CLANDULAR DISEASES.—Many of the manadies generated by virus in the blood fis on upon the glands. This is especially the case with those of a scrofulons type. Whenever these important organs are affected, either discretily or sympathetically, the only medicine that cas be relied out e effect a cure, is Bristor's Sarsaparilla. When the great secretive gland, the liver, is chronically disordered, this balsamic preparation should always be resorted to. It is the only specific for ulcerations in that tender at 4 saceptible organ, and its tonic element also at d susceptible organ, and its tonic element also expresses a wonderful controlling influence in fever and ague, dumb ague, remutent fevers, and general debility. #### Bristol's sarsaparilla

Is prepared in the most scientific manner, by horoughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compound, ed of extracts from a number of Roots, Herbs Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their source in the blood and bumors; these different vegetable extracts bumors; these different vegetable extracts, are combined in such a way as to retain, in so full strength, the special curative virtue possessed by each. The root of the Sarsaparilla plants found in Honluras, is that which we use in this preparation; it is the kind which all medical man esteem moss. About fity per cent. of Bristol's Sarsagarilla consists of the concentrated extract the remainder was above sixtly being. extract, the remainder, as above stated being extract, the remainder, as above stated being composed of extracts from other powerful, clearsing and healing vehetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparilla.

By having our own agents at he places where the various roots, drugs, herbs and plants, com-posing our medicines, are produced, we are en-abled to evercise that constant care in selection which insures uninformity of excellene, and we spare no money and no effort to procure the best—and only the best—of every article enter-ing into their composition; and it is with the most abiding confidence we say, to be sick of all nations and all countries, that, in Bristol's Sar saparilla you have a remedy more reliable than any before offered to you, and which will no di-appoint syou in the cure of.

Subsequently made certain awards.

When the first instalments fell due. Venezuela failed to make payment, and sent an agent to Washington, who interposed objections and exceptions to the conduct and acts of the commissioners, and urged that the awards should be set aside. The whole case thus became the subject of diplomatic correspondence, the government of Ve neznela persisting in its defauit, and urging that there was just ground of complaint against the tribunal of arbitration. Finally the United States minister at Caracas, Mr. Partridge. was instructed to ask from the government of Venezuela specific charges accompanied by proofs. The government of Venezuela collected a large mass of testimony and transmitted it to Washington. To the Editors of the STANDARD.

Gentlemen,

Kindly note the following facts; they will be found well deserving of a preterent place on the tablets of memory.

According to the 'ipse dixit' of Sir John Bowring—and who shall say him 'nay?—the population of China may be regarded as embracing from five be regarded as embracing form five be regarded as embracing firm five pats, at 7 per cent on bonds. So long as mopats, at 7 per cent. on bonds. So long as mo-ney rules such a drug, pol ties have no power over the market; but there are some bears who look for a tumble, and that ere long, yet the probabilities are they will be disappointed. Mr. Goulstone, exhibited another sample of preserved mutton to day, it was inspected by many, all pronounced it excellent, and Mr. Tom Duggan suggested that it might be good food for a leader. Mr. Mantels thought the best way to send it to Europe would be in one of his famed iron safes. The mutton really looked excellent and in the way of samples, we doubt if Mr. Goulstone can go much farther, the next thing now is to make a company or a shipment.

The non-arrivallof the Sindh has stopped everything. People now look for the Lusitania? She will probably be in in the morning.

The most important news of the day was the rejection of the bill for the conversion of the paper money by the Committee of the House.

Everyone on 'Change was well pleased at this rejection of the Legislature Committee mets with the solemn approval of the whole commercial public.

The fact that not a single paper in this city, except the Standard, gave the news of the Government having sent the now Prime Minister, Frias, to Salta, as Plenipotentiary to settle the Bolivian question, caused some surprize. Sone of the best informed brokers knew that it was correct, and this stienced all question, but the motives the other papers had for concessing the new loan law passed by the Entre Ricas, the fine of the papers have taken great exception to the right of a province to make a foreign loan; bul we willingly bear testimony to the conomical administration of Entre Ricas, the steady province the Government is making of the sound and good use the Government is making of the province on the foreovernments making of the province on the foreovernments making of the same industrial vitality as Buenos Ayres. Entre Ricas is in every sonse going ahead, and is well able to pay interest and amortization on whate commercial public.

The Governor trefers to the constant and numerous applications for money by the Government during the last few years, and the injury to the credit of the institution by this practice. The note is well timed, and speaks well for the Governor, who brings to the Executive a very valuable bank experience. It is proposed this year to make a new valuation of all city and country property for the purpose of levying the Contribucion Directa tax, and it has been thrown out that the present valuation is altogether too low; but if the value of real estate is to be raised then the tax of 4 per mil must be reduced, as the 4 per mil tax was imposed upon the present valuation, and apropos of this, it should be borne in mind that of that 4 per mil 1 per mil was for City Improvements, which improvements are still 'in nubibus.'
