It being an admitted fact, that "Money makes money," the object of LA BIENHECHORA could not be better, since it opens a vast Savings Bank for the surplus or savings of the Pablic, so that, by the proper employment of these small gains, a moderate capital, or oven annuity, may be secured in a short time. By this means a provident, though helpless, family can husband their small means, and, in the end, attain a competency.

It being proved that the accumulation of interest is the most powerful means of augmenting the capital, THE BIENHECHORA DEL, PLATA—an Argentine Company, whose only investments are in the country—holds out to Subscribers greater advantages than any other Institution, by reason of all its dealings being in the River Plate, where are current as large interests as in any part of the world.

THE BIENHECHORA DEL, PLATA receives Deposits of from Five Patacones per Annum up to any amount in Weekly, Monthly, or a cough or an expectoration of pheem.

SPOONER'S ALLEVIATOR An infallible cure for Neuralgia, Sciatica, Tie Dolareux, Lumbago, and all Rheumatic Affections.

Having been for years a great sufferer from Neuralgie affections in the head and face, I tried, but without any permanent success, the prescriptions of some of the first Surgeons of the day, and all medicines recommended by advertisers. At last, driven almost to despair, I tried everything I thought would all viate the pain, and after many scientific experiments, succeeded in establishing a safe, speedy, and effectual cure, since which time (two years ago) I have never had a repetition or even symptom of the complaint.

plaint.
The following is one of the numerous testimo nials received, which must fully establish its efficacy to the most incredulous:— Buenos Ayres, June 22, 1869.

Dear Sir,

I have much pleasure in testifying to the efficacy of your 'Alleviator,' having used it in India, where you lirst brought it ont, and also in the country. Since curing myself I have oftentimes prescribed it to suffering friends, whe have as yet, in no instance, over found it to fail. I could furnish you with numerous proof. of cures effected by its administration, shou you at any time require them.

Believe me,

Yours faithfully,

THOS. M'PHERSON.

REVIEW FOR EUROPE. The Paraguayau war has made no progress, nor is it clear when the Allies intend to push operations. Count d'Eu has his headquarters at the village of Pirayu, in the centre of a delightful valley, about thirty miles inland from Asuncion. The wild and thickly wooded ranges of the Cordillera, beyond Lake Ipacaray, are held by Lopez, whose forces are not clearly ascertained, and whose centre of operations is supposed to be in the neighborhood of Azcurra. The intermediate country, commonly called neutral ground, but infested by hostile! Paraguoyans, is partly morass, partly forest, and offers considerable difficulty to the advance of cavalry. From the beights in possession of the natives it would be easy for Lopez, if he had proper artillery, to open a destructive fire on the allied encampment, but his ed port. guns seem of light calibre and cause little offence to the advanced lines. Meantime, numbers of Paragnayan women make their way daily to Asuncion, in a state of great suffering and almost complete nudity; they soon accommodate themselves to their new masters, the Brazilian soldiers, and appear after a few days in gaudy dresses milar improvement. of every hue. Nothing can exceed the filthy and wretched appearance of the Paraguayan metropolis, once so famous for cleanliness and salubrity. In most cases the houses are in ruins, and the absence of all hygienic or police are rangements renders the place anything but a delectable residence. As yet the efforts to establish a Provisional Government have been fruitless, and it seems the mission of Sr. Paranhos and Dr. Roque Perez, special is it clear that a Provisional Govern-

BREAKFAST-A SUCCESSFUL EXPERIMENT. The 'Civil Service Gazette' has the following interesting remarks:—"Three are very few simple articles of ford, which can boast so many valuable and important dietary preporties as eccoa. While acting on the nerves us a gentle stimulant, it provides the hody with some of the purest elements of nutrition, and at the same time corrects and invigorates the action of the digestive or gans. These beneficial effects depend in a great measure upon the manner of its preparation, but measure upon the manner of its preparation, but of late years such close attention has been given of late years such close attention has been given to the growth and treatment of cocca, that there is no difficulty in securing it with every useful quality fully developed. The singular success which Mr. Epps attained by his homeopathic preparation of cocoa has never been surpused by any experimentalist. Far and wide the reputation of Epp's Cocoa has spread by the simple force of its own extraordinary merits. Medical men of all shades of opinion have around in re-

men of all shades of opinion have agreed in re-commonding it as the safest and most beneficial article of duct for persons of weak constitutions. This superiority of a particular mode of prepa-ration over all others is a remarkable proof of the great results to be obtained from little causes. By great results to be obtained from inthe causes. By a thorough knowledge of the natural laws which govern the operations of digestion and nutration, and by a careful application of the fine project-ties of well-selected cocca, Mr. Epps has pro-vided our breakfast tables with, a delicately flavored beverage, which may save us many heavy doctor's bill. It is by the judicious use of such articles of diet that a constitution may be of such articles of diet that a constitution may be gradually built up intil strong enough to resist overy tendency to disease. Hundreds of subtle maladies are floating around us, ready to attack wherever there is a weak point. We may escape many a fatul shaft by keeping ourselves well fortified with pure blood and properly nourished system.
