WEDNESDAY, MAY 31, 1871. ONE MILLION STERLING.

It is a significant fact that none of the native papers tried to throw the "wet blanket" over the news we published the other day of one million sterling coming out in the Oneida. Nearly all of our somniferous colleagues have reproduced the news, and most of them gave it as their own, STANDARD. The fact stands, however, that, since the morning when we published the news, everything in Buenos Ayres has taken a jump up; wool, duced.

Landlords are beginning to look cheerful about their rents; shopkeepers are events of the bour. putting their shelves in order; Gothe streets in the most jocund humor, thinking of the splendid commissions that will soon be going. In fact, all look for some pickings out of this monster remittance, and at the Provincial Bank there is already deep anxiety in the treasury office as to how it will be possible to get such a lot of gold, FIVE TONS, under lock and key,

Most of us recollect the immediate nfluence which the gold shipped to us on account of the Riestra loan had on this market. For two years the money was felt in every artery of commerce, in every channel of business, and yet now for the next three months we have nothing to look for, but gold, gold; gold by every Southampton mail. Four millions sterling, all in gold, coming out to us fresh from the Bank of Eugland. Why, even in London the shipment of so much gold will call attention, and when the London public learns that this immense sum is all coming out to the Plate, most assuredly the spirit of adventure will seize the public mind, and in the track of the gold will come numerous gold-seekers.

The gold comes out for special purposes, except as far as paying off the debt due by the Government to the bank, there will be no immediate employment for this money. To the Provincial Bank it therefore must all go, and as it will neither suit the Government or the bank to have so much spefreight offers.

Apply to T. Drygdale and Co., or to Mr. Apply to T. Drygdale and Co., or to Mr. M'Lean, for particulars.

Contact the gold must find its way into the market for longer or shorter into this important step. Dr. Sarsfield was out in the press laws, the best law would be none at all. The law areas in the market for longer or shorter into this important step. Dr. Sarsfield was out in the country when the Government decree stopping the art. unexampled in the annals of River

Aside, however, from the proceeds of this Varela loan, there is a steady flow of capital into the Plate, which few of our colleagues know anything about,-The extension of the Southern Railway to Flores, Dolores and Tandil-The new National Tramway Co .-The extension of the Buenos Ayres Tramway Co.'s lines-The new railway from Barracas to Ensenada—The Tran. sandine Telegraph Co .- The new English loan to Paraguay-The Concordia and Corrientes Railway Co. - and several other similar enterprizes launched, and now about to be carried out. He would indeed be a wise man who could tell the exact amount of English capital now coming out and seeking investment in this country. To posterity we leave the task of liquidating these obligations, ours is to spend the money, and if any question our capabilities in this latter regard, we refer them to some of our colleagues, who seem in such excellent spirits at even the advent of the trifle of a milion, that they are at last beginning to look cheerful.

If our description of the plague is to be charged to us as throwing the wet blanket' over Italian immigration, we are at all events free from the imputation of frightening away foreign capital, since all the fresh capital coming to the Plate is shipped from England. In an international point of view England is the great creditor of the Plate and Italy the debtor; nevertheless, Italian views predominate

Accenting this statement as substantially correct, it looks very much as if the with the little 'caporal,' and to act the High Commission had made a present same towards Queen Hortense and the of the question of the Alabama claims to the American Government. However this may be-and, of course, the attention of Parliament will be immefailed; they are said to be at Chisela diately drawn to the subject-we have counter claims against the American Government for illegal seizure and condemnation of British property during the civil war, which greatly exceed in amount the Alabama claims, and are better founded, and which, as we shall presently show, it is the bounden duty of the British Governof the Commission, with a view to obtaining adequate compensation for the aggrieved parties. The Alabama claims do not exceed, according to the American showing, if they amount to, three millions and a half sterling, whereas it was admitted by Mr. Adams, when American Minister at this Court, in a letter to Lord Russell, written in 1864, that eight millions sterling would not cover the amount of British property seized and condemned by the Federals up to that Nor do we believe that there would be The cases in question, the mode of

Woolsey, of Yale College, a great name amongst American jurists, in a paper written by him in the North American Review for October last, candidly admits that during the civil war the doctrine of 'continuous voyages' received in the American Prize Courts "an extension greater, perhaps, than had ever been given to it before;" and afon the soldiers as they approach, and ter a severe criticism of the proceedings of these tribunats, he says, "Such was the expanded doctrine of 'contimuons voyages,' as interpreted by our courts, which, doubtless, we should is to die." These Conventions, which subsequently, as our readers will remember, fell through, proceeded on the authority of the Treaty of 1794 between England and the United States, or, at all events, adopted that instrument as a precedent. By the 7th Art. of the Treaty in question it was stipulated that, complaints having been made by "divers merchants and others, citizens of the United States," who during the then pending war had sustained losses and damage by "irregular or illegal captures or condemnations of their vessels and other property, under color of authority or commission from His Majesty," full and complete compensation for the same should be made by the British Government to the complainants, and that a Commission, consisting of five members, should be apment to press upon the consideration pointed, with full powers to investigate and decide the claims in question "according to the merits of the several cases, and to justice, equity, and the law of nations."

EDITOR'S TABLE.

The Nacional of Monday evening contained a rather alarming paragraph respecting the epidemic. Our colleague in announcing a great increase in the number of fresh cases on Saturday and Sunday, cries Beware! to the population, and informs the public that "the plague is blazing up again like a fire under the influence of the wind." The simile is very pretty, and would be ap propriate if our contemporary's information were correct in all respects. We believe the new cases of the epidemic were somewhat more numerous on the days named, but not to an extent to justify the alarming 'alerta' of our generally well-informed colleague.

We are requested to state that Mr. Forrest, who lately arrived in this country on the business of the Buenos Ayres Tramway Company, 18 not the contractor for the works of that line, but the agent for the contractors, Messrs. Mr. Turner, however, with his multifarious duties, has not had time to do it, and now that it has been found that it will cost a paltry £4 or £5 to get the address 'illuminated', there was a shabby attempt to back out of it. Better far to have said nothing about the address in the first instance. The loyalty of Wrexham, as shown by its Town Council, is not

worth a £5 note! Another accident happened on the Western Railway on Monday; near Mercedes on this side a horse gto on the line and was run over by an up train, the result being the disa bling the locomotive, there was not much delay, however, as an then engine was procured and the train sent on.

Military circles are just now busy discussing the merits of a 'mitrailleuse' which has been invented by Captain Garay, a distinguished officer of the national army. The new cannon is called the ' Eudoro,' and is expected to be a very efficient weapon.

Our colleagues are not indulging in as much fine writing on the Brazilian doctors' question as might have been expected. We forget which of the native papers first announced that the Argentine flag had been trampled on state that there was no foundation for such a report.

There was very little done in Bonds to-day Only one small cash sale at 671. For to-morrow 10,000 were offered in the liquidation at 67%, but not sold. Bonds are very steadily rising. The great business of the day was shipping

specie. For a long time there has not been such heavy shipment as to-day; carts with specie boxes were up to 2 o'clork arriving at the beach, all for the steamer City of Rio. The total shipment amounted to nearly three-quarters of a million of patacons; all this gold goes to Montevideo. The principal shippers are the London and Biver Plate Bank and the foreign English houses. The gold, however, only goes as far as Montevideo, and w.ll not leave the River Plate.

In South Plaza this morning there was a very large business done in wools. We heard of one sale of 16,000 arr. to an American buyer, but at reserved rates. Prices in this market are now between 60 and 70, and there seems to be no scarcity of buyers at these rates. In the North Plaza everything still is dull. At the Station some three or four lots were sold at 63 and 55. In the Plaza nothing, although there are 60 carts. LA SARMIENTO A Suburb of Cordoba.

Building Lots \$f 100 each. This charming suburb commands a fine view of the city of Coruoba in the low ground and the Sierras in the distance. It is proposed to establish here the new water-works of the Anisascat

Aqueduct as projected by the Engineer of the Province, Col. Thompson.

The air is peculiarly salubrious and invigorating, and the site is destined to be one of the favorite summer-residences in the Republic. Villa Sarmiento comprises 70 cuadras (or 140 acres) half of which are already taken by English marchants and native families of Buends Ayres.

The: are two plazas, called Colon and 26 de Muyo, and th streets are 20 yards wide. The blocks are 100x100 yards, and each lot for buil-

ding is 20x50, price \$ft.100.

With the growing importance of Cordoba this locality will rise greatly in value, and the site is owell suited for country houses, chupled with the abundance of lime and timber, that families can have a delightful residence, within 2 days journey of Buenos Ayres, at a mere nominal cost.
