PHOTO-DRAWINGS. PHOTO-DRAWINGS.

This new style of picture, introduced by Mr. S. L. Roignolds, of London, makes the finest and imost effective style of Portrait known at the resent day. Their purity of colburing and delibeacy of tone is such, that some of the first English artists have been unable to determine whother they are Photographs, or simply and purely Water Color Drawings. The process is peculiarly applicable to the reproduction and onlargement of Card Photographs, enabling the artists to introduce accessories and backgrounds, change dresses, or alter figures; and, in fact, to make a harmonious portrait, which will be a Picture' on, which the eye rests with pleasure, at well as a faithful likeness.

MADAME: JUANA MANSO'S SYSTEM.

There is a netition at present before the Municipality by the mistresses of the public schools, in which they complain most bitterly of innovations that Madame Juana Manso is introducing in the system of education. The reforms are indeed of a novel description if we believe the statement of the netitioners, and although some of them are very commendable othersappear to be rather classical than decorous-Singing, archery and anatomy are the salient points of the new system, and those to which the strongest objections

are urged by the petitioners; the others are rather points of discipline. In the first place Madame Manso has endeavored to form the schoolmistresses to her idea by instituting weekly conferences at which they have to go through certain exercises which

The reforms that affect the children are stated as follows-1st. Needle-shell. The Baradero Tropman bruwork and grammar are abolished, tally murdered the whole Diaz family, 2ndly Singing, archery and the study and is lying in the Baradero prison: of anatomy are introduced. It is dif- Lieutenant Guemes shot down a caficult altogether to discard the study cique and other Indians who sacked of grammar, and nothing can be more and murdered an agricultural colony absurd than to obliterate needle-work in the province of Salta; both are from the list of feminine accomplish- under arrest, but Guemes must be tried ments. But Madame Manso is evident- first-because why? Because everyly an admirer of those Lacedaemonian thing is out of joint in the countryphysical description: they wrestled like men in the palestra and were trained to produce a hardy race of warriors. In our times it would be preferable to take for our models the Athenians who devoted their attention to literature and the fine arts: for is not Buenos Arres the Athens of South America ?

If Madame Manso's system prevail we shall have a community of strongminded women, whose only feminine accomplishment will be singing. We fully agree with her that the Muses should hold a place of honor in our schools, and indeed in all the public schools of England and the U. States singing classes form a regular branch in the list of studies. Confucius, who Hourished before the Christian era. said "Wouldst thou know if a people be well governed, it its manners be "good or bad, examine the music it practises."

The study of anatomy is in our mind very unsuitable for little girls. Of what use is it to explain to them the fibrous tissue, the cartilaginous texture, the mucous membrane, and the other component parts that make up the human frame. It is true that ladyphysicians are coming into vogue in anatomy most useful, but these are exceptional cases. We should much prefer to see a nice landscape from the pencil of a young lady than the most accurate delineation of an anatomical

Madame Juana Manso should try to avoid over zeal in the high charge confided to her; she must remember that all reforms are not improvements, and for the present, we would advise her to stick to-the singing-class and restore etymology and needle-work. instead of directing her attention to anatomy or teaching little girls how to draw the long bow.

CRIMINAL INJUSTICE.

Omnia mala exempla, bonis initiis orta sunt. Everything wrong in the River Plate has some excuse. If assassination goes unpunished it is because mercy is tempered with injustice; and we live in an age when capital punishment is sauctioned by law but abolished by custom.

The laxity of our criminal jurisofficials who fearlessly do their duty are subjected to every species of auof villains and assassins whom our

Colonel Avala, the defender of the own, has sworn by his epaulets that Lopez Jordan shall never take Parana, and in this gallant resolve he is supported by all the inhabitants. Gen: Conesa wrote to him from Puntus del Obispo on the 26th that Lonez Jordan was marching on Parana, and that the place must be held at all hazard. Col. Aptelo with his division was sent to reinforce the garrison. The reply of Colonel Ayalaj to Conesa was lacouic: "I am waiting for the enemy to appear and I answer for it that Lopez Jordan has no chance so long as my men (1st batt. of the Line) are in the way."

The project of a new bank in this city under the title of "Banco del Pueblo" was talked of. Most people are of opinion that there are already sufficient banks in existence in this market for the trade of the place, and except for a purely foreign bank, started on foreign capital, there is no possibility of success. The new bank would introduce no new capital into the market, neither would it have the right of emission; it is improbable, therefore, that it will get into any very large business for many years.
