MENDOZA AND SAN JUAN RAILWAY,

An interesting pamphlet of nearly a line of railway from Rio Cuarto to San | board is valued at 5 million \$its. Luis, Mendoza and San Juan, Previous surveys had been made in 1854 by Mr. Buschenthal's engineer, Allan Campbell, at the cost of General Urquiza's Government, for a line to Mendoza; and in 1858 M. Laverge surveyed a route from Villa Nueva to San Luis and the foot of the Andes.

In November 1870 Mr. Elia and 3 assistants started from Buenos Ayres, and provided themselves at Rosario with norses and supplies of every kind, reaching Rio Cuarto on Dec. 9th and beginning their surveys next day. They had to abandon the route of the old coach road by Achiras and Morro, which lies through mountainous country, and draw a line 25 miles further south, passing through the ruined village of Sampacho and a fertile, level country to Mercedes, in the province of San Luis. The surveys on this part were made three times by different routes, at the orders of the National Engineer, Mr. Carl Stegmann, and as they found staff their too small they sent to Buenos Ayres for 3 more engineers, m March 1871; as the epidemic then prevailed the latter had to go overland by Chivilcoy, Melincué and Esquina to Villa Maria and San Luis. Rour surveys were made up to August, and in the ensuing month the work was entrusted to Mr.Carl Christiernson, who had just completed his share of the Tucuman surveys, and this gentleman, in company with Mr. Peter Peterson as National engineer, concluded the surveys between San Juan and Mendoza by November and reached Buenos Ayres on Dec. 30th 1871, having fully carried out the surveys and met with every assistance from the Provincial Governors and authorities, who promised moreover, a grant of land for all the stations.

The result of the surveys may be recapitulated thus-

1st section Rio Caarto to Mercedes. From Rio Cuarto the line bends North, to avoid the Juncalitos and Sampancho swamps, but leaves the Sanpacho and Suco mountains to the North, and goes again SW. crossing Della Croce". the arroyos Sta. Catalina and Cortaavoid the mountains, and then the route crosses Arroyo Chajan at a narrow point. The Chajan range is traversed at 51 miles from Rio Cuarto. the ascent being less steep than the descent: the line then proceeds without obstacle, with very slight inclines, to Mercedes, the station being 11 mife

2nd Section Mercedes to San Luis. From Villa Mercedes the route runs West, crossing the Rio Quinta a little south of the Toscas pass, which takes its name from the hard soil of the riverbank. In flood times this river carries down trunks of trees &c. The line now runs NW. between two lines of forts on the San Luis frontier, till a gradual rise brings us to the hilly since become a general tworste.

This gradual rise brings us to the miny and with eminent success as a renovator of the nervous system, and thousands have derived the greatest benefit from its use, for at not only sets right any irregularity of the storach, liver, bowels and kidneys, but has also proved highly valuable against cholers. Then avoiding certain slopes it gently descends to the Desagaudero, which in flood-times is very formidable. After crossing this river the line is So han do vender al mojor precio y dinero do straight and smooth all the way to La Paz.

4th Section-La Paz to Mendoza.

The La Paz station is half a mile north of the town, and the route traverses a slightly undulating country as far as Dormida, and then a firm and dead level to Mendoza. Besides many culverts for the irrigation canals there will be a bridge over the Mendoza river the melting of the snows in the Andes.

5th Section Mendoza to San Juan.

The line runs almost due North, crosses the Zanjon canal, traverses some beautifully cultivated country Mariner's Compass." and then enters on a plain, intersect-

sandhills, and again North to Cañada Honda. From Cerro Valdivia to Carpinteria the soil is firm and stony, but afterwards it becomes so loose that raised earthworks of 3 feet will be requisite. The only steep incline is near of the line is in San Juan city.

The minimum radius for a curve on the whole line is one of 1100 yards. The gange would be 54 feet, with 56 lb. rails and Livesey sleepers. Besides the Rio Cuarto, Mendoza, and San Juan stations there will 22 lesser ones at distances varying from 10 to 25 trary I believe it is quite a diplomatic miles. The line would be 3813 miles in length, and cost £3,420,000 sterling hundred pages has just been published for the wide gange, same as Rio Cuarby Angel de Elia C. > THE ORDENANA MISSION THE NEW ORIENTAL MINISTER TO ROME.

INTERVIEW WITH THE KING.

Rome, April 10th 1872. Political circles are agitated with the strange news of the arrival of a Special Envoy from Uruguay, who is said to have had an interview with the Re Galantuomoat the Quirinal a few days ago. His name is Oscar Ordeñana, and as it is rumored that he was a clerk in Montevideo at the Government house and previously an auctioneer, there is no little surprise to see him sent on a diplomatic mission. Nevertheless understand he is of gentlemanly manners, and talks French tolerably. At

all events he seems to have got round the King and prevailed on him to recall the squadron that was under orders to sail for Montevideo. There is a good story current about a coachman driving him by mistake to the Vatican, which is very possible, as the Hotel Minerva is almost exclusively occupied by clerical travellers, and the coachman doubtless took Sor. Ordeũana for a Bishop and confounded his Spanish for bad Latin. Since then he has been often pointed out on the Monte Pincio promenade as the hero of an awkward blunder, the fame of of the place shows the very best and which will stick to him while he is

It may be true or the contrary, but the account given of his interview with King Victor Emmanuel is quite pecu liar in diplomatic audiences.

The King is always affable to strangers, and in spite of his annoyance about the want of courtesy shewn by the Uruguayan Government to Count by saying that he hoped Signor Ordenana had had a pleasant journey. "Well, Your Majesty, it. was very

pleasant for the land portion, but I sufwould hardly venture again, even to Fontana, Zaquella, Vivanco, Reggiar-Galantuomo". "Il Signor Ministro will find much

of the Legislature has been prorogued by the Governor, and a long list of proposed measures to be decided before the closing of the Session. Tramways, railways and new bank schemes are the order of the day; upon the whole, Entre Rios looks pushing ahead.

Respecting the Montevidean loan there is now much noise in the sister city; the last instalment of the loan was payable on 15th April, nevertheless up to the present the Montevidean Government has only received £800,000 sterling. It seems that the nett proceeds at 72 should give £2,520,000 sterling. This would leave a balance, and a very large balance, for the Montevidean Government but there are parties who state that the Douro remittance is the last the Government will receive. Messrs. Thompson Bonar and Co. There was nothing much done in bonds to-day There was nothing much done in bonds to-day. Everyone is waiting for the packet, and both Co-dulas and Bonds are brought to a stand still. The market for funds looks a lettle less firm than last week, and this is owing to the impression that for the end of the month everything has been arranged. The sales to-day were as follows—

It is stated that soon Bullrich and Co., will sell at public auction, by order of the government, all the river bank and low lands extending from the l'aseo Julio to the Recoleta. This will be an important business.

The mortgage office in this city has, by order of government, been passed to the charge of Mr. Peter Argerich, the new escribano. It is a subject of the most constant complaint that with all the lawyers we have in the legislature none of them introduces a bill for the creation of a suitable building for the registry of deeds, mortgages, &c. The present system is of the 'Cooter' stamp, and should be abolished. Furthermore, to discover if there is a mortgage on a piece of property it is necessary to apply first to the judge for an order. This interferes greatly with business, and should be abolished.

Messirs. Simpson & Arriagno, the well known contractors, have for the last few days been repiving and relaying a portion of the Flores tram way line. It was much required, as the packing beneath the sleepers was deficient.

with immigrants, the scarcity is now no longer felt. It was the recommencement of the extension of the Great Southern Railway works that made of the Great Southern Railway works that made labor in town so scarce. It appears Mr. Grant, when the order to begin arrived, came up to town, spoke to three Italian peons at the station, and noxt morning left town with 800 Italian peons. Owing to this lovy, peons became so scarce that some works had to be stopped until now.

Very important news reached us to-day from Rosario. It appears that a joint stock company, known as the Credito Torritorial, has sold its privileges in London, and the affair is now to be turned into an English Rosario, brik with a capital of one million sterling. We look for further advices about this matter. As for a new bank in Rosario, it seems that already there are too many there. However, a million sterling fresh capital from \$180 to 190 per arrobe for mixed hair from the florth.

The colonies are flourishing. The village in flo centre of the first, and surrounding the station, has now some 80 houses, and a population of 400 people. We are showing the people how towns spring up in the United States. Here in this country, villages and towns remain stationary for centuries. Las Piedras, San Jose, Coronda, San Lorenzo, Culchines, El Rey, Espin, all in favourable positions, what are they? The four first we may say have been stationary for 50 years the three hast have disappeared; and within two years we have three railway towns in the province of Santa Fe, Bernstadt, Carcariena, and Canada de Gomez, where new houses are going up every day, and where there is a continual life and bustle. This shows what railways are capable of creating, and what foreigners and foreign capital can achieve. The colonies are flourishing. The village in

The Savoie's mails brought advices to the Monfetevidean Government respecting what is termed the Oriental Italian mission. Don Oscar Ordeñana, the Oriental envoy, arrived at Florence on the 21st March, and at once pushed on to Rome, accompanied by the Oriental Charge. Pantonini y Diez, both bearing special despatches to the Italian Government from the Montevidean Government, to arrange about the much talked of Italian claims. On the 23rd they arrived at Rome, and at once presented their credentials. On the 2nd April the Oriental envoy took his first note to the Italian Government, which was received so favorably that the Italian Government ordered at once to suspend the sailing of the Italian squadron to the River Plate. This nows has been received in Montevideo with high satisfaction, as it seems the long pending claims are at last about to be settled amicably.

The Ariadne leaves on 22nd. She will probably take a full carge. She takes rather a novel home carge in the shape of 250 tons of tea, that were imported here direct from China, but the market being overstock the tea, has now to go forforward to England. She also takes 700 bales wool and some 2000 hides. At Montevideo there are 1.50 bales of wool that were got out of the Evera without any damage, that now go forward. There is also other carge waiting for her in Montevideo.

The Bank of Mana & Co in Montavideo has position of the same and withdrawn.

The Bank of Mana & Co in Montevideo has already provided for the working classes in that city a safe and profitable depository for their

SAVINGS.

The sums deposited in that very important institution are daily increasing, and already reach alvery large amount.

These advantages have not hitherto been enjoyed in this city by an immense number of clerks artisans, working men, and servants of all classes and conditions, who are equally interested in putting theirsavings out at interest, thus providing themselves with a reserve fund in case of need, sic ness, or old age, instead of spending them in immoral gambling, in lotteries, and other frivolities.

The Bank of Mau's & Co. of this city, following he noble example of their firm in Montevideo, ow offer the same facilities in this city, and has

posited and withdrawn.

The depositor is permitted at any time to withdraw the whole or part of the sam deposited; in the former case the interes will be calculated up to date.

The Bank of Mauá & Co. is sufficiently known to the Public by the benefit derived from the course of its operations, which are regulated on without this transfer soid as the SINGER is gonuine without this transfer soid as the SINGER is a found in the strongest, and to the simplicity of the mech-mism and case in operation may be attributed the extraordinary success which has followed.

Bristol's sarsaparilla

Is prepared in the most scientific manner, by thorougally educated chemists an I Druggists, who have had mony years' experience. It is not a simple extract from one article, but is compound, ed of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way as to retain, in so full strength, the spec all curative virtue possessed by each. The root of the Sarsaparilla plants found in Hondurss, is that which we use in this preparation; it is the kind which all medical man esteem moss. About fitty per cent. of Bristol's Sarsagurilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleansing and healing vehetable substances. It does not contain any thing that is degrous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.
