The winter will be cold; however, I have a good stove and mean to make peat enough for myown use to last me all winter; turf ground I have found in the immediate neighbourhood, the same as in all high mountain regions, so that good fuel will not be wanting.

I get the peat made on a press like brick but of ball-shape, which makes a fuel as compact as coal, but of hand-like in the immediate as coal, but of hand-like in the state of th solid sovereigns spent upon securities which, as some tell us, it was morally, not to say legally, wrong to hold. In their stead, they have a little very commonplace experience—so commonplace experience—so common place that it is not worth one per cent. of the price they paid for it. And yet, if report be correct, there must be folks in the world who would like to get a little more; who met at the Waterloo Hotel on Monday to form a steamers, no packet. A private joint-stock gas company for the town of Flores is now talked of, and will probably be carried out. The total capital is but £20,000 -terling; and the new company proposes not only to light the town and the quinta streets, but also to lay down pipes along the Flores road and light same up to Almagro. As that road is now being more built on than any other part of Buenos Ayres, there can be no doubt the number of corsumers would be amply sufficient to cover the cost. It is stated that the Municipality of Asunci-

have received several proposals for lighting their city with gas. It is expected the concession will be given to either Waring Brothers or George Bower of St. Neot's and London. It is evident that in South America, we certainly have caught the tramway and gas fever pretty strong, and the immense benefit from both will soon be apparent throughout the land.
