Garonne's mails bring advices  
wind up of the celebrated rail-  
carriage case in France. Péc-  
e and Madame la Comtesse de

not have been acquitted by the  
mils. Père Dufour's father died  
at the charges brought against  
him.

*Capital says* that the sailors of  
the English gunboat have been anas-  
trophizing themselves by 'darking' about Ro-  
ad and calls on the commander to  
bring them up. 'Jack tar' is given to  
them. 'g' and 'rolling' when laying his  
charge on shore, and the only charge  
he can bring against him is  
that he is living with the people on the  
shore. There is no harm in 'Jack,' and  
the only charge he is charged with will  
be a very light one indeed to his  
discredit. Men who understand his few  
words and many good qualities.

*Le Courrier public* issues the follow-  
ing:

Cursing, which we recommend  
to all working men.—Now the curi-

has the clergy, in whatever ef-

they make to retain their influence upon human minds, use cursing and blessing much, you working more and more frankly every day the exactly contrary practice of benediction little and cursing so that even in the ordinary of conversion among you, you very rarely bless, audibly, like as one of your children; but frequently damn, audibly, them, wives, and your friends. You learned it from your superiors; and, in consequence of your too imitation of them, are beginning to alter their manners; and it would much surprise now-a-days, in European court, to hear the reigning

Regret to hear that M. Yfernet had a slight accident some days ago.

When jumping from a tram on Calle Piedad, between Reconquista and San Martin, he came in with the iron support of a sun-dial over a shop door. The wound was slight, but would not have been so if the 'toldo' had been at the proper height. One would imagine that Buenos Ayres was inhabited by idiots, if the elevation of the sun-screens and the scaffolding for
