Perfect
PURGATIVE PILLS,
Perfectly tastcless—Elegantly Coated.
'Materia Medica' contains, in its reportoire,
many purgative and cathertic agents that, for
ordinary purposes, opens the bowels, and
through what is called a 'perisaltic' movement,
purges from the alimentory cannot the faces, and
this is all. Such agents, for the purpose of
cure, or removel of any settled cure, are perfectly useloss.

fectly useloss.

Dr. Radway has completed one of the most essential discoveries in medical chemistry—in the combination of vegetable substinces, for the purepose of a Purgative, Aperiant, Counter-friitat, Alterative I ill, that can be taken or administered with the absolute certainty of securing thorough evpulsion of all decayed and decomposing element of the human body, and also safe to take in the most malignant of Eruptive Fovers. In cases, where the mucuous remprence of the incases where the mucuous membranes of the in-ternal viscers are suffering from Ulceration, Internal viscera are surreflammation, or from

Gastric, Biliary, Pancreatic Com-

Gastric, Biliary, Pancreatic Complaints,
Dr. RADWAY'S PILLS
Supply the only Vegetable sub-titute for CALOMEL OR MERCURA.
In Radway's Pills you have one medicine that will secure quicker, more thorough and better results than will be gived in from three or more different prescriptions of the medical practitioner. As a proof of this—You are seized with a bilious attack! Doctor prescribes blue pills or calomel. Next, come drastic sloetic pill or powders, to work off the effects of the blue pills this prostrates you, and a tonic is next given, to a gentle aperiant, whereas one dose of Radway's Pills will do all the work that the three or more prescriptions are given for, without running any risk from mecurialising or salivating the system.

Radway's Pills. In Radway's Pills the true principle of purgation is secured—not alone to the ollice of dismissing the faces and excrements from the bowels, but these rumors that are checked or stopped in their passage through the Skin, Kidneys, Lings, and all excreting and ecerting functions; lor if those excrementatious secretions belonging to the skin, liver, lungs, kidneys, are interrupted in their escape, they become products of decay and decomposition, and must be purged from the living body through their proper channels; hence the purgetive qualities of Rudway's Pills extend to the secretions of the Skin, Kidneys, Diver, &c.; whereas not one of the advertised Pills claim to act beyond the bowels.

How to take Radway's Pills. How to take Railway's Pills.

Their daily use.

In doses of one or two pills, by all persons of a full habit of body, subject to giddiness, rush of blood to the head, palpitation of the heart, and all this she subject to fits, will not only keep the blood room becoming congested or clogged up in the blood vessels, but will equalise its circulation, and prevent sudden attacks of apoplexy, disease of the heart, congestion. Persons who will take one of these Pills every day will not suffer from Head-aches, Dizziness, Hysterics, Fainting Spells, Pains around the Heart, and a hundred other disagreeable symptoms.

DYSPEPSIA. One of Radway's Pills, two or three hours bo-fore dinner, taken daily, will keep the system free from Dyspepsia, Contipution, Costiveness,

Bear in Mind, Bear in Mind,
Radway's Pills are the only purgative that
will secure an alterative, diurctic, sudorific, aperiant, and tonic influence.
They are the only vegetable substitutes
Calomel or Mercury
They promote the secretion of bile, and withdraw it from the circulation.
They assist, through their nutritous properties, the chyme and chyle, and gastric juices in the process of digestion.
They are elegantly coated with Gum, perfectly tasteless, and free from smell.

asteless, and free from smell.

CORDOVA EXHIBITION.

GRAND INAUGURATION. On Sunday, 15th inst., at two o'clock p.m., precisely, the grand official inauguration of the Cordova Exhibition took place. The morning looked rait would be a wet day. Mr. Rodgers, an American resident of Cordova, testified that at an early hour it rained, and he even thought it snowed, but towards noon the sun of Mayo shone out in all its resplendent glory on the city of Cordova. All the vehicles in the city were called into requisition to convey the visitors. though the exhibition is but five squares from the centre of the town, the streets were thronged at an early hour; a few new faces from Buenos Ayres might be met with here and there, passengers by last night's train: soldiers were marched to and fro, officers galloped in the streets, flags The opening of the Cordoba Exhi- were flying from almost every house

ceremony will be found in another co- gramme, and the invited guests were lumn. The Exhibition wanted no- requested to attend in the gardens thing but a more crowded attendance punctually at one o'clock, being an A 8 ing to the great distance of Cordoba the invitations were limited to ministers, governors, editors, and legislafrom the seaboard, the attendance of tors, there was a good deal of comvisitors was much under what was ge | plaint, particularly by those who had come from Montevideo and Buenos ento and his ministers Drs. Velez and Ayres, but the committee were mexorable. On entering the gardens at Avellaneda are still in Cordoba, but one o'clock we were welcomed by Mr.

There were only three of the Buenos Ayrean newspapers represented—The Tribuna, Italiano, and Standard. The gardens are really beautifully laid out. but we reserve for another letter a The session of Congress has closed, full description of them. The walks were lined on either side with soldiers from Buenos Ayres, whilst on the crest of the hill were posted several pieces of artillery. At two o'clock the band struck up, and President Sarmiento's carriage drove up. All the invited guests were now assembled betrance of the building. The President, The health of the city of Buenos accompanied by Dr. Velez and Dr. governors of Cordova and Santa Fé, tee, and as representative of the Goconsiderable length. Dr. Avellaneda minister of instruction, next rose and also read his speech, which was a very The Provincial Legislature is still splendid and eloquent composition. The Exhibition could hardly astonish the lumber-men of the Baltic be a greater success in a country such as this, but the Inauguration was of iron, gold, silver, copper, all that the that lukewarm stamp which speaks of a national indifference. The following grandise a nation; are there; and yet is the programme of the ensuing féte " but many of the visitors are already preparing to leave for Rosario:-

building and gardens. Tuesday. Goudola race on the Lago Sobre Monte. Wednesday: Inauguration of the Observatory. Thursday: Ball given by Cordoba people to visitors. Friday: Inauguration of Taboada

Railway Saturday: Pic-nic to Sierras.

THE EXHIBITION.

It is right to put this subject in a proper light before our readers. The Cordoba Exhibition, as a show, may be considered a success; as a great national industrial gathering, a decided failure. Humble as were the offerings from each of the provinces, and infantine the shows of Argentine art, still there was that in the affair which spoke an emulation, and on paths which

It may be that agricultural industry driving the Moors from Spain. At the conclusion of the speech the Prethat the \$300,000f which the show has the good to be derived from the failure However short of our expectations in Cordoba is simply that it shows

The idea of an Exhibition in these Ayres from reading descriptions in Sarmiento, who erred in locating it so gressmen arrived on Monday; two re-It is not now our intention to de-Cordoba on some business. Now, when After promenading for about an even the very legislators of the nation hour through the edifice, we left for betray such apathy, can there be much

There were positively more families story is told of a respected matron of men from Buenos Ayres on their way back to Mendoza. 'Why, how is this \$30 mic each, and the probabilities are that prices will yet go higher.

Seat The repast lasted about half at Cordoba just in time for the Inauguan bour. There were no speeches ration. But what was her surprise to find that only invited guests were allowed to witness the Grand Inaugurauncouth manner, which provoked so strong a feeling against the Exhibition that the Cordoba people, who at no time betrayed much interest in the affair, availed of the split between the 'dead heads' who were invited and the visitors who paid, joined with the latter, and kept away altogether, Thus we find that a scheme pregnant with mighty results for the nation-if in good hands, properly located, and well carried out-was frustrated at the very outset by the most censurable mismanagement on the part of the Committee tervals, and the sight was one of the of Management in offending the ladies,

much. We doubt if amongst all the visitors who attended the place during the week after the Inauguration one hundred Provincianos could be found. Even strike from the list of visitors the foreigners who attended, and the whole affair is reduced to what the Americans call a 'one-horse concern.' Where was the grand gathering of the nation, and the immense concourse of people, which Mr. President Sarmiento was supposed to be addressing when he Le Maistre, German Minis er, Mr. read his spicy speech at the Inauguration? Chairs with fine blue velvet Sr.—, Italian Charge d'Affairs, cushions were ranged round the great Mr. L. Joel, British Consul, Posario; throne of state, upon the backs of throne of state, upon the backs of Messrs. Perkins, Weldon, Bollart, which were pinned cards, with the names of the governors of the various provinces neatly inscribed thereon. Mr. and Mrs. Livingston, Mr. Rich, But the chairs were empty; and where were the governors? Two provinces of the whole Argentine Amphyetrionic Council of States showed their governors on the ground; as for the re mainder, we can give but the sheriff's return - 'non est inventus.'

The Exhibition, a show, as was by no means deficient. People ran up and down the building, over the partment, thence to the stables. The most cursory glance in this manner tailed ' ispection of all the articles exmany days. The rude manufactures of the Interior showed what might be done in these countries-if-if-

Let us say, by way of compromise, If the right men were in the right place." Capital, and talent, and genius, and industry have a good field in this country, and the Cordoba Exhibition proves it. The bone we have, but lack the sinew. Everything in the Argentine Republic to-day is upside down the Exhibition proves it. The products of the Interior are rich, valuable, and inexhaustible; but the brains are wanting to turn them to account. Amespil, the Buenos Avrean tanner astonish the shoemakers of New York or the cobblers of Hamburg. Lyons It is to be regretted that there is so never yet rivalled the silk dresses woven within a stone's throw of Buewool mock all the genius and capital or the pine dealers of Searsport; coal severest economist could ask to agto what account? Wines, sugars, tobacco, rice wool, hides, all the staples which civilized man taxes for his sup-Monday: Illumination of Exhibition port or luxury, all are there-damning proofs of the lethargic life of a nation over three hundred years old.

The Exhibition is a looking-glass held to the conscience of the nation, it proves what few editors care to pub lish, and to the eyes of the European visitor shows what might be done in this country if the people would put their shoulders to the wheel in real earnest. Horned cattle were there which at the best cattle show in England would attract notice, and yet in the city of Cordoba there is not a pound of fresh butter to be had for love or mo-

INAUGURATION OF THE

OBSERVATORY. The formal inauguration of the Ar gentine Observatory at Cordoba, took place with all the pride, pomp and ciremmstance of glorious science, on Tuesday last, in the presence of the dignituries of the land and the clite of Cordoba. The Bishop took the initiative by blessing the enormous telescope, the largest instrument of the kind on the South American continent. Professor Gould then stepped forward and pronounced the following remarkable address: we make no apology for its length, but commend it to the attentive perusal of our readers. It is a document for history, beautiful in its composition, and highly felicitous in its remarks. Even amongst the audience every pause of the Professor was welcomed with applause. Dr. Avellaneda, Minister of Education, spoke at the conclusion of the Profesor's address, and President Sarmiento concluded the proceedings with a few

mropos remarks. In spreading open our sheet to this lengthened address of Professor Gould, we pay no mean compliment to our readers, who will doubtless appreciate its beauty. The paper is less for a local public than the whole scientific world, of which the professor is so ta-lented an oracle. The perusal of such matter is refreshing even to the general reader, who rarely finds in the papers of the day matter so calculated to ennoble the mind and elevate the soul. The following is this memorable ad-

dress:— Mr. President and Gentlemen, The history of civilization teaches, that there is between the development of the arts of life and the advancement of the physical sciences an intimate reciprocal relation. When physical research languishes, the arts falter in their progress; where the spirit of man is wrestling with nature to force some knowledge of the laws which single vibration of the humming-bird's some knowledge of the laws which God has impressed upon the material world, the noble strife is rewarded by unlooked-for recompenses; with the laurels of the bleodless and ennobling victory, we find blended the oak and the olive; and intellectual effort finds the unexpected tribute of material advancement. Why this is so, it is no large tribute of material advancement. Why this is so, it is no large tribute of material advancement. vancement. Why this is so, it is no part of our task, to-day, to inquire; yet it is eminently fitting to recall this tory. lesson of experience, as we turn for a tory can demonstrate, disclose that resson or experience, as we turn for a spark of divinity which is implanted brief period from that beautiful and spark of divinity which is implanted honourable spectacle which for the in the buman breast? last few days has fascinated our atteninauguration of this Temple of Science, cities of the people-how better than dedicated to the study of those truths by placing among them an institution an ordinary opera-glass will exhibit which the Creator of all things has whose results and whose very presence written with his own hand upon the afford a stimulus to study and to in a comparatively small telescope easily visible heavens, in characters so sub. vestigation? If it be a duty to form shows 200,000, while there are telelime that human intellect fails at first alliances with neighbouring nations, to scopes in existence with which there is to recognize their glory, or to compred resist the inroads of barbarism, and reason to believe that not less than 25 hend their majestic significance.

for the advancement of the Republic; discover the counsels and the laws changes as are taking place in their po-

that to the same department of Government should be confided the execution and control of both; and the lected for their establishment. It is appropriate that the liberal Minister should be charged with the organization of the Exposition of National Industry and Arts; and that, while he part in the foundation of those temples where the works of God are to be

Your Excellency, Mr. President, His Excellency, the Minister of Justice, Worship and Public Instruction, and these distinguished citizens, will therefore allow me to express my gratification, not only that I am permitted to bear my modest part on so auspicious an occasion, but also that these two sources of abundant future pride to the Republic-are so closely related in place, in time, and in origin.

second National Observatory upon the South American continent, and the has likewise enlisted in the glorious first institution of pure scientific research established by the Argentine Nation, although we may not forget considerations. Possibly you may do-the splendid museum of the province sire to know what we are proposing to of B. Ayres, to which the learning and do at present, what we hope to do soon, ability of its Director has given such a and what we have succeeded in doing world-wide renown. A path is now already. fairly broken for the progress of the new forms of intellectual culture and higher civilization which are winning whispered that this Observatory is a foothold in all the leading nations o the earth. Within my own memory the number of observatories in existence where astronomical observations are habitually made, has increased three-fold. Within but little more than 25 years, has been constructed every active observatory now existing in the United States. Even during the single year since the province of Cordoba their subject of discord, both French resented to the nation, for astronomical purposes, the land on which we now stand, tidings have reached me of at such a time. Happily our books the establishment of three new astro- and instruments escaped capture by nomical observatories in that country; the enemy; but when that danger was and there is now scarcely a single institution of higher instruction in that epublic, possessing any distinction, which is not either provided with an observatory or engaged in the endeavor to secure one. There are thus at the brilliant city desolated by pesti-least twenty such institutions in the lence, and all the agencies and facili-United States already provided with ties for commerce gone. These delays the means of adding to the sum of hu- over, yet others and still worse ones man knowledge. In England and on came, for, ascending the Parana, the the European continent the number is port of Rosario was found blockaded. far greater; and in this southern half not by foreign foes, but by domestic of our Western hemisphere, we have apprehensions; and thus nearly a year tidings of a magnificent telescope now crecting in the city of Quito, upon the very equator itself, as well as of an observatory, which that devoted lover of science, the Emperor of Brazil, has public works of the nation; and it is founded upon the shores of the beau-not quite two months since the legislatiful bay which gives name to its cation was perfected which enabled us to pital. Thus at least the stimulus of resume the work. Now, at last, our emulation will not be wanting to us, building presents itself in its full proexplorers of the Southern skies.

I might enter upon extended remarks for the purpose of explaining actively at work. and illustrating the practical benefits ment. Shall the New World not bear tellectual portion of mankind is carry ing on to obtain possession of the Holy Land of Truth? gathering from the mysterious and yet unfathomed realms of the unknown a knowledge of those decreed, and which he has made acmental powers with which he has endowed the human race. If it be among the duties of a good

Government to promote the religious be better done than by disclosing to Author of Nature has inscribed upon the universe which he has made; and proving that God has created man in his own image by implanting in him the capacity to fathom the very secrets of creation? It is demonstrable that mortal man has actually measured the distances o' stars so remote that would be needed for its transmission, their light requires nine or ten years to reach us, although travelling 64,000 leagues in a second-that is to say, with more than ten times the speed of an electric signal appon the telegraph wires, and with such rapidity that it would encircle the earth during one If it be the part of a good govern-

tion, and come bither to assist in the ment to develop the intellectual capasecure the influences of civilization million stars are visible. It is peculiarly appropriate, that the and free institutions, even by the same enlightened statesman who con sword—it surely must be incumbent idea of the National Exposition, should its share in that grander alliance by the position and brilliancy of the prinhonorable and salutary institutions man's knowledge of the universe, and but also in order that such small

according to which the Almighty has seen fit to create the material worlds! Every telescope that explores the heasame central and ancient city be selvens is a piece of artillery for the invasion of the realm of ignorance; and it bears its part in the conquest of new who presides over Public Instruction and lofty truths, by which the human race shall be exalted, morally, intellectually and physically. A century ago, the few observatories, sparsely dotted administers the affairs pertaining to here and there through a small region of public worship, he should likewise take | Europe, contained all the means which here and there through a small region of

the human race possessed for fathoming the sublime traths of astronomy. studied, as he has presented them for Yet how magnificent were their resto nonder and to explore.

Yet how magnificent were their results! And now this earth of ours is beginning to bristle with astronomical batteries; and the majestic outposts of the army of scientific investigation are to be found in the farthest regions of the globe. Fervid India and the Polar Circle, the distant shores of Australia and both the coasts of either hemisphere bear witness to the coninaugurations—both of them, in my quering march of discovery; and, firm belief, harbingers of blessings and much as man has learned of God's creation hitherto, he is learning more in each single year now, than ever in half a century before. Twenty years We celebrate the foundation of the have passed since Chile joined the holy alliance, and now our Argentine land

But I will pass from these general

That there have been delays, I need not tell you. Indeed, I have heard it neither the first nor the only enterprise which has not progressed with the sneed which the managers could have desired. Our instruments were on board ship and ready for sea, when that great war broke out which recently convulsed all Europe. Some were on aboard a French vessel and some were in German ships; but whatsoever and German vessels agreed on one point—that port was better than sea past, came a new obstacle, for they were ice-bound in those northern seas Months passed and melted the Baltic ice; but when the vessels reached the distant shores of the Plate, they found had elapsed before our implements

were safely received in Cordoba. Meanwhile our edifice had not escaned the common calamity of all the portions, and but a little while need elapse before all the instruments are

When we lift our glances to the nocwhich a National Observatory, proper-turnal sky, while neither moon nor ly administered, might be expected to clouds obstruct the beauty of the confer. I might show how, through scene, and contemplate the myriad the agency of this Observatory, our geography may be perfected—the characteristics of our climate so investigations with a milder light, and others ed as to serve the wants of agriculture still just visible to the unaided eye,—and commerce—gifted young men there are few cultivated or thoughtful trained for the national service as mi- minds which can fail to be deeply imlitary, naval or civil engineers-the pressed. Yet rarely does the beholder time accurately determined and telegraphed for use by the railroads, and for adjusting chronometers at the seaports—and might describe those various other ways in which we hope that their position among the rest from day it will directly minister to the practical service of the Argentine nation. But, log when we see the heavens are the practical of the Argentine nation. But, log when the property age they shope dawn when the urely, this would be needless. The nearly as they shone down upon the statesmen in the Executive and Legis. sages of antiquity,-yes, upon the very lative councils, who have of recent earliest of the human race,—and as years been shaping the policy of the they lighted up the midnight for those Republic so wisely and with such large views—founding railways, instituting telegraphs, building roads and bridges, suppressing foreign invasion, domestic insurrection and savage incursion, disseminating primary and normal schools, establishing colleges, and introducing into the universities the studies of God's thomed abyss of creation. Not one in works as well as man's words-these a hundred of those stars is within a men need no indications of mine to distance which the resources of science show them the practical value of this new institution which they have them us to measure; yet the tremendous selves established. Rather would I distances of those few nearest ones, say a word regarding the claims which which man has at length succeeded in abstract science has upon every civil determining, are such that our imagized nation, to aid in her advance nations fail to conceive them, even when the demonstrations of science her part in the crusade which the in- compel our intellects to accept the facts. Of all the stars whose distances have yet been measured in either hemisphere, the nearest is the one called Alpha, in the constellation of the Centaur, the brightest of these two bright facts and laws which the Creator has ones which point to the Southern Cross. The distance of this star is 86 cessible to us, if we will but use those million times that of the moon. It is more than seven millions of millions of leagues. A cannon ball, impelled at the rate of three and a half leagues a minute, would require four million sentiment of the people, how can this years to reach this star. Yet it seems to be the nearest to us of all. Sirins, them the revelations which the allwise the brightest star in the sky, is at more than six times this distance. Light itself requires more than twenty years

> scendants would receive the tidings intended for ourselves. These stars are among the nearest of all. Their distances are measurable within relatively narrow limits of uncertainty; but the researches of astronomers have shown that comparatively very few of the stars-probably not one in every hundred visible to the unaided eye-are at all comparable with these in nearness, and human capacity has proved inadequate to determine their distances, even with crude approximation.

to reach us from that stupendous re-

moteness; and could a telegraphic

message be sent us thence with the

same speed as it traverses the elec-

tric wires upon earth, at least 360 years

and the tenth generation of our de-

Enough is here to compel our wonder and our awe; yet when the telescope is called to our aid, we find that what our unassisted vision had disclosed was but a faint suggestion of the countless myriads which are revealed. The number of stars visible to the naked eye in the entire circuit of the heavens has been usually estimated at about 6000:

Here is a field for the astronomer. And it is clearly one of his first duties ceived and guided to its fulfilment the upon every civilized people to assume to determine, as accurately as he can, now also dedicate the National Obser, which the most enlightened nations of cipal celestial objects, not only in order vatory; that the same patriotic Con. the earth are joining in one solid phat to be thus provided with landmarks gress should, during one Session, have lanx to disperse the darkness which in the heavens by which to trace sanctioned and endowed both of these for so many centuries has obscured the movements of planets and comets,

It has given us the knowledge sky. Since that time a permanent ob- of a considerable number of stars ryatory has been established by the which possess the singular character British Covernment at the same place, that their brightness is not always the and a large number of valuable obser-same, but undergoes systematic variavations have been made by various tions. Some have been seen to rise to eminent men. Other observatories in considerable brilliancy, and then fade the southern hemisphere have been away until telescopes of some power founded at Paramatta, Santiago de are needed for rendering them visible. Chile, and Melbourne, all of which Others still are now found to possess have contributed essentially to our a brilliancy decidedly greater or de knowledge of the southern sky; as cidedly less than that which has been also has the observatory at Madras, assigned to them by more than one which, although north of the equator, astronomer in times past. Such stars commands a view of the greater por must be carefully watched, and the tion of the southern heavens. Yet how fact of any regular and periodic finemuch remains to be done in this directuation in the amount of their light tion will be very evident when I state either established or disproved. Of that, while the number of stars in the such cases there are already many on northern hemisphere whose positions our records, thanks to the assiduity and magnitudes have been determined and zeal of the assistant astronomers cannot fall short of about 330,000, the no one of whom has failed to make number in the southern hemipshere manifest the existence of several. One whose observed places have been pub. of those most remarkable for the ra- gislators, although they voted \$40,000 pidity of its changes is a little star in lished does not probably exceed 50,000. But this is not all. The greater portion of those which have been observed lie in that part of the sky which is clearly visible in Europe: and if we other half, while the observations of consider the regions beyond 30 deg., there are scarcely 13,000 southern stars all its changes within the short interwhose places and magnitudes have val of 211 hours. Abother in the conbeen determined and made available stellation of the 'Southern Triangle,' for scientific use, while the correspond- which has been regularly observed by ing portion of the northern sky contains Mr. Davis, exhibits regular, fluctuasomething like 164,000 such stars. The tions of light, comprised within a pelate astronomer Gilliss, the originator riod of about 3½ days, similarly alterof what is now the National Observa- nating between visibility and invisitory of Chile, as well as of the Naval bility. These two exhibit the most Observatory at Washington, of which rapid changes of any of the stars latter he was the Director at the time which we have hitherto observed; but of his death, devoted much time and there are others not less interesting, labor to the effort to supply this press observed not only by the two gentleing need; and while at Santiago, he men mentioned, but also by Messrs, made the requisite observations for Thome and Hathaway, who are likedetermining the places of no less than wise pursuing these investigations 23,000 stars within 40 deg. of the South with much success. Pole. The computations were carried on at the expense of the U.S. Government, and were nearly completed at the time of his death, in 1865, after which the work was unfortunately suspended; but I have lately received the gratifying assurance that the calcula tions are now to be completed, and the resulting catalogue published by the Observatory at Washington.

The first undertaking now proposed aided sight of every one of our obserfor the Argentine Observatory is to do something towards filling this hiatus by determining the places of the principal stars situated between the tropic, ern Hemisphere we have 800 more, making in all at least 7,200 stars; so where the observations of northern asthat we are justified in the belief that tronomers begin to become less numerwere the sky equally fransparent for astronomers in the Northern Hemious, and the polar circle, where Gilliss' observations commence. This work is best performed by dividing the sky into narrow zones or belts, and subjecting each zone to a special scrutiny for mated at certainly not less than 11,000, the purpose of measuring the positions instead of half that number. of all stars of a sufficient brightness within its limits. If no unforeseen impediment presents itself, these observations should be completed within two years from their commencement.

There is another most important inrelative positions of clusters of stars of stars of the stars observed must not only be given with scrupulous acdetermined by means of a measurement of the photographic impressions, with a degree of precision far greater than that of the ordinary methods. And this process possesses the signal and peculiar advantage, that the such is the character of the observastars' places at a given moment may The duties of a public observatory imbe preserved, and the measurements ply the prosecution of regular and repeated at any subsequent time. The systematic investigations, as distinprocess has not yet been introduced guished from those desultory ones, into European observatories, but it has which require less organisation, and been thoroughly tested in America, can be equally well carried on by inbeen made by this photographic me-timplements of research. Thus, for intended by this photographic me-timplements of research. Thus, for intended the time of my departure from stance, the search for comets—which stance, the search for comets—which is done that repose which is done to the time of my departure from stance, the search for comets—which is done to the time of my departure from stance, the search for comets—which is done to the time of my departure from stance. the United States I had some reason to appear unexpectedly, and are usually the Ouncer States Phacesome reason to appear unexpectedly, and are distanty believe that contributions to a considerable amount would be made by the ny of the sky for this purpose—is of friends of science in my native city, in course incompatible with the execuorder to permit photographs of objects tion of a regular system of observain the southern sky to be made at this tions. The time bestowed upon such observatory. My hopes in this respect were not entirely fulfilled; but I have have time at their command, and may still much confidence that something result in valuable accessions to our may be done in that direction, and knowledge, but it is not desirable that that I may yet Jenjoy the privilege of astronomers, provided with delicate soliciting from his Excellency the Mi- and costly instruments, should neglect nister of Public Instruction permission those observations which must yield a to make at the Argentine National Obsure return, in order to expend their servatory the first stellar photographs energies in directions where success is in the southern hemisphere; these to less certain, and, indeed, less importbe subsequently measured, and the ant; even though it may promise at results submitted to rigorous computa- the moment a greater share of public

It remains for me, Mr. President and at the risk of wearying you, regarding shall be so directed as to contribute the manner in which we have employed most efficiently to the progress, culour time during this past year while ture, and honor of the nation, and to awaiting the completion of the Obser-the advancement of astronomy. vatory.

earnest endeavor. During the greater part of the year building, and during the short time completed, as regards its building, and these have been available we have experienced an unexpected and most separate the second seco rious obstacle in the clouds of impalpable dust, which, rising from all sides, their size in existence—made by artists penetrate to the inmost crevices of every part of the instruments. This work which should create an enduring the part of the instruments. difficulty will, I think, be obviated to a reputation for your Observatory. The great extent when vegetable growth obstacles to its usefulness are far-from shall have covered the soil; and to this insurmountable. The influences for end H. E. the Minister has given di- its advancement are those which could rections for providing as good a supply not be improved, for they are to be of water as may be possible, while found in the large views of the Nationthe building and instruments have all Government and of the Congress. been provided with special and unusu- home endeavors to deserve the confial protections against the evil. Permit me, too, in the name of science which knows no country, save as it af fords new teachings, no hemisphere save as it discloses new heavens and a new earth, no zone, save as it presents in new exuberance the wondrous works of God—to offer you the thanks of its votaries throughout the world for what you are here undertaking to accomplish.

THE SESSION OF 1871.

Congress bas, closed its labours, for the current year, after a brief session of three months, instead of five as dictated by the Constitution. We need not allude to the sad circumstances which prevented the opening of the Chambers at the usual period, in May, further than to note that, after a'l, the health of our city has not received any a tention at the hands of our lefor sanitary improvements in Corrientes. It is an ungrateful task to the constellation 'Musea,' which is infind fault with a body which reprevisible to the unaided sight during one sents the aggregate of enlightened half its period, and visible during the patriotism and advancement in the suggestion that it one half the talent perhaps the Government will consider Republic; but we cannot resist the Mr. Rock show that it goes through had been devoted to the improvement optional with the Government to adof Buenos Ayres, the names of the Senators and Deputies would have deserved to be inscribed in letters of in the centre of the renovated metropolis. Nevertheless, we are ready specie certificates of the Provincial to admit that some very important measures have been passed omission of them in the new law. which command universal approval, Again as regards the calculation of such as the Trial by Jury, establishment of a Department of tariff, it was customary to add 20 per

Agriculture, a new coach-road over cent to the invoice, but the new law the Andes at Uspallata, and opening makes no mention of this addition, as of ports at Ensenada, Bahia Blanca, if now removed. Finally goods in and Patagones. Among minor matters transit from Concordia for Brazil or we must also cordially approve the Paraguay were allowed free passage, pension voted to General Paunero's but the new law expresses "for Brafamily, and a like liberality to the wi- zil."We note also that the permission dows of those doctors who perished in to forward imported goods by the Centhe epidemic; also the patents for lead tral Argentine failway from Rosario foundry; floating docks, and other new to Cordoba, to pay the duties at the last industries. The adoption of the narrow named place, is abrogated; and such gauge for the Tucuman Railway seems goods must pay the duties at Rosario a wise step, but this is a matter for the consideration of scientific men. The vote of four millions for building a harbor in Buenos Ayres appears en-Castro to decline meddling in the lowing articles:work, and leave it entirely to the Nat. Government.

ble to the ordinary eye would be esti- tion of Santiago we cannot too highly appland the decision of Congress connear its conclusion. Little remains to tervention; such policy has probably such mounting increases their value complete the necessary observations, spared us a civil war, which, if once by one third, to pay 10 per cent. The only censure we permit ourself 3 per cent. investigations require. But the work

of publication will of course be labor- to make respecting this session of Conious, and somewhat expensive. The gres is the unpardonable hurry of the free: vesugation especially desirable in the provinces. The present condition of our knowledge: maps will need to be drawn with sent the application of the newly distributed by the provinces. They be present care, and the positions of the provinces. great care, and the positions of the their homes in the provinces. They religious purposes, to religious comrelative positions of clusters of stars may be permanently recorded by photographing them upon glass, and tographing them upon glass, and tographing them upon glass, and the astronomers. Still, I way or other respecting it. The vote mining, and the arts and sciences. tographing them upon glass, and the numerical values subsequently determined by means of a measurefor all this will be accessible in due Railway is perhaps as well in abeyance; but the concession solicited by M. Sempére for colonizing Patagonia Such is the nature of the task-which was worth a passing attention, as well the observatory now proposes to itself; as Mr. Ximenez's scheme for a railway tions which it has been carrying on.

across the Chaco. We now enter on the recess, in which the National Government will have to assume for a time the duties of both Executive and Legislature, and to carry out, or at least commence, those public works for which the last loan was made in London. The Senators and Deputies are already hasnied to the life of a journalist, and of which we trust they will avail them selves to examine the necessities of the country as compared with its regrease raw or rendered. sources, and to study the practices cedure, such as in England and the United States, which must be the example in every country, whether Monarchical or Republican, where liberty is to exist along with order, and the welfare of the nation go hand in hand with individual enterprise.

We take from the Republica the following list of measures passed by Congress this session :-

Department of Agriculture. Pension to Gen Olazabal's widow. Subsidy of \$90,000 for Exhibition. Free exportation of guano. Vote of \$291,000 for frontiers. Patent for floating-docks. Vote of \$5,000 for Cordoba Observa

Approval of Public Credit report. Brazilian extradition treaty modi-Loan of 6 millions with Provincial

Railway surveys Rio Cuarto to San Bank. Pension to General Pannero's wi-Juan.

Removal of capital to Villa Maria. Veto and revocation of same. Subsidies for schools in Interior. Non-intervention in Santiago. Subsidiary vote for Interior. Pension to A. Barros's daughter. Pension to General Martinez's wi

Pension to Dr. Molina's widow. Recognition of Salta claims. Recognition of the Riera Lopez Patent for lead foundry.

Argentines allowed to accept foreign onsulates. Emision of 1 million bonds. Galvan's steamboat claim. Gen Chenaut's claim for \$5,000. Arrears to Gen. E. Frias. Subsidy of \$40,000 to Corrientes. Ports opene: at B. Blanca, Ense-

Pension to families of doctors who died at Corrientes. Domingo Oro's mining law \$8000. System of trial by jury. Coach-road over the Andes. Compensation to E. Wilder. Stamp-law for 1872.

nada and Patagones.

Customs-law for 1872. graphed.

Subsidiary war expenses \$252,318. which the present affords. Not only Tucuman Railway sanctioned. Free exportation of live cattle.

Budget for 1872. The bills remaining before Congress unsettled, and which must remain in this 7th day of Oct., 1871.

statu quo till next year, are as follows:-Project of Nat. Bank. Austro-Hungarian treaty.

Vote of censure on Central Argentine Railway Gran Chacho Railway, Corrientes to Salta.

Sémperes colonies for Patagonia. Auditors for Government accounts, Bond-holders' petition of 1867. Protection for silk-growing. Repeal of forced military service. Institute of short hand writers. Pension for he student P. Ozuna. Pension fort B. Aguirre, in Europe, Claim of Col. Mateo Martinez. Pension for Juan Piris's widow.

THE NEW CUSTOM HOUSE LAW.

New National Register.

The following is the new Customhouse law passed by Congress for the ensuing year:-The only alterations as compared

with the law of 1871 are-Under the head of Imports we find the duty on precious stones, which was 10 per cent., is reduced to 3 per cent.; and among the articles last year imported duty free the item "fire-

engines" is omitted this year, although

Export-duties are unaltered, but an important change is to be noted in duties on articles not included in the

> A. Alsina, Pres. of Sen. M. Acosta, Pres. of Dep. THE WELSH COLONY.

At last the Government has decreed 3,000 patacons for the purchase of a schooner to keep communication with the Welsh Colony,

This result, we are told, is due to the clear and persevering manner in which Mr: MacDonnell, H,M's. Chargé d'Affaires, put the case before Dr. Teedor, the Foreign Minister, Mr. Jones, the agent of the colony, during his five months' stay here had endeavoured in vain to obtain the necessary subsidy through the usual channel of the Ministry of Interior; but when the matter was mooted to Dr. Tejedor, he at once saw something must be done, and at length induced his colleagues to accede to the petition of the agent. Although, strictly speaking, the affair did not belong to the Foreign Office, yet the Minister in this instance rose above all quibbling scruples, and so not only added to his own reputation, but saved the credit of the Government of which be is a member.

But is it not monstrous that such a plain small matter of business should take five months to settle? Mr. Jones has been away from his colony on this mission upwards of six months and a of moving the capital to Villa Maria gory of such machinery as it is left half. In that interval, by mere good successful trading trips to and from Patagones, and so relieved the immediate wants of the colonists; otherwise they would have been minus of gold on a trophy of Carrara marble their payment, which must henceforth all 'comestibles,' clothing, &c. during

be in cash instead of bills. Formerly this long absence of their agent. Such a plight has been averted by an Ita-Bank were receivable, but there is an lian whaleboat, otherwise the suffer ings of the Chubut Colonists would probably have been added to the massacre at the Alexandra Colony and the general desolation of the frontier. The latest advices from the Colony

report all well. In June last, however, three or four Indians made a sweep of 65 horses one night from the upper chacras, which necessitated the return of three families to the village until fresh horses could be procured from the regular trading Indians. Mr. Jones entertains hopes that on his return he will be able to have the stolen horses returned.

Two settlers have just started overland from Patagones for the Colony, more from a desire to see the intercening country than anything else. In the Government decree granting

the vessel it is also notified that Mr. Jones is appointed Government Agent at the Colony. A Dutch schooner has already been

purchased with the Government subsidy, and is in course of being loaded, so that ere long the colonists will again be at their ease.

THE PORT SCHEME. SANCTION OF THE BILL,

At its final sitting of the session just ties passed the Bill, previously sance tioned by the Senate, for the construc tion of a Port, docks, wharves, etc. at Buenos Ayres.

Tae following are the previsions of the Port Bill :-

Art. I. The National Executive shall accept the aid of the Provincial Government in the construction of a Port for this city, on the following bases:

1st. The National Government shall

subscribe towards the cost of the works subscribe towards the cost of the works 4,000,000 hard dollars of the Public Bank, are now paying of their most pressing Works Loan, sanctioned on the 5th of August, 1870. 2nd. The Provincial Government

may contribute to the work whatever it deems expedient towards covering the cost. 3rd. The proceeds of the sale of so

much of the reclaimed land as may remain after the completion of the works shall be divided between the National and Provincial Governments, in proportion to the sums respectively contributed by them. 4th. The dues to be levied for the

use of the wharves, bonded stores &c. shall be determined and collected by the National authorities. The net proceeds of such dues, less all expenses of collection and preservation of the works, shall be divided pro rata' between both Governments. 5th. The National Government shall

direct and superintend the works. 6th. The National Government may buy from that of the Province whatever portion of the work may pertain to the latter, and, on the other hand, should the National Government wish to dispose of its share, the Government of the l'rovince shall have a preferential right to purchase.

Art. II. The drawings, estimates and plans shall be returned to the National Executive, so that Mr. Bateman may be instructed to complete them, that they may be submitted them, that they may be submitted to a commission of Engineers here or abroad. Art. III. When the plans are com-

pleted and examined, in accordance with the preceding Article, the Executive shall submit them to Congress

PORT OF BUENOS AYRES. Governor Castro's message of last

Wednesday to the Provincial LegislaanArt. 8. Export duties can be paid ture shews that His Excellency is iesh at the first port of shipment, be- desirous of carrying out the Port prothe Governor, or both together, se llong as Mr. Bateman really provide ... jus with a first-rate harbor as he pro-Duties may be paid at any of the mises. Galta, to the Custom-house of Jujuy.

Given at Congress in Buenos Ayres

Executive, but when the port is The following are the prices paid for the last once made there will be two owners troops of cattle of conflicting views and interests, and whether the National Government remain in Buenos Ayres or go up to Villa Maria or the Gran Chaco,

there will be sure to arise numberless causes of difficulty about the ownership and management of so import at an enterprise. If Governor Castro thinks the Province has more funds than he knows what to do with let him consult the Legislature as to voting a subsidy of one, two or more million patacons at

the National Government to carry out the National Government to carry out the work. But we feel certain that the work. But we feel certain that His Excellency will agree with us in the Excellency will agree with us in the district of San Pedro, for the Excellency will agree with us in the second. Some of the Irish sheep farmers of the district have been offered as high saying there are much more urgent necessities, such as city improvements, camp police &c., which are at presen neglected because the Provincial Government has no money. The National Government is ready and willing to make the port at its

own cost, and although the 4 millions set apart in the loan are not enough we in the market have sold out, and are now busy in must remember that there is a saving produce market. The transactions going on are must remember that there is a saving produce market. The transactions going on are full purely between brokers, most of whom are full the multiple of the market. of five millions on the Tucuman Railway [narrow gauge], which will almost meet the full amount of Mr. Bateman's estimate. The bases of agreement as presented

by there Governor to the National Executive and submitted for approval of the Provincial chambers are as tollows-

1st. The National Executive and the Government of Buenos Ayres accept Mr. Bateman's plans, subject to such modifications as Congress may see fit. The Government which takes Geo. Bell and Son at 95, attracted some notice. Charge of the work shall require Mr. Mr. Burmeister was the broker who effected the sale—who also sold a lot from Mr. Lowry's co-B. to make estimates, and, if his proposals be fair, employ him to supe-

rintend the works. 2nd. The National Government shall have entire charge and superintendence of making the port and bonded warehouses, and dispose of been at 14 pats., but coals are retailing at all funds National and Provincial set 16 pats. apart for the purpose; making contracts, appointing inspectors &c., but on no account farming out the port as an enterprise to private or joint-stock companies, nor distracting any of the funds destined for the port.

3rd. The quota of the National Government shall be 4 million hard dollars as specified in the London loan, besides any other funds that Congress may vote for the purpose. The Provincial Government of Buenos Ayres shall give the proceeds af the Domin guez loan, as well as free grant of the land on which the port will be built and the proceeds by sale of land res ened from the river, all which shall represent the capital subscribed by the Province, as well as any further votes the Provincial Legislature may make for the purpose.

4th. The National and Provincial Governments shall each pay the interest &c. on the debts respectively created for this end. 5th. The works of the port and

bonded warehouses shall in all respeets be considered the joint property of the Nation and Province, iu the proportion in which they respectively found the capital for the outlay. But

exact cost of same, and if the National Government wish to sell the port and warehouses, the preference shall always be given to Buenos Ayres as a urch aser.

ON 'CHANGE.

Oct. 17, 1871. The Municipality, having received an advance

Hank, are now paying on the six per claims.

Matenant of the present position of the Six per Cost. Interest and One per Cent Amortization Ary nine Internal Bonds.

Total amount issued by the National Government to date, \$22,110,100 fts., to which is applied annually \$1,547,700 [or say \$1,550,000].

The amount redeemed up to date is in round

The amount redefined up to date is in round numbers \$2,920,000; the capital, or funds now in circulation, consequently is \$19,200,000, with a fund annually of \$1,550,000 for interest and amor ization; the rofore at the end of 1871 they will can be seen to the content of the c will stand thus:-

Oct. 18th, 1871. Blancos and Colorados are trying to exterminal solution as fast as possible. A small lot of good wool from an English es

to in in the south was sold to day by Messr. Pryreited and Bradley at 105 per arrobe. This real the highest importance to sheepfarmers, as st did hing the prices for the season.
Good hides in Banda Oriental sold last week

Real estate in the city has not declined as expected. A new days since a house at the Southment of Call Santingo del Estero was sold for 155,000 delars (ite st twelve months ago 152,000 (5), and define a fire standard months ago below the last. There were a fire number of bidders.

The general statement of the Boca, the orders for which come from London. Besides the Arraga peop styre active purchised by an English firm poor styre active purchased by an English firm et in property, nine squares, is said to on sold in London for 24,000 doubloons it on offer of three in thous currency has been at out for six squares in this locality, which cos ight thousand path ons two years ago east and apower of attorney of some 13 squares, east and apower of attorney of some 13 squares, east the Boca and Lezuma's quinta, will be warded to London by the next French mail to

October 24, 1871.

Exchange ruled to day a shade flatter. The Presincial Government took £2,000, and itwas upmored the Gas Co. took a similar bount heigh-h bills were not to be had at anything over

also arrived. All these gentlemen were welcomed for 'Chango to-day.

Two foreign vessels have gone down to Enseneda to load cargoes of jerked beef at the saladero de Berrisse & Co. We understand this saladero has done and is doing a very large business; only the other day two large Liverpool steamers loaded hides and tallow down there for account of an English house in this market.

> do. do. do. do. do. do. Do.

Do. 270 do.

These prices show the gains to the estancieros by removing the saladeros to Edwards, where there is a good port and overy convenience for pasturing the cattle as they come in. A vessel in the port of Buenos Ayres takes 60 days to lead, whilst at Ensenada he loads in 'wo days. The j-riced beet of this saladero, 12,000 qq, has now been just sold for 29 rls., which is a very good price. good price.

as 80, deliverable at the corral.

October 27, 1871. The Bond market to-day ruled a stade firmer. For cash 3200 were sold at 691; for Tuesday 31s, 15,000 at 693; for December 31st 20,000 at 701. At after hours there were buyers at these rates but no sellers, and prices showed a slight im-provement: Still the Bond market looks heavy. Outsiders who during the winter months dabbled purely between brokers, most of whom are ful-and can carry no larger amount of stock than what they at present hold. Could any large amount of stock be bought at these prices, there are not wanting purties to purchase; but the buying even of 100,000 Bonds would at once send up prices one per cent. Consequently the strong speculators avoid the mark-t until prices fall to a figure which will bring out large amounts at pre-sent hypothecated.

sent hypothecated.
Exchange was a shade flatter to-day; drawers rofused anything over 51. Rutes on Antwerp rul at 5.40 5.42. About £200,000 has been passed for

the packet.
Some Bolsa shares were sold to-day at 85, being 15 per cent. under last quotations.

The sale of some wool from the estancia of

tancia at 91. Money rules easy, and first class bills are done at 7 p r cent. Money is offered on Bonds at 8 per cent. but very large sums have been taken from the bank to send to the camp to pay for

Respecting coals, the last cargo sales have

Clyde line; she will sail for Autwerp and Glas gow on the 17th prox. Messrs. Woodgate bros brokers,
Mr. Taboada, a merchant of Cordova, has obtained concession from the Government of that province to construct a narrow gauge railway to the Calera, a distance at 12 miles from the city of Cordova. The necessary capital for the con-struction of the line has been raised in Leudon, arthetion of the line has seen raised in Zudul, and the works are now about to be commenced. The chief traffic of the proposed railway will be in line, whi h next year will be exported in large quantities to Buenos Ayres and Rosario. Those acquainted with the resources of the district consider that the lime business will be sufficient to approach the company. As regards assences. support the company. As regards passenger traitin, the country is so sparsely settled that nothing on that head can be looked for. The lime of Cordova is of a very superior quality, and Mr. Tahoada hones to be able next year to sell it in the market of Buenos Ayres at a Bolivian dollar

a fanega. Respecting the establishment of a branch of the Provincial Bank in Result, there is much discussion going on in the papers, although in commercial circles the project meets with an almost unanimous approval, it being premised, of course, that the Legislature of Santa Fè wile course, that the Legislature of Santa Fe wile grant to the branch the same rights and privir leges as enjoyed by the Bank here. The subject, though purely a monetary one, has assumed a political importance. In Rosario there is nothing else spoken of, and large and influential meetings have been held to support the scheme. It appears, after all, there has been too much noise made about the matter. The branch might be established the same as any of the other banches through the country, and with the same benedicial results.

A poste ton a new line of railway between the

closed the National Chamber of Deputies passed the Bill, previously sanctioned by the Senate, for the construction of a Port, docks, wharves, etc. at Buenos Ayres.

The carrying out of this gigantic york is of the first importance to the first im respectively supplied by them.

6th. In case the National Government think fit, it may at any time expropriate the portion of the works belonging to Buenos Ayres, paving the longing to Buenos Ayres, paving the dayact cost of same and if the National menced.

SAVINGS BANK BANK MAUA AND Cc. 101--Cangallo--103

The immense advantages of Accounts Current we now so generally felt and appreciated in the wo great emporiums of the River Plate, Montevideo and Buenos Ayres, that there are very fow Merchants who fail to keep one at the bank in which they place the most confidence.

The Bank of Mana & Co. in Montevideo has posited and withdrawn.

The depositor is permitted at any time to with-city safe and profitable depositary for their draw the whole or part of the sum deposited; in the former case the interes will be calculated up

The sums deposited in that very important in-stitution are daily increasing, and already reach a very large amount.

These advantages have not hitherto been en-These advantages have not hitherto been enjoyed in this city by an immense number of clerks artisans, working men, and ser ants of all classes and conditions, who are equally interested in putting their savings out at interest, thus providing themselves with a reserve fund in case of need, sicaness, or old age, instead of spending them in the immoral gambling, in lotteries, and other frivolities.

frivolities.

The Bank of Maua & Co. of this city, following the noble example of their firm in Montevideo, now offer the same facilities in this city, and has

Buenos Ayres, October 27, 1871.

to date.

The Bank of Mauá & Co. is sufficiently known the Bank of Maua & Co. is sufficiently known to the Public by the benefit derived from the course of its operatious, which are regulated on the strictest and soundest principles, and always directed to promote the general welfare.

The Bank of Maua & Co. are also persuaded that this new branch of their business will render improve services the making always of Public services. immense service to the working classes of Buenos

Ayres and its neighborhood.

Buenos Ayres, 2nd January, 1867. P. P. MAUA & Co.,

M. A. DE FREITAS AMORIM.

CONDITIONS.

First—The Bank receives at interest any sum from Twenty-five Dollars currency or one Silver Dollar upwards.

Second—The interest allowed is six per cent. p. 2) per annum, which is liquidated every six months.

Third—The depositors can at any time retire the whole or part of the money deposited.

Fourth—Once the money deposited exceeds went y-five thousand dollars currency, or one

THE PNEUMATIC COVER.

Cleanliness, Economy, & Durability THE GREATEST INVENTION OF THE AGE.

No more Obnoxious Odors in Sick Chambers!

For some time past the want of a cover for vessels containing animal and vegetable refuse has been sorely felt in hospitals, asylums, and even in private houses. An article in every way meeting the requirements of the case is now offered by the Inventor at the

Twenty-five Dollars mic.

No well-organised house should be without a set. As a proof of how perfect the closure is, the vessel may be sus-

pended in the air without other hold or support. There is no better way of keeping Preserves, Butter, or Meat

In an economic point of view, it cannot be surpassed by china or delph, which get broken at the first fall, As only a few samples have been received, parties desirous of

procuring sets should apply at once to the Office of B. MITRE y VEDIA & Co.,

> Calle Piedad 93. 114..15 po 13

DEPARTMENT OF INTERIOR.

5 MONTHS.

The Government of the Argentine Republic, as authorized by law of Congress 12th Oct. 1871 for the construction of a Railway from Cordoba to

Sealed proposals will be received at nister and the interested parties on the day and hour above mentioned. The proposals must be subject to

meters long, and, must be built on a gauge of one meter, in strict confprmity with the plans and surveys of the Government Fugineers, which may be seen at the Natisual Engineers Despartment, 32 Calle Belgrano. The Inspecting Engineers to be appointed by Government for insuring the proper execution of the works will be empowered to prohibit the use of materiales which they may consider unfit, adn the contractor must attend to their suggestions, and follow the detailed specifications they give him, both as respects materials and the execution of the work.

2. The line must be finished in every part, stations, rolling-stock &c., within 41 years from the approval of the cantract (except case of force-majeure), the contractor obliging himself to pay a penalty of 25,000 hard dollars a month for any delay; the dollars a month for any delay; the Government further engaging to pay a premium of 10,000 hard dollars for every mouth finished before that

3. The execution of the works shall be arranged so as to enable the line to be delivered in sections which the Government shall have the right to open to traffic whenever it sees fit.

4. The contractor shall oblige himafter completion.

5. The Government will permit all line to be imported duty-free.

must specify how they would receive all who suffer from Corns, Bunions, irregular Toe-Nails, or other Diseases of the Feet, to pay him a payment whether directly from the visit, at any hour from 8 to 11 a.m., or from 12 National Treasury or through a bankto 4 p.m.; Sundays and Holidays from & a.m. to ing-house in London.

ceeding 14,127 hard dollars 55 cents per kilometer, besides the interest at 7 per cent. on the capital employed for the interval between the actual outlay and the date of payment, which will depend on the form and manner

Government the sum of 100,000 hard Sus salidas seran como de costanbre de B. Ay- dollars as a guarantee for the proper fulfilment of the contract and this sum is not to be withdrawn till 12 months after the delivery of the whole line, on the Government declaring that the contractor has fulfilled all his engagements.

> cessary, so that the presentation of proposals gives no particular rights to any of the parties interested.

TREATMENT OF NEURALGIA During many years' experience in private practice, and in the Hospitals of Paris, the new reatment of neuralgia has been attended with never-failing success, even in the case of sciation a kind of neutalgia which had previously re isted all known remedies.

This continual success is easily explained, now that the scientific researches of Dr. Moussette have demonstrated the real cause of neuralgias. Wholesale Orders addressed to— Dr. RAMANGE, 198 25 DE MAYO,
