BRISTOL'S SUGAR-COATED PILLS.

Do not depend upon any mineral or dangerous substance for their acting upon the liver, They are purely vegetable, and entail no evil consequences upon the patient; they do not dry up the natural humidity of the bowels, thereby causing a continual necessity for further purgation, and the ultimate weakening of the entire

excretory organs. PODOPHYLLIN AND LEPTANDRIN. PODOPHYLLIN AND LEPTANDRIN.

The active principles of Bristol's Plls are acknowledged by all enlightened physicians to be the surest and safest remedy for every form of hepatic or biliary derangement. No other Pill, of which we have any knowledge, contain these invaluable resinoids. Propared in our own laboratory, under our personal supervision, they insure the unvarying uniformity of operation for which Bristol's Pills have become so justly celebrated. But the powerful anti-bilious properties of these Pills are not their only virtue, they are besides a splendid tonic, a thorough yet safe cathartic, a sure cure for indigestion and dyspepsia; safe for the weakest, yet strong enough for the most robust. In short, they are an unfailing

In every case where there is reason to suspect that the blood is impure, or that there is any taint of Scrafula. In the system, BRISTOUS SARSAPARILLA should be used in conjunction with the Pills, the two madicines being prepared to act in harmony, and when used together they onsure a speedy and complete recovery.

President Sarmiento has taken 100 copies, and sent 50 to the Argentine Minister at Washington, for some of the principal public libraries in the United States.

We have gone through this elaborate compliation with great interest, and certainly whoever desire to make themselves acquainted with Argentine history, whether ancient or modern, have only to study this admirable guide. The amount of information collected is seinething wonderful. It could only have been accomposed by great labour and at a heavy cost, and, we trust, the public spirit evinced by Mesars. Mulhall will be amply rewarded. To those who contemplate a visit to the River Plate, or a settlement in Argentine territory, the details given in this "Handbook" are invaluable.—London and River Plate Mail.

I beg you will put down the Government of Entre Rices for 200 copies, and myself for 100, to be dist ibuted gratis among reading-rooms in Europe.—Letter from General Urquize.

CERRITO COLONIZATION PROJECT.

One of the most useful and judicious projects of colonization that has yet ome under our notic is that of Mr. Lieste, the Dutch Consul, which is described in a pamplifet just published. The Estancia del Cerrito is on the banks of the Parana, covering a superficies of fourteen square leagues, with The former shew a decime of o per increased 50 per cent, and Cuba 3 per Ang. 31 1869. A jury was appointed a frontage of two leagues on the river, cent, the latter an increase of 20 per cent. The sum increase was only to a contract the latter and contract the latter and increased 50 per cent. lage; in fact there can hardly be in the whole Republic a site more admirably chosen for colonization. There is a port at the Cerro, close to the estanc a house, where vessels from Europe can l come alongside the bank and discharge passengers and cargo. The land has an abundance of wood and water, the first necessaries that settlers require, and the Province of Entre Rios being free from Indians and gaucho marau ders the colonists would be exposed to none of those troubles such as recently occurred in Santa Fé. Mr. Lieste mentions that some of the Swiss Colonists of San Carlos have arranged with him for the removal of their families and effects to the Cerrito, where they equally clear there can be no putre fac ion; hence the efficacy of comple tely drying meat by using *Calsi or substruction to the country with security for their lives and property. Numerous families are also expected from Holland, as Mr. Lieste to Frayle Muerto at this time particus to substruction to the country would find a visit of the coun the purpose, and his quality of Consul will give him peculiar facilities in this inebig's mode of Extract of Meat or respect. In the pamphlet before us much stress is laid on the great success of the Santa Fé colonies, and this is an unquestionable fact, notwithstand ing all the annoyance caused to the colonists by the authorities. The present occasion seems indeed most opportune for Mr. Liste's project, and nois harvester, the peculiarity of it every circumstance seems to angur a being that it not only cuts but elevates brilliant result if he succeed in getting the wheat into a large cart, which is the necessary amount of capital sub- driven alongside.
