On Monday an important meeting of a few survivors of the American iron clad expedition to Montevideo, in the year 1865, was held in Calle Re-conquista. Notes were exchanged of succeeding experiences; the roll was called over. Some are in other hemispheres, others are up and stirring in the north market; and, with the soli-tary exception of the little skiff that carried the party triumphant through the waves on that eventful day, the party and its accessories are intact. Years have rolled over since that terrible morning, and possibly we are all richer in experience and wordly goods, still we all look back with pleasure to that expedition as one of the greenest spots 'on memory's waste'.

Mails now no longer costs a thought, master's note book, which has been kindly favored us by a gentleman from Baltimore. The American mails arrived at Rio the very day the Magellan sailed, both steamers spoks and exchanged signals. As the Truxillo, Santiago, and Kepler were to leave Rio next day for the Plate, there was no necessity to stop the Magellan. That evening however a Brazilian transport steamer cleared for Buenos Ayres; she took the mails with the greatest affability, and the captain promised to send them ashore the moment be anchored. The second day out from Rio however the steamer encountered severe head winds. Spite of everything the captain held his way: it blew as it never blew before on the Brazilian coast, and even the compass had to be put in the hold to escape the electrical modification of the needle caused by the constant playing of the lightning around the steamer. The storm continued; and much to the satisfaction of the crew and the astonishment of the captain, on the morning of the 5th day the steamer was blown clean back into Rio harbor. The mail bags were at once landed and sent to the Praga do Comercio, whereupon the weather became fine and the steamer resumed her voyage. Dr. José Maria Irigoyen's funeral took place yesterday. thing is concluded. The reform is as manifest as it is useful, and augurs well for the province, as it is probable many more railways will now be constructed in this province, since the procedure has been so immensely simplified.

That there is something after all in a name appears pretty evident from the fact that Messrs. Zumarun & Co., of this market, have applied to the government for a re-consideration of Mr. Elliot's railway scheme to Bahia Blanca, which was so uncer moniously thrown out the other night by the legislature. It appears, however, that another project for a similar scheme is at present before the government, and in which one of the largest property holders in the Patagones district is interested.

Application was yesterday made to the government.

Application was yesterday made to the govern-ment for a license to erect a new saladero at Tuyu; the saladeros at present down there are oing well.
One hundred shares of the Transandine Telegraph are now offering in this market; the price asked is par. Owing to the spleudid subvention granted by the government to this line, there cannot be a shadow of a doubt as to the future working of this company.

It was announced on 'Change to day that the Montavilla Couragns in the second of the second of

payable in three monthly instalments. Splendid business for the bank.

To-day the importance of the Chilian Telegraph was proved. A special telegram, from Valparaiso, to the Sraxpano Office, supplied news from Europe, one day later than that received per last mail Magellan. That is to say, our dates per Mayellan were from Lisbon to 5th July, and now per telegram via Valparaiso, we have dates from London one day lates, (to 6th July). This was indeed an editorial victory, and admitted as such by all on 'Change. The telegram in question will be found in the first column.

Some Transandine Shares were offered in this market the other day. We think it right to say that in Valparaiso they are at 10 premium.

There was another blaze in Congress to-day, and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuated whole Senate, the success was beyond expectuated whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuation and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations and the first column.

There was another blaze in Congress to-day, and the Klappenback coal was lighted before the whole Senate, the success was beyond expectuations.

The first column to this control to the hone shafeholders of this company. This is nows of some importance to the hone shafeholders of

whole Senate, the success was beyond expectation, and all congratulated Mr. K'appenback on having won the prize, 25,000 pats. As we mentioned yesterday the railway from Cordova to the ceal mines is now no longer a scheme; cost what it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may, both houses are of accord that the road it may been more successful than the one in question; and it will be recollected that in M. Characteristics in the original accordance in the congruence of th through Bullrich, a large lot of splendid rams, from his far-famed estancia; the full particulars of the sale will be found in the advertisement. So well known is M. Olivera to the sheepfarmers of this p ovince that it is needless to say a word in praise of the stock from that estancia. Mr. Olivera has devoted his time, fortune, and abilities,

vert has devoted his time, fortune, and abilities, to the business; his rams are not only known throughout this province, but also in the Banda Oriental and Entre Rios. At the Cordova Exhibition his wool samples took the prize. Parties who want good rams for their flocks should not fail to attend the auction.

The greatest Bance Hipotecario broker in town is Mr. Buya; he devotes his entire attention to this lies of business and him effects of the Flexical Conference of the second second

is Mr. Baya: he devotes his entire attention to this line of business, and his office in Callo Florida between Cangallo and Piedad, is crowded daily with series A, B, C and D people; mortgagers and mortgagees crowd this broker's office, and his applications at the bank show the wide connection which he has secured. Significant is the fact that of all the suburbs of this city Flores stands first on the Mortgage Bank's books for the number of its applications.

The length of the Transandine Tolegraph line is stated to measure 427 leagues. A good staffit will take to keep this line in working order.

The Tucuman Railway agair has assumed tha undoubted aspect of a tangled webb. All the bids now go before Congress to be considered by a special committee. Query, what will be the price of iron before the affair is settled? Some of the Doputies have already expressed their opinion on of iron before the affair is settled? Some of the Deputies have alr 'cdy expressed their opinion on the business and insist that the line should be a wooden one, constructed of the hard wood of the country, and built as an experimental road by the Government engineers. The idea finds great favor, and the Telfener contract has not as yet been signed.

been signed.
There is a report from Rio, or from Montevideo or from Gualeguaych, that the last Chilian steamer but one that sailed from the Plate for Europe took a special agent to Europe for account of the Argentine Government.

The Chilian bills of exchange passed for the Senega's mails were for £1,700, and not £17,000 stepline, as erroneously stated in our Sunday's

There is now much enquiry about the river Vermejo steamer, Governor Leguisamon. No thing less been heard of or from her since she left the Paraguay river, and serious fears are entertained about her. The Vermejo, it seems, is now very low, and it is feared that the steamer

can get neither up nor down.

The following schanes for Wooden Railways are now about to be passed, and contracts con-

cluded: —

1st line from San Nicolas to Pergamino.

It is a very significant fact which may possibly have escaped the attention of our readers, that some of the Directors and principal shareholders in England of the Buenos Ayres Northern Railway are on the Board of Directors of the new company just launched in London, called The Buenos Ayres and Ensenada and Port Railway Company. This points to the probability that soon the Northern Railway and Ensenada Railway will be merged into one concern.

A PRAOTICAL, acceptable, and most convincing Essay on THE INFLUENCE OF CLIMATE, was sent us yesterday by Baron Briet in the shape of a box of Otard, Dupuy, and Co.'s matchless Brandy. There can be no doubt the success of this draught i mainly due to the variations of climate rendering necessary some powerful internal balance to establish a proper and bealthy saudilibrium.

Is prepared in the most scientific manner, by thoroughly educated chemists and Druggists, who have had many years' experience. It is not a simple extract from one article, but is compound, ed of extracts from a number of Roots, Herbes Barks, and Leaves, all of which are possessed of some particular virtue or power in curing the diseases that have their sourse in the blood and bumors; these different vegetable extracts are combined in such a way as to retain, in so full strength, the special curative virtue possessed by each. The root of the Sarsaparilla plants found in Hondurss, is that which we use in this preparation; it is the kind which all metical man esteem moss. About fifty per cent of Bristol's Sarsagarilla consists of the concentrated extract, the remainder, as above stated being composed of extracts from other powerful, cleansing and hoaling vehetable substances. It does not contain any thing that is dagerous or injurious to health, and in this, as in nearly every other respect, is entirely different from all other preparations sold under the name of Sarsaparills.

Fever and Ague,

Chills and Fever. As a means of building up the constitution that has been broken down by the excessive use of Mércury, Iron, or other Minerals, our Sarsaparilla will be found most excellent, and can be administered with safety to the weakest patients. As a purifier of the blood and humors, in the Spring and early Summer, it will the tound unfalling. It can be taken treely at seasons, rainy or dry. For some of the above diseases, the use of the Sarsaparilly must be continued a considerable time, esp cially for those that are hereditary or constitution d in thus nature—such as Scrofula; but a faithful complainee with the directions will always relieve and mitigate, and in a goeat majority of cases will effect a complete cure. It will also be found, in all of the above diseases, that a cure will be greatly haoted by using our Bristol's Sugar-coated Pills, in mederate does, in connection with the Sarsaparilla; they carry off large quantities of morbine or diseased matter set free in the system by the Sarsaparilla, and in this way facilitate the reture to normal functional operations & Dumb Ague.
