#### THE ADMINISTRATION B. Avres Water Supply.

Whereas, the City is built on soil now satu rated with organic matter, and there is no out-let or disinage for dirty water, leaving it to oment and throw out deadly exhalations Moreover, as it would increase the danger to public health if we increased the consumption of water, and our machinery being unable to give out more than we do at present, and any attempt to pump more might lead to accident, and perhaps a suspension of water supply for the Cny:

Finally, in spite of our efforts we can only give 11 million gollons, while the depland is much greater, and we calculate from 2 to 21 milion gailons for the auminer. London, June 29th.

The Premier tast night stated in the House of Commons—and a similar aunouncement was made by Earl Granville in the Upper House—that the in direct claims have been withdrawn. It appears from these efficial statements that at the adjourned sitting at Geneva on the 17th inst., the arbitrators, having duly considered all the arguments advanced by the United States Government upon the question, de clared that they had individually and collectively come to the conclusion that the indirect claims should be wholly excluded from the considera tion of the tribunal. After this decla ration of their opinion, the commissioners adjourned at the request of the American agent, who wished for time to communicate with his Government When the tribunal re-assembled on Tuesday last, the American representative informed the arbitrators that the United States Government consented to the exclusion of the claims in question from the consideration of the court. The claims being thus vir tually abandoned, the request on behalf of the English Government for a long adjournment of the arbitration more will probably die. The steam was also withdrawn; and at the time entered the passenger car. the Premier and his colleague were stating to Parliament the satisfactory arrangement that had been come to, the English counsel was repying in the presence of the arbitrators to the He was warmly welcomed by the peo-

past week has been characterised by a fair degree or activity, considering the state of things generally. Few new transactions have been entered into owing to the end of the half year being at hand, and the attention of makers is almost exclusively bent upon clearing off all their spring engagements. In regard to the demand and supply there is the same unsatisatery state of things to be reported, the latter decreases, whilst the former expands. Makers are entirely cleared out, and consumers have rot a ton of iron that they can really regard as in stock, conse-

has hithere theen current. There will probably be little change to report in regard to customers. The United States, Canada, and South America will continue to take the largest quantities of all descriptions they can secure, and Russia, Germany, France, and other continental markets, will require considerable supplies also.

The steamer City of Buenes Ayres so well known in this port was to be sold by auction at London on 3 of July.

The Honduras business has caused profound

The Honduras husness has caused protound attention in the London money market. The Economist speaking of this matter says—
"The event of this week in the foreign stock market—the great fall in the Honduras State Loan—should be a warning to investors of the dangers they run when they take up the bonds of costs in foreign loans which promise a high rate And yet they are to disburse some two hundred thousand dóllars, and take charge of the interests of tens of thousing the propertion of the interests of tens of thousing the properties of poor foreigners. We trust Congress, in another session, will take the whole matter into its own hands.
