OBSERVATORY.

The formal inauguration of the Ar gentine Observatory at Cordoba, took place with all the pride, pomp and circumstance of glorious science, on Tuesday last, in the presence of the dignituries of the land and the elite initiative by blessing the enormous teescope, the largest instrument of the kind on the South American continent. Professor Gould then stepped forward and pronounced the following remarkable address: we make no apology for its length, but commend it to the attentive perusal of our readers. It is a was welcomed with applause. Dr. spoke at the conclusion of the Profes apropos remarks. In spreading open our sheet to this

lengthened address of Professor Gould, we pay no mean compliment to our readers, who will doubtless appreciate its beauty. The paper is less for a local public than the whole scientific world, of which the professor is so talented an oracle. The perusal of such matter is refreshing even to the general reader, who rarely finds in the paper of the day matter so calculated to ennoble the mind and elevate the soul. The following is this memorable ad-

Mr. President and Gentlemen.

The history of civilization teaches, that there is between the development man is wrestling with nature to force God has impressed upon the material vancement. Why this is so, it is no part of our task, to-day, to inquire; et it is eminently fitting to recall this esson of experience, as we turn for a brief period from that beautiful and in the human breast? honourable spectacle which, for the last few days has fascinated our attenion, and come hither to assist in the visible heavens, in characters so subo recognize their glory, or to compre-

It has given us the knowledge of a considerable number of stars that their brightness is not always the same, but undergoes systematic variations. Some have been seen to rise to away until telescopes of some power are needed for rendering them visible Others still are now found to possess a brilliancy decidedly greater or decidedly less than that which has been assigned to them by more than one astronomer in times past. Such stars must be carefully watched, and the fact of any regular and periodic flue tuation in the amount of their light either established or disproved. Of such cases there are already many on our records, thanks to the assiduity cannot fall short of about 330,000, the no one of whom has failed to make number in the southern hemipshere manifest the existence of several. THE CHRISTYS. The performance given on Wednes

day night by the Christy Minstrell proved a great success, and must have been a rare treat to those present The Coliseum was filled with a numer rous audience of English-speaking people, as well as a few Portelios, was seemed highly pleased with the night entertainment. We must congrate late Messrs. Norton and Steele on the very able manner in which the whole programme was carried out, and page ticularly their own share of it, which was unexceptionable. The 'Opening' Chorus' was very nicely gone through and elicited considerable, applants. I'll meet thee at the lane, was well and sweetly sung by Mr. Steels 'Naughty but nice,' and 'Finnigan' wake,' by Mr. Norton, created much mirth. 'Ella Leene,' was rather dull affair, and would have been nose the worse of a little more force and effect in its execution. 'Silver Moonlight winds are blowing,' by Mr. Melvyn, was very well sung, and in 🗪 pital time. The 'Poultry Show' was glorious; Mr. Norton's inimitable in tation of hen-cackling and cock-crowing throwing the house into roars of laughter. The American Prize Jig was a thing well worth seeing. Mr. W. Norton's dancing is really superb, and anyone desirous of witnessing a unique Terpsichorean feat should by no means lose the opportunity of seeing this gentleman dance; well, indeed, does he merit the champion belt. Mr. Steele's performance on the pianoforte was admirable, and his playing on the violincello was, in our opinion, 'more exquisite still.' .He played Thalberg's 'Home, sweet home' on the first instrument with great taste, and remarkable power, and on the last some operatic selections. The masterly way in which he handles the violincello is something extraordi-. nary; in fact, he literally makes it speak.' Mr. Steele is entitled to the name of a thorough and efficient musician. The 'Anvil Chorus' was also very good, the clanging of the ham-

TREATMENT OF NEURALGIA Dr. MOUSSETTE'S PILLS.

During many years' experience in private practice, and in the Hospitals of Paris, the new treatment of neuralgia has been attended with

treatment of neuralgal and over arcented with never-failing success, even in the case of sciutica, a kind of neuralgia which and previously re-sisted all known remedies. This continual success is easily explained, now that the scientific researches of Dr. Moussett have demonstrated the real cause of neuralgia Wholesale Orders addressed to-

# SAVINGS BANK BANK MAUA AND Cc. 101--Cangallo--103

The immerse advantages of Accounts Current we now so generally felt and appreciated in the two great emporiums of the River Plate, Montevideo and Buenos Ayres, that there are very few Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank will deliver to each depositors a pass book, in which will be entered the amount described and withdrawn. The Bank of Mana & Co. in Montevideo has

already provided for the working classes in that city \* safe and profitable depositary for their savings. The sums deposited in that very important in-stitution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks artisans, working men, and ser ants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, descriptions are old consistent of metal, sioxness, or old age, instead of spending there in the immoral gambling, in lotteries, and other frivolities.

The Bank of Mana & Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and has

posited and withdrawn. The depositor is permitted at any time to with-

draw the whole or part of the sum deposited; in the former case the interes will be calculated up to date.

The Bank of Mauá & Co. is sufficiently known to the Public by the benefit derived from the course of its operatious, which are regulated on the strictest and soundest principles, and always

directed to promote the general welfare.

The Bank of Maua & Co. are also persuaded that this new branch of their business will render immense service to the working classes of Buenos Ayres and its neighborhood.

Old and body, without creating any of those unpleasant results attending the use of opium. Old and young may take it at all hours and times when requisite. Thousands of persons testify to its marvellous good effects and wonderful cures, whilt Medical men extol its virtues most extensively using it in great quantities in the following diseasas:

Diseases in which it is found eminently useful-Oholera, Dysentery, Diarrhea, Colics, Conghs, Asthma, Rheumatism, Neuralgia, Cough, Cramp, Hysteria, &c.

The Right Hon. Earl Russell communicated to the College of Physicians and J. T. Davenport that he had received information to the effect that the only remedy of any service in Cholera was Chlorodyne.—See Lancet Dec. 31, 1864.

Chlorodyne.—See Lancet Dec. 31, 1864.

From A. Montgomery, Esq., late Inspector of Hospitals, Bombay:—"Chlorodyne is a most valuable remedy in Neuralgia, Asthma and Dysentery. To it I fairly owe my restoration to health after 18 month's severe suffering, and when other remedies had failed."

Dr. Lowe, Medical Missionary in India, reports [Dec. 1865] that nearly every case of Cholera in which Dr. J. Collis Browne's Chlorodyne was administered the patient recovered. rodyne was administered the patient recovered.
