It being an admitted fact, that "Money makes money," the object of LA BIENHECHORA could not be better, since it opens a vast Savings Bank for the surplus or savings of the Public so that, by the proper employment of these small gains, a moderate capital, or even annuity, may be secured in a short time. By this means a provident, though helpless, family can husband the small means, and, in the end, attain a competency.

small means, and, in success, potency.

It being proved that the accumulation of interest is the most powerful means of augmenting the capital, THE BIENHECHORA DEL PLATA—an Argentine Company, whose only investments are in the country—holds out to Subscribers greater advantages than any other Institution, by reason of all its dealings being in the River Plate, where are current as large interests as in any part of the world.

#### Bristol's sarsaparilla

Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compounded of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way as to retain, in so full strength, the special curative virtue possessed by each. The root of the Sarsaparilla plants found in Honduras, is that which we use in this somewhere it is the kind which all making the strength of the sarsaparilla plants found in Honduras, is that which we use in this special curity which all making the same strength of preparation; it is the kind which all medical men esteem moss. About fitty per cent. of Bristol's Sarsagarilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleanaing and healing vehetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.

By having our own agents at he places where By having our own agents at he places where the various roots, drugs, herbs and plants, composing our meditines, are produced, we are enabled to eversise that constant cure in selection which insures uninformity of excellence, and we spare no money and no effort to procure the best—and only the best—of every article entering into their composition; and it is with the most abiding confidence we say, to be sick of all nations and all countries, that, in Bristol's Sarganzilla you have a remedy more reliable than aparilla you have a remedy more reliable that any before offered to you, and which will no di-appoint you in the cure of.

Salt Rheum, Tetter, Scald Head, Syphilis, or Veneral Discose, Nervous and General Debility, Old Sores, Ulcers, Tumors, Abscesses, Boils, Eruptions Scrofula or King's Evil, Female Derangements, White Swellings, Fever and Ague,

Chills and Fever. & Dumb Ague As a means of building up the constitution that has been broken down by the excessive use of Mercury, Iron, or other Linerals, our Sarsaparilla will be found most excellent, and can be administered with safety to the weakest patients. As a purifier of the blood and humors, in the Spring and early Summar, it will the tound me.

As a purifier of the blood and humors, in the Spring and early Summer, it will the tound unfalling. It can be taken freely at seasons, rainy or dry. For some of the above diseases, the use of the Sarsaparilly must be continued a considerable time, especially for those that are hereditary or constitutional in their nature—such as Scrofula: but a faithful compliance with the directions will always relieve and mitigate, and in a great majority of cases will effect a complete cure. It will also be found, in all of the above diseases, that a cure will be greatly hacted by cure. It will also be found, in all of the above diseases, that a cure will be greatly hacted by using our Bristol's Sugar-coated Pills, in moderate does, in connection with the Sarsaparilla; they carry off large quantities of morbific or dieased matter set free in the system by the Sarsaparilla, and in this way facilitate she return of normal functional operations.

European Mail.

Reduction of Price for 1872

IN accordance with the wish of a large number of our subscribers in South America, the proprietors of the "European Mail" have decided to prepare but two issues per month of this Journal instead of three. This determination has not been arrived at through any lack of support. On the contrary, we constantly have ovidence of our increasing influences by large additions to our subscription list, and it is to meet the convenience of the bulk of our supporters that the change is made.

that the change is made.

As many of our readers are aware, the third is no of the month was so frequently delayed, owing to postal irregularities, that it often arrived in company with the first issue of the followng month.
To obviate this delay, and to ensure punctual delivery, in future the issues of the 9th and 23rd of the month will from January 1972 and hence-

Dr. JACKSON'S BALSAMIC PECTORAL.

18 a remedy long employed by the eminent
Physician whose name it bears, and is carefully
prepared from the original Recipe by the prosent
Proprietors. It is composed entirely of vegetable products, and combines valuable expectorant qualities with those of a soothing curative nature. It has already wen golden opinions
to Europe by its wondrons effect in allaying
pulmonary irritation, and its prometing a healthy
iaction of the membranes lining the throat and
lungs, arresting the progress of disease and

pulmonary irritation, and its proteing a teastry iaction of the membranes lining the threat and lungs, arresting the progress of disease and decay, and even, when used at an early stage, arresting that most terrible of chest diseases. Pulmonary Consumption.

The value of a remedy, within the reach of all, which by its therapeutic action controls and cures a vast bulk of the diseases to which mankind is liable, cannot be overrated. A brief notice accompanying each bottle, of the principal complaints for which it is specially appieable will be found useful; and, instead of presenting a host of testimonials of more or less value the Proprietor simply begs "One Trial," which will far better establish it reputation and gain the confidence of those who need the relief it affords than the repeated experiences of other aufferers, all of whom may be strangers to the patient.
