it was dubious whether the Rio de la Plata would leave or not. In the wool world there have been a few small sales in the deposits at 570, and some borra wool in the carts at 550.

Dry hides still readily, but very few are coming in from the country; those from the rivers are at once taken up—14,000 Entre-ríos at 43 1/2, and from 5,000 to 6,000 Correntino at 36 1/2.

The army hides seem to be kept up in Corrientes at present. In wheat and maize there is speculation going on: last sales—wheat 260 per fan, maize 90 per fanega.

SPANISH MERINOS AND THEIR MANAGEMENT. BY HENRY BOYNTON, WOODSTOCK, VERMONT, CORRESPONDING SECRETARY VERMONT STATE AGRICULTURAL SOCIETY.

But a little more than fifty years ago the first pair of Spanish merinos ever introduced into this country were brought to Cambridge, Massachusetts.

So little knowledge of their value had the man into whose hands they came, that they were butchered and eaten. Now, two or three thousand dollars for a single ram, and as many hundreds for a ewe, of this same breed of animals, is no unusual price.

Such has been the change in the public estimation of this class of sheep, in little more than a half century. And the man who should now be found feasting upon thorough-bred Spanish mutton would be classed as a near relation of the woman in the fable, who killed the goose that laid the golden egg.

Indeed, such is the zeal now displayed by the devotees of the famous stock, that it is a matter of serious question with some, whether, at this day of almost universal intelligence, when nearly every one knows something of almost every subject that comes before the public mind, these men, "gone crazy" on the sheep question, show wisdom much in advance of the ancient Greeks in their mystic age of fable, with their belief in the existence of a ram which bore a golden fleece.

There have always been some men like the narrow-minded John Randolph, who have been ready at all times "to go a mile to kick a sheep," yet in every age, from the earliest beginning of civilization to the present day, sheep have always held a high place in the estimation of those best qualified to judge of the sources of a nation's wealth, and it should be a matter of sincere congratulation to the American people that the subject of sheep husbandry is receiving such earnest and intelligent attention.

Some things each generation must learn for itself, and one of them is the fact that the sheep is as necessary a companion for man now as in the more nomadic condition of the race, when Laban kept his flocks, or the angels sang their song of joy around the shepherds on the plains of Palestine.

So true is this, that a history of the attention paid to sheep husbandry in any nation forms no inconsiderable means of judging of that nation's progress in wealth and civilization.

THEIR ANTIQUITY. It is a significant fact that an authentic history of the Spanish merino reaches back for a period of nearly two thousand years.

The fine, rich fabrics worn by the Roman officials in the early days of the Christian era, and which found their way to the courts of most of the nations lying along the shores of the Mediterranean sea, were made from the wool of the flocks which grazed on the plains of Trudantia, in Spain.

Through all the political convulsions which have harassed that country, which has given them their name, through all its conquests and reconquests, this race of animals has sustained itself.

It has suffered trans-ports across the seas, endured the rigors of a cold country, stood the

test of acclimation, taken even firmer and deeper root in our soil than it had in the sunny plains of its native Spain, and recently, through the skill and energy of a Vermont gentleman, has proved, at the international exhibition at Hauxburg, that the American production of the Spanish merino stands at the head of all other sheep in the world.

The interest that is now being manifested, and the largely increased attention given to sheep husbandry, in a great portion of our country, has created an unprecedented demand, till many call the present awakened interest in the business the "sheep mania," and hint of the "hen fever" and "morus miltianis" times, predicting that the same fate awaits this enterprise.

Ten dollars per head is now paid for the service of some of the first-class rams in Vermont, and hundreds of applicants are refused even at these terms.

Some breeders, not over-enthusiastic men either, confidently believe that the time is not very distant when one hundred dollars will be paid for the same service.

So great has been the demand for this class of stock that not a thorough-bred flock can be found in the State of Vermont which has not been reduced below the number its owner has chosen to retain.

It has now become a serious question with many men whether such a demand and such prices can continue. As to all other branches of business, the war has given an increased, but when this stimulus has become abated, thorough-bred stock will hold the same relations to all other classes that it does now.

Thirty-five years ago first-class merino rams could be bought for ten dollars per head. Old ewes, "culls," sold in the autumn for three dollars per head. At this time native sheep sold for one dollar and twenty-five cents.

As the prices of the merinos gradually increased, till culls sold for five dollars and an extra ram for fifteen, there were a plenty of men who said such prices could not continue—men buying sheep at such figures must fail.

The wise prophets of that day held on to their native sheep, and in many instances are holding on to them still, contented to clip, 4 pounds of wool per head, and to sell their surplus stock in the autumn at three and four dollars, while their neighbours, who went into the "ruminous speculations" of fine woolled sheep twenty-five years ago, now clip from 8 to 10 pounds of wool from their ewes, and from 15 to 25 pounds from their rams, and sell all the stock they will let go from their flocks at prices which would severely tax the credulity of a man not acquainted with the business.

This experience of the last quarter of a century will form a very reliable basis on which to base a calculation relative to the future.

U. S. Agricultural Report 1864.

THE VALPARAISO WATERWORKS COMPANY, LIMITED. (From the River Plate Mail.)

A prospectus of this company has been published for private distribution, and we believe a considerable number of the shares have been privately subscribed for, as, in these anti-speculative days, it is almost useless to invite public subscriptions, however tempting the bill of fare may be.

In the whole range of public companies it would be difficult to find one of a more practical nature than these Valparaiso waterworks, or one which presents a more desirable investment, and had it been brought out in the halcyon days of speculation it would undoubtedly have gone to a high premium.

The supply of water to a large city is generally a profitable business, and in this case the return for the capital invested shows at least 20 per cent., in which we quite believe.

It may appear a long distance to bring water 140 miles for the supply of a city, but the mountainous nature of the country renders it peculiarly easy, requiring only a moderate extent of canalisation, with the advantage of irrigating parts of the country through which it passes. The Republic of Chili is amongst the most rising of South America, with an enterprising, industrious population.

RIVER PLATE TELEGRAPH COMPANY (LIMITED).

HOTEL DE LA PAIX. (Corner of Calle Cangallo and Calle Reconquista.) WELLS & YOUNES, WOOL BROKERS AND COMMISSION AGENTS, 173—CALLE DE LAS PIEDRAS—173. 143—xp021

To the proprietors of Horses. As the winter season has now set in and the camp is improving I beg to advise horse-owners that I am ready to buy horses at 20 cents per month for pasturage, at the same time making myself responsible for the value of any horses lost (not including such as may die a natural death), on the following conditions:— 1st. Horses not exceeding \$600 in value will pay \$85 per month.

2nd. Horses worth from 600 to 1,000 will pay 100¢ and horses worth over 1000 will be charged 10 per cent., on their value for monthly pasturage. 3rd. Horse-owners will have to send for their horses to the estancia, and when delivered, they will get a receipt from the Mayor; and when there are more than 4 horses the undersigned will send to take them or return them to town at 50¢ a head.

4th. Horse-owners may leave their animals as long as they like, but cannot take them away until first paying whatever is due for their pasturage. 5th. After 4 months' pasturage, the owner will be required to pay the cost of same, and if this be not satisfied within a further term of 2 months the horses will be confiscated as property of the estancia, and branded with the estancia's mark.

6th. Every horse-owner will receive a ticket bearing his signature, expressing the value of the horses for pasturage, the date and conditions. 7th. Every horse-owner shall deliver to me the "boleros" of the horses or a copy of same, to prevent the horses being seized as stray animals.

8th. In case of a horse dying, a piece of his hide with the mark will be returned to the owner. The Estancia "Santa Maria" is distant 11 leagues from Buenos Ayres, partido de Ensenada, near the Donceles station on the Great Southern Railway. I also beg to refer to Messrs. Hovel and Langenheim, 47 Calle Balcarce, whose horses have been several times for pasturage on the Estancia Santa Maria.

For further particulars please apply to— ERNEST OLDENHOFF, 185 | 1m 29, 23, Calle Chacabuco.

The Argentine Bank. Shareholders are hereby advised that from the 1st prox. the collection will begin of 30 per cent. of the shares corresponding to the 2nd, 3rd, and 4th call already paid up by the rest of the shareholders.

MURRAY & LANMANS CELEBRATED FLORIDA WATER.

SAVINGS BANK. BANK MAUA AND CO.

101-Cangallo-103. BUENOS AYRES.

The immense advantages of Accounts Current are now so generally felt and appreciated in the two great enclaves of the River Plate, Montevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Maua & Co. in Montevideo has already provided for the working classes in that city a safe and profitable depositary for their savings.

The sums deposited in that very important institution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks, artisans, working men, and servants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sickness, or old age, instead of spending them in the immoral gambling, in lotteries, and other frivolities.

The Bank of Maua & Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and has opened a Savings Bank at No. 103 Calle Cangallo from Nine a.m. till Three p.m. every day, for the reception of the savings of the classes already mentioned, Sundays and holidays excepted.

The Bank will deliver to each depositor a pass book, in which will be entered the amount deposited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sum deposited; in the former case the interest will be calculated up to date.

The Bank of Maua & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Maua & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1887. P. P. MAUA & Co., M. A. DE FREITAS AMORIM.

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.

Second—The interest allowed is six per cent. (6 p.c.) per annum, which is liquidated every six months.

Third—The depositors can at any time retire the whole or part of the money deposited.

Fourth—Once the money deposited exceeds twenty-five thousand dollars currency, or one thousand dollars silver, the depositor, if he wishes to open an account current, according to the course of its operations, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

Fifth—In case the depositor loses his pass book, it can be replaced by another on paying twelve dollars currency, and advertising the loss in the public newspapers.

P. P. MAUA & Co., M. A. DE FREITAS AMORIM.

THE STANDARD.

Dr. F. Bourne, SURGEON DENTIST.
