A meeting of bankers and financiers took place yesterday in the Government House at which Messrs. Jones, Silva, Hoffman, Essig, Tomkinson Herrera and Cohe were called on by the Finance Minister to give their opinions about the redemption of the currency. The Minister declared that he had only 5½ millions left of the London loan for the purpose, and that the amount fell short by a million of the sum required. It was the unanimous opinion (says the Telegrafo) that the redemption of the currency should be carried out at all cost, and as it would be inexpedient to attempt this without the adequate amount at the disposal of Government the assembled bankers advised the Minister to throw himself on the commercial men and capitalists of Montevideo to make up

the million that is wanting. The Board of Directors of the Central Uruguay Railway Company call. a meeting for the 4th prox. at the company's offices, 262 Calle Rincon, to take into account the proposal of Messrs. Waring Brothers to prolong the main line from Durazno to Santana and the Cunapiru gold-fields on the Brazilian frontier of Rio Grande, becharge their water on the land sides throwing out 2 branches, one from Florida to Cerro Largo and Ardangerous, through an excess tigas, the other from Durazno by the of water, or organic matter, the Cuchilla del Rabon to Paysandu and ordinary rain water and that from | Salto. This would form almost a network all over the Republic, viz-

He points to the efforts of Mr. Richard Hughes, Messrs. Meantime there are people in Montevideo who grumble at Mac Kunon's London loan at 10 p3. The Legislature authorizes the Government also to emit a 9 per cent. loan at par for \$2,700,000 to pay arrears to soldiers &c. A third loan is spoken of, one million dollars, to make up the deficit for redemption of the currency. Nevertheless the elasticity and resources of the country are so great that a new loan every month would hardly bring on bankruptcy if the republic be left in peace.

The Mini joint-stock farming Co. shews \$24,367 net profits for the year ending September, and the Pastoril \$16,097; the sales of horned cattle during the year averaged \$10 per head: the present stock numbers 16,000 cows and 12,000 sheep. These companies count Messrs. Jackson, Zoa Fernandez, O'Neill and other influential capitalists among their members, the lands being situate near Lake Mini.

A second accident, in addition to the miraculous escape of 400 people, which we reported yesterday, nearly took place on the Western Railway on Wednesday. We have heard some details, but they are pretty much the old story, narrow escape, just in time to be too soon, cool engine driver, heated passengers, horse on the line, mortal smash, but nothing or nobody hurt except the engine. We hear that the cause of those frequent accidents is the utterly rotten state of the rails from Parque to Chivilcoy, and we are told that the Directors are about to renew them the whole way, also to lay down a double track. A friend who has just returned from the Brazilian capital showed us yesterday a 'carte' of the lunch 'menn' provided every day at Mr. Graham's famous Café Americano, in the Rua Direita, the first and foremost restaurant in South America, without any exception here, there, or anywhere. The weather is now so unpropitious to a vigorous appetite that it would be eruel to lay before our readers a list of the delicacies on which the three Bs of Rio regale themselves in the intervals between 'deals' in stocks, cotfee, beef and bills. We may mention a few of them, however, which are cooling and not likely to heat the ima. gination of our subscribers: oysters in every shape and form, stewed, fried and devilled; shrimps, crabs, and very red herring; lobster, eucumber, and other salads; pickled lobsters, Welsh celery, and Lord knows what sort of sandwiches. "The wool market has been only moderately active since our last, though the volume of sales have been followed.

Dr. Esteves Sagai, owing to press of business, has been compelled to decline the judgeship of the Supreme Court offered to him by the government. Dr. 'Carranza Viamont, second on the terna, has been named to the post.

"But at current prices business is dult for at descriptions of domestic wool, and manufacturers only buy when they are compelled to, in order to keep their ma hinery in operation. The stocks are, however, very much reduced, and in the event of any revival of trade in the goods markets which would warrant them in resunning active operations in the production of woollen fabrics, they would be obliged to come into market and take further supplies. There are no less than five vessels now loading guana on the Patagonian coast, and from all appearances, this new trade promises to assume important dimensions. There are samples of Argentine guano in town well worthy of inspection, and they have been pronounced by men experienced in the trade superior to Peruvian guano. The account sales of cargo sent home are so far favorable as to induce heavy shipments and we look for a great development in this trade in the ensuing year. On some of the islands there are immense deposits which belong to parties in this market. The least let up in the trade with tap a new industry for the River Plato, but so far, there is very little known respecting it, and that little is kept a great secret. We have seen maps and plaus of the islands and quite sufficient to inspire us with the belief that the Argentine guano trade will in a few years.

quite sufficient to inspire us with the belief that the Argentine guano trade will in a few years become of itse f a collossal trade. The privilege which guards it will in nothing check its development, rather does it help it, since it leads foreign capital into a new source of wealth which, hitherto, has been ignored.

On the 12th, of November a square of unoccupied land facing on Calle Rivadavia, and between the Lacroze and Billinghurst stations, will be put up at auction by Messis. Rodriguez and Larrazabal. The property is about the finest and most speculative that has been offered in the market for some time. The town is moving rapidly out in that direction, and building sites on the Flores road are about as valuable as town sites in Calle Cerrito.

on the Flores road are about as valuable as town sites in Calle Cerrito.

The wonderful escape of the Western Railway train, on Wednesday, near Morcedes, is, the subject of severe attention in commercial circles. Some of our principal merchants and brokers were in the train at the time, and they all testify to the wretched neglect which so very nearly cost the lives of some 400 of our fellowcitizens. In fact, their escape was in every sense Providential, for if either train had reached the curve the collision was inevitable. Traffic sense Providential, for it either train has reached the curve the collision was inevitable. Traffic on the Western Railway is now so great that a double track is almost required. With the telegraph working and the greatest care taken by the officials, accidents, no doubt, may be avoided; but it requires the greatest care, and the board of directors should well look to it. The passenger train left Mercedes when it must have been known the goods train was coming up; and the public demands of Mr. Huergo an explanation in

this matter.

The Municipality of Buenos Ayres has published another building edict, regulating the height of the houses and the size of the rooms. Parties intereseted in the matter should apply to the secretary for a copy of the regulations, as it is altogether too long for publication, here.

Property holders in the country districts in the vicinity of the city have taken fright at the proposed new roads that are about to be made i every direction, and their apprehension springs from the belief that these new roads will render so many different places accessible that the value of the privileged places at present must give way at once. We consider this an error. Su-burban property is yet immensely below its va-

lue.

Mr. Bungo's flour mill on the Riachuelo is now finished and roady to work. The convenient position of this new mill for shipping purposes shows that the proprietor believes that wheat and flour will soon become staple articles of export—and we are with him. This year has witnessed a very active trade in the shipment of Argentine flour to Brazil, which has resulted most forcerable. The harvest now coming in promises gentine flour to Brazil, which has resulted most favorábly. The harvest new coming in promises a magnificent yield. There is still a stock of 5000 tons of wheat in this market, which shows pretty clearly the production is now so far ahead of consumption test an export trade must ensue. There are those who believe that ere many years are about we shall see as many flour mills on the Riachuelo as formerly we had saladeros. Wheat and flour are articles that bear such little hauling about that the trade trade to be remunerative must be protected by every shipping convenience, and for this purpose Barracus and the Riacheulo offer the best inducements.

The share list of the National Bank is, as we The share list of the National Bank is, as we heard to-day, already almost filled; from the province of Saka a subscription for loo,000 pats, has just come down, and in fact all the provinces are subscribing far more liberally than what the founders of the bank anticipated. According to our reading of the law six months time must clapse before the lists can be closed, unless the directors can obtain from the government a reading to the second of directors can obtain from the government a mo-dification in this regard, which is every way likely that they will do. The burning of the vasura upon the Borger

The burning of the vasura upon the Borges system has proved such an eminent success that the Municipality has adopted it, and whatever doubts hung round the subject before are now fully removed. Strange to say, that notwithstanding the tempting offers made to the Municipality, for the right to extract from the vasura whatever might be useful for manufacturing or other purposes, up to the present the board has declined to make any contract, which is a loss to the city of at least a hunhundred and thirty thousand dollars per annum. The final passage of Bateman's port scheme by Congress is the topic of the day; the measure now only awaits the President's signature to become law, and the works will be begun immodiately. The Bateman drainage and improvement scheme stands equal chance of being passed, and it is deserving of note that these splendid enterprizes will call for a disburements of 23 millions currency per week for years. As regards iron-clads it may be as well to know that there are at present 307 affoat, or nearly so, and that Great Britain is a long way ahead in this new branch of civilization, viz.:

To the above may be added that the Argentine Republic is going to have two shortly, but in our case they will probably be of much more utility than to the Bolivians. We have an extended coast of Patag mia where they may be of service in helping ships in distress, as we have no lifeboat stations, and at intervals they may be sent up the rivers to overawe the pirates near San Nicolas, or enforce a fluvial police system hitherto unknown in Argentine waters. They will also serve as pautical floating academies.

A friend who has just returned from the Brazilian capital showed us yesterday a 'carte' of the lunch 'menu' provided every day at Mr. Graham's amous Caté Americano, in the Rua Direita, the first and foremost restaurant in South America, without any exception here, there, or anywhere. The weather is now so unpropitious to a vigorous appetite that it would be cruel to lay before our readers a list of the delicacies on which the three Bs of Rio regale themselves in the intervals between 'deals' in stocks, cofcelery, and Lord knows what sort of Plate man go to Rio without lunching

at Graham's. A monstrous fuss was, as usual, made the other day about the news of the terrible invasion of Indians at Tortugas and other places, but since then there has not been a single word about the calamity, though an enormous booty and dozens of Christians are said to have been carried of. So it is always in this country. If the Bolsa and the Bank and the Standard were all blown up by a Dr. Dn. Guy Fawkes to-morrow, the irreparable loss would be barely a nine days wonder. Really with the honourable exception of a few tender hearted editors, no one in Buenos Ayres seems to care a button about anybody or anything but the "almighty patacon".

The boys of the Jesuits College, in Calle Callao, had a 'barring out or some such schoolboy freak on Wednesday evening last, but were soon reduced to obedience, and the ringleaders picked out and punished.

Price 3s. 61, 17s., 10s. 6d. equal to four small, and 24s. per bottle.

Ask for Rowland's Macassar Oil, and avoid all other cheap articles under the same or similar names as squrious imitations. Each Bottle has a "Glass Stopper" in place of the Cork, as formerly. All with the "Cork are spurious imitations. This notice is deemed necessary, as the Proprietors have received intimetion that a large quantity, of Count rfeit, of the most permicious quality, has lately been sent from France and Germany to India, South America, and the Colonies, under their names.

A BEAUTIFUL COMPLEXION
Is obtained by the use of Rowland's Kalydor, which allays all irritation and tenderness of the skin, removes cutaneous disfigurements, freekles, and tan, and imparts a healthy and bloaming appearance to the complexion and skin. During the heat and dust of Summer especially, and in cases of Sunburn and Stings of Insects, it is of the utmost use. Price 48 64 and 84 64 per bottle. Ask for "Rowland's Kalydor," and see that their signature is in red ink on every bottle, as theirs is the only genuine.

WHITE AND SOUND TEETH Are indispensable to personal attraction, and to health and longevity, by the proper mastication of food. Rowland's Odonto or Pearl Dentifrice preserves and imparts a pearl-like whiteness to the teeth, eradicates tartar and spots or in injoint decay, strengthens the gums, and gives a pleasing fragrance to the breath.
