This is because commerce has established itself on a firm basis; and its extended ramifications, like stability.

It is unfortunate that revolutions, revolutions, should be permitted, as was the case in this Province, because they cause a deal of individual harm, discredit the country amongst foreigners, cause more or less paralization in commerce, and more serious still, leave a dangerous precedent; but in towns like Buenos Ayres and Rosario, there is no reason why commercial credit should be affected by them.

These observations are simply a prelude to a few words I wish to say in reference to our banks, which are inspiring a wrongly-founded distrust in Buenos Avres.

First, The Mauá Bank. There can soundest banking institutions in Rosario. NORTON'S PATENT TUBE WELLS

This simple and portable apparatus has been tried with success in the United States, during the civil war, in Algeria by the French, and by the English in Abyssinia. It is so likely to prove of the utmost importance to the rural interests of this country, we willingly give a large space to a description of its mechaisms.

An Abyssinian war correspondent

There are some of the American pumps at work, discharging a stream of clear water, which flowing through class. a succession of tubes, enables the animals to be watered in one quarter the time formerly occupied. These pumps, which are called "the Douglas pitcher spout pump," are certainly admirable machines. When I had first heard of their arrival, and of the principal of their construction, I had not thought it possible that they could be used in such ground as this. They consist of a number of thin iron tubes like gas pipes, screwing into each other the lowest one terminating in a sharp spike of slightly bulbons form, so that being thicker than the rod itself, it only touches the soil, through which it is driven at that point, thus greatly the soil of the soil o diminishing the friction and resistauce. On to the pipe at about four feet from its upper end, is screwed a block of iron, which can be shifted as ports. the rod gradually descends. A heavy weight of iron, with a hole through it F^{INE} is put on the rod above this block, and to this weight ropes are attached working through pulleys placed on the top of the rod four feet higher Two men hull these ropes, and the weight rises, and then falls, acting as MARTLLL'S a rammer upon the anvil of iron below. In this manner the whole rod is driven down, fresh length being added as required, and then a pump is established without the labour of sinking a well. The whole thing is simple in F the extreme, and admirably adapted for clay or gravel soil. It could not however be expected to be successful in the bed of a torrent, where the gravel is mixed with blocks of stone of every size, as it is evident that the hollow pipe could not be driven through solid rock. It might be expected occasionally if the point comes full upon one of these great boulders it will go no further, and a trial must be made in some other spot; but the tube appears in nine eases out of ten to push any obstacle aside, or else to turn and bend around it, so as finally to reach the required depth. While I was there a party of engineers were preparing to sink one of considerably C larger size than those previously used, and it was intended to arrange a long series of troughs, so that the animals might be enabled to drink upon their arrival without the weary hour of waiting which they have now to go through. Indeed it is a wonder that serious accidents have not occured owing to the eagerness with which the maddened animals struggle and fight

Amongst its advantages we may mention that its cost is only a tithe of a dug or bored well. It gives pure water free from surface drainage. It is made quickly without dirt. It can be sunk deeper than a dug well after water is struck. It gives filtered water. It never freezes.

Testimony of a Distinguished Physician IN PAYOR OF

Kemp's Vegetable Worm Pastiles, I Certify that I have for many years been physician in the Hospitals of this city, and have had occasion to test the effects of "Kemp's Worm Pastilles." REGULATING PILLS.
A newly discovered principle in vegetable medication is securred in Radway's Regulating Pill, that places them far in ad ance of all other Pill, that places them far in advance of all other Purgative or Cathartic, Aparient or Sedative, and Anti-Bilious Medicine. They are the only vegetable substitute for Calomel or mercury known; the only Medicine that, during their process of purging, imparts nutriment to the debilitated system, and strengh, vigor and purity to the blood, and impaired secretions; the only purgative that will cleanse the Alimentary Canal and obstructed intestine as quickly and thoroughly, without weakening or neauseating the patient, as Lobelia (the most active and thorough emetic of the herbist) will the stomach, and the only purgative at present known safe to administer in case of Small Pox, Yellow Fever, Erysipelas, and other Malignant Fevers, that inflame and ulcerate the mucuous membranes of the Bowels, Stomach, &c.

Their influence is extended throughout the system, purging the retained deposits in the stomach, into the duodenum, stimulating the secretory, ducts of the pancreas and liver, in the promotion and increase of the flow of bile and pancreatic fluids.

PURGATIVES of common aloes exert their retion on the colon and rectum by irritation of the mucuos membrane, without influencing the liver or its secretions. Such cathartics are un-safe in pills for geaeral use. The common Ca-thertic Pills, that induce drastic liquid dischar-ges, should never be given in cases of inflamma-tion, or when there is ulceration of the intestinal

safe in pills for geacral use. The common Catherite Pills, that induce drastic liquid discharges, should never be given in cases of inflammation, or when there is ulceration of the intestinate canal.

THE APERIENT and mild LAXITYTE properties of RADWAY'S PILLS are the best safeguard in these disorders, and in all cases of cuutions and malignant fewers their balsamic, healing and sothing properties protect the coats of the alimentary passage against the irritant and acrid humors of the fauces.

THE NUTRITIOUS AND TONIC properties of these Pills are of great service in depleting fevers and uterine discharges, likewise as a dinner pill, to increase the appetite and promote digestion.

THEIR SEDATIVE properties allay pain in the nervous system, stomach and bowels, either from inflamation, colic, flatulence, wind, cramps, &c.

THEIR COUNTER IRRITANT influence extends threughout the system where there is inflamatic, congestion or irritation, stimulating the blood and nervous fluids in the congested vessels, and equalizing its circulation. The principle of Counter irritations is generally applied to external remedies. Its application, internally, in the form of a purgative medicine, exemplified in Radway's Pills, has proved a wonderful curative principle, readily withdrawing from the blood and fluids their acrid and irritating humors.

THEIR DIURETIC properties act on the kidneys, correcting and regulating the flow of urine.

THEIR ANTI-BILIOUS properties stimulate the liver in the secretion of bile, and its discharge thorough the biliary ducts. In all cases of Headache, Jaundice, Bilious Attacks, Saffrom-colored Sking, Impaired Digestion, caused by the overflow of bile and its mixing with the blood, thete pills, in doses four to six, will quickly regulate the action of the liver and free the patient from these difficulties. Ona or two of Radway's Pills taken daily, by those subject to bilious pains and torpidity of the liver, will keep the system regular and insure healthy digestion.

SCROFULA AND RHEUMATISM.
The great difficulty heretofore has been to procure an article reliable as to purity. The demand in Europe and America exceeding by many thousands of gallons the entire product of all the Cod Fisheries, in consequence of which unprincipled persons have flooded the markets with Land Oil, Cotton Seed Oil, Linseed Oil, &c., imposing it upon the Public as genuine Cod Liver Oil, greatly to the detriment of health.
