TO CORRESPONDENTS. No notice can be taken of anonymous communications. Whatever is intended for insertion must be authenticated by the name and address of the writer; not necessarily for publication, but as a guarantee of good faith.

The Standard. THURSDAY, OCTOBER 22, 1868.

SPECIAL TELEGRAM FOR "STANDARD."

Montevideo, Oct. 21, 6 P.M. Good business done in local securities, Sociedad Fortuna, 5 to 6 prem. Fomento Territorial, 164.

THE BRITISH LIBRARY. Climate must have some effect upon British institutions in the River Plate, for we find two of the most deserving the least successful; the position of the British Hospital is, has been, and we suppose ever will be, unsatisfactory.

The Tycho Brahe's Mails. HER MAJESTY'S ASCENT OF MOUNT PILATE. Galigani gives a letter, as follows, from Lucerne describing the Queen's ascent of Mount Pilate:—"Queen Victoria has made a pleasant ascent of Mount Pilate. Of the two rival mountains that guard the entrance of the St. Gothard gorge, near this town, the most frequented by travellers is the Rigbi; but the grandest by far is Mount Pilate. Its wild precipitous aspect, however, is sufficient to deter mere excursionists from approaching it, and it is even said that there was formerly a cautional law forbidding the attempt in consequence of its dangerous nature.

LA REVISTA ARGENTINA. Some time since we ventured to bespeak an enlightened public a generous welcome for this valuable literary publication, which owes its origin to the ability and learning of our youthful friend Don Manuel Estrada. The second number is now before the public, and though of small dimensions and unpretending appearance, the contents are so varied and interesting that we have only time at present to make a hurried mention of the several sections, reserving for another day a fuller and more particular review.

the least degree treacherous, and we only advert to the matter to show the supreme indifference which says the vitality of so necessary and so deserving an institution. That Mr. Forrester, the chairman, should find it incumbent to proceed with the meeting in the absence of the report, we can understand, owing to the great difficulty which British merchants experience to attend meetings at the opening of the busy season.

General Grant has authorized the commanders of the forces in the Southern States to use the troops in aid of the civil authorities, but only in the enforcement of some lawful process. In the Georgia House of Representatives a resolution has been agreed to, which virtually prevents the negro and colored members of the Legislature from voting on the eligibility of other members until their own has been determined.

THE PACIFIC EARTHQUAKE. IT will be recollected that the first symptoms of the earthquake in the Pacific, were felt in the South ports of Chile, so early as the 12th August. The Tycho Brahe's mails, bring us the following extraordinary phenomenon in Tennessee, on the very same day.

sa was with her Majesty as well as Prince Arthur, who has already earned for himself a reputation as an Alpine climber. The Queen rode her English pony, and was escorted by her Highland attendants, who, if report speaks truth, have outdone the Swiss hillmen in mountain-walking. Hoffman, the well-known guide, led the way to the top, and accomplished the distance in four hours. The highest peak here is the Esel, reached by a precipitous path, and so narrow on the summit that there is scarcely room for a dozen people to stand together; but the view is inexpressible grand, the whole range of the Alps from the Glarntsch to the Blumlis Alp stands out clearly on the horizon to the south, while the low ground and lakes are stretched out like a map at the foot of the precipices.

the annual numbers bound does not always admit it to a permanent place in our libraries. Amongst all admirers of science and learning who will not be thus deterred, the present bi-monthly will ever be held in esteem. To the native or foreigner there can be no more useful study after the language than the history of the country in which he lives. How seldom do we find both so beautifully combined as in the "Revista Argentina," whose grace of diction is only equalled by veracity of expression?

afterwards. They took courage, however, and, being joined by numbers of the people living in the surrounding neighborhood, they proceeded to the place, and found that it had struck upon a flat ledge of rocks in a wagon way leading from a farm house to the public road. The fragments of stone were thrown around for several rods in all directions; the ledge, which is said to be three feet thick, without any seams, was disturbed for a distance of about 50 feet, split and torn up in fragments; the soil, which was spread in thin layers all over it, looked as if passed through a sieve. At the point where the strange body came in contact with the rock there appeared to be no storm at all, but a very fine, white, floury sort of paste, which was quite hot, and a steam ascended out of the hole in which it had buried itself, which was too hot to approach.

horror and fright among the people is the second engulfing of the sea. Had the shock been as severe as it was protracted and incessant, every building in Callao must have been toppled down. The weather has been very cloudy the past few days, and the earthquake that has just shaken the solid earth (and the nerves as well) of Callao, is the most terrible one that has visited the place in seven years, and never one of such long continuance.

The promise contained in Sr. Sarmiento's closing message to Congress that his Government would give a preferential attention to the important question of securing the frontier from the desolating invasions of the Indians has not been given in vain, and we see with real pleasure that the Minister of War has not lost a moment in taking action in the matter. By an official note addressed to the Governor of Santa Fé he informs him that the Government is organizing troops of the line destined exclusively to the service of the frontier, and meanwhile requests him to place at the disposal of Colonel Benavidez, two hundred National Guards to be provisionally employed in said service, and which are to be relieved every six months.
